Fideuram Fund Bond US Plus

Sub-Fund of Fideuram Fund (ISIN LU0096627582)

Management Company: Fideuram Asset Management (Ireland) dac, Intesa Sanpaolo banking group

OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in EURO, aims to prudently generate a total return through a combination of both income and capital growth. The Sub-Fund invests in a wide range of fixed income securities (which are loans that pay a fixed or variable rate of interest) issued by companies or governments from around the world. Securities will be traded in United States of America without consideration for their maturity date. Securities will mainly be priced in US Dollars but the Sub-Fund may also hold other currencies as well as securities that are priced in other currencies. The investment advisor will choose securities with varying repayment dates based on its expectations for interest rate and exchange rate changes. The Sub-Fund may invest in emerging markets, which in investment terms are those economies that are still developing.

The securities will mostly be "investment grade", as determined by international ratings agencies. Whilst potentially producing a lower level of income than "non-investment grade" securities, they are also considered to be of lower risk.

The Sub-Fund may use financial derivative instruments not only for the purpose of risk hedging but also for investment purposes.

For the attainment of its objective, the Sub-Fund's assets may be invested in mortgage backed securities (MBS), commercial mortgage backed securities (CMBS), asset backed securities (ABS) and securities equivalent in nature to such securities. The benchmark of the Sub-Fund measuring the strategy of the Sub-Fund foresees an investment in such securities at around 35% of the net assets. Investments in such securities carry the risk of default of the underlying collateral.

The Sub-Fund's benchmark is the "Barclays U.S. Aggregate Index" (represents the performance of investment grade bonds traded in U.S.).

This is a capitalization Sub-Fund.

You may request to redeem the units held at any moment, by sending a request on any business day.

- This Sub-Fund is classified in the risk and reward category 4 because the investments value can be subject to relevant daily variation, both positive or negative.

- **Developing market risk:** The Sub-Fund is exposed to securities highly sensitive to political and economic instability of developing countries; price changes may be higher than those in the markets of developed countries.
- **Derivative risk:** In order to achieve its objectives, the Sub-Fund may use derivative instruments whose value may be subject to price fluctuations, positive or negative, much larger than those of the securities in the same Sub-Fund.
- **Liquidity risk:** The Sub-Fund invests in markets that can be characterized by a reduced possibility to exchange securities without a negative impact on prices.
- **Counterparty risk:** The Sub-Fund invests into instruments, such as derivatives, by entering into contracts with financial counterparties, exposing itself to the risk that said intermediaries may generate financial damage to the fund itself by not fulfilling their obligations in the future.
