¹Leverage calculated as sum of the notional of derivatives instruments.

REMUNERATION DISCLOSURE (UNAUDITED)**Foreword**

Fideuram Asset Management (Ireland) dac (the "Management Company") applies a remuneration policy and practices that are consistent with, and promote, sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profiles, applicable rules, the Prospectus or the Management Regulations nor impair compliance with the Management Company's obligation to act in the best interest of the Fund.

Key figures

For the 2022 calendar year, the Management Company paid remunerations as follows:

DIRECTORS: 688 094 Euro

EMPLOYEES: 12 676 022 Euro

The average number of employees was 66; the detail of staff cost was:

Salaries, bonuses, benefits and secondments: 11 272 166 Euro

Social welfare costs / insurance: 1 320 350 Euro

Pension scheme costs: 771 600 Euro

Total Compensation: 13 364 116 Euro

Principles

The Management Company adopted remuneration policies and practices that:

- are consistent with and promote sound and effective risk management;
- do not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the UCITS funds it manages (hereinafter "the Managed Funds"); and
- are consistent with the business strategies, objectives, values and interests of the Management Company, the Managed Funds and the investors in those Managed Funds and include measures to avoid conflicts of interest.

The Management Company's remuneration and incentives policies are founded on the following principles:

- alignment of the conduct of management and employees with the interests of unitholders, clients and the related managed assets;
- merit, with a view to ensuring a clear correlation with the performance and managerial qualities shown;
- fairness, with a view to fostering honest conduct and standardizing remuneration packages;
- sustainability, in order to contain the costs arising from the application of the remuneration and incentives policies within a range of values that is compatible with medium and long-term strategies and annual objectives;
- proportionality based on the role held by staff members;
- compliance with the regulations in force.

The Management Company decided to entrust its Remuneration Committee with the advisory and consulting functions aimed to support the Board of Directors in all activities relating to remuneration, defined in accordance with the principles set out in the ESMA Guidelines on sound remuneration policies (ESMA 232/2013 and 411/2016). The Remuneration Committee has an advisory and consulting role aimed to support the Board of Directors in all the activities relating to remuneration.

The Remuneration Policy includes fixed and variable components of salaries and applies to all categories of staff, including senior management, risk takers, control functions and any employee whose professional activities have a material impact on the risk profiles of the Management Company and the Managed Funds.

The fixed component is defined based on contractual conditions, the position held, responsibilities assigned, and the specific experience and competencies gained by the employee.

The variable component is linked to personnel performance and proportional to the results achieved, keeping a prudential approach to risk, and is formed by:

- variable component, paid through the incentive and bonus systems;
- any stability agreements, non-compete agreements, retention allowance and similar.

The remuneration policy is subject to an annual central and independent internal review, to ensure that:

- the overall remuneration system operates as intended;
- the remuneration pay-outs are appropriate;
- the risk profile, long term objectives and goals of the Managed Funds are adequately reflected; and
- the policy reflects best practice guidelines and regulatory requirements.

The Group internal audit function conducts yearly missions on the rewarding and incentive system at the Management Company level. The audit conducted during the financial year 2022 revealed a positive picture, characterized by an appropriate implementation of the organizational model. Lastly, no irregularities have been detected in terms of individual compliance breaches among employees.

FONDITALIA

BOARD OF DIRECTORS OF THE MANAGEMENT COMPANY OF THE FUND'S REPORT ON THE MANAGEMENT OF THE FUND

MACROECONOMIC SCENARIO

The growth of the world economy during the financial year remained rather moderate, affected in particular by the weakness of both the Chinese economy (albeit with a rather volatile trend) and the European economy (which continued to feel the negative impact of the energy crisis accentuated by the implications of the Russian invasion of Ukraine). After slowing down in the final part of 2022, global growth accelerated significantly at the beginning of the year, thanks to the significant impact on economic activity in China of the rapid removal of Covid-19 mobility restrictions (restrictions that had weighed heavily on growth in the final quarter of last year). However, the pace of growth in the global economy slowed again in the second quarter in response to the marked (and largely unexpected) slowdown in activity in China, and then remained fairly subdued in the third quarter. In the US, on the other hand, growth remained rather buoyant and above potential throughout the period (and with a likely acceleration in the third quarter), despite the significant tightening of monetary policy. In the Euro Area, where growth had remained very robust until the summer of 2022, there was a sharp slowdown in economic activity in the two quarters at the turn of the new year (with a recession in Germany), but overall the economy withstood the huge terms of trade shock suffered in 2021 and 2022 with the surge in energy prices. The tensions in the banking system, which emerged in March in the US with the failure of Silicon Valley Bank and in Europe with the rescue of Credit Suisse (followed at the beginning of May by the bankruptcy of another US regional bank, First Republic) seem to have stabilized without a particularly significant negative impact on growth, also thanks to the intervention of the Fed which introduced a new financing program for banks (the Bank Term Funding Program). As was widely expected, inflation in advanced economies corrected from the highs reached in the course of 2022 over the period. This decline was relatively rapid with regard to total inflation, which benefited from the significant reduction in commodity prices (primarily energy). Core inflation (i.e. excluding food and energy) has also turned from the highs (reached only in March 2023 in the Eurozone), but has remained at levels still very far from the central banks' targets and does not yet signal, in the case of the Eurozone, a clear downward trend. In this scenario of growth that is overall quite resilient (and with indications coming from the labor market that have still been decidedly robust), the central banks of advanced economies (with the notable exception of Japan) have continued the restrictive monetary policies started during 2022, but moderating the extent of rate hikes between the end of 2022 and the beginning of 2023 and reporting first in the case of the Fed and then also in that of the ECB the proximity of the end of the restrictive cycle. In Japan, on the other hand, the BoJ has not made any significant changes to its monetary policy, but has cautiously initiated the strategy of exiting ultra-loose measures. On the other hand, the conduct of monetary policy in China was decidedly bucking the trend, with the PBoC taking cautiously expansionary measures (including two rate cuts) to respond to the unexpected slowdown in the economy.

In the US, economic activity continued to remain quite buoyant and GDP growth over the period remained consistently above potential, with a likely acceleration in the third quarter of 2023. Growth was mainly supported by private consumption, which recorded a decidedly lively trend both at the beginning of 2023 and in the summer. In turn, consumption growth continued to be supported by labour market conditions, which remained very solid throughout the period: the pace of employment growth, although gradually slowing, remained decidedly high and continued to signal conditions inconsistent with an entry of the economy into recession. The unemployment rate, which reached a cyclical low of 3.4% in the first part of 2023, also remained at historically very low levels throughout the period. The resilience of growth was called into question in March by the emergence of tensions in the banking system, with the sudden failure of Silicon Valley Bank and then, in early May, that of First Republic. In the following weeks, conditions in regional banks, the epicenter of the crisis, gradually stabilized, thanks also to the rapid intervention of the Fed, which prepared a new financing program for banks (the Bank Term Funding Program) with decidedly advantageous terms. The

tightening of credit conditions already appeared very marked even before the crisis of the regional banks and has been further accentuated with these tensions, but the impact on economic activity seems to have been rather limited. However, risks related to banking sector conditions have probably led the Fed to a more cautious stance: in early 2023 the central bank had in fact reduced the size of rate hikes, going from an increase of 50 bps in the December meeting (after the four increases of 75 bps decided between June and November 2022) to one of 25 bps in that of early February, and this pace of hikes had been then maintained in subsequent meetings in mid-March and early May. At this last meeting, the Fed clearly raised the possibility of a pause in the next meeting in June, in which rates did indeed remain on hold, but in which the resumption of hikes was envisaged in subsequent meetings (and, in particular, in the July meeting, in which rates were raised again by 25 bps).

In the Euro Area, economic activity remained very robust until the summer of 2022, despite the significant impact of the war in Ukraine. The consequent surge in energy prices, actually underway since the end of 2021 (and then accentuated by the implications of the Russian invasion of Ukraine), led to a sharp slowdown in economic activity in the two quarters between 2022 and 2023 (and a recession in Germany), but with an overall resilience of the economic system compared to the magnitude of the shock to the terms of trade. The winter was in fact characterized by exceptionally mild temperatures and the energy saving efforts of companies and households, combined with the wide availability of liquefied natural gas on international markets, facilitated a significant drop in the price of natural gas, which, in mid-2023, returned to levels not recorded since 2021. The most energy-intensive industrial sectors were thus able to restart production, after the sharp contraction in the second half of 2022. Other important elements of support came from the still accommodative fiscal policies and, above all, from the surprising strength of the labour market, with employment continuing to grow in the half-year. The resilience of the labour market, combined with the savings accumulated during the pandemic, in turn, has supported the recovery in service consumption since the spring. Indeed, the services sector showed greater dynamism during this period than the manufacturing sector, which was slowed down by the rebalancing in global demand for post-pandemic goods and a disappointing recovery in China. However, the recovery in economic activity in the spring was rather modest and growth stagnated in the early part of the summer. The fall in energy prices (which, since Spring, has been transmitted also to food goods) and the resolution of problems of malfunctioning of the supply chains, have also initiated a sharp decline in inflation which, from the peak of 10.6% in October 2022, fell to 5.2% in August. In contrast to total inflation, however, core inflation continued to rise in the first part of 2023 and even in the following months did not provide convincing signs that it had reached the cyclical peak. Core inflation ended the period at 5.3%, just below the all-time highs reached in March (5.7%). In view of this dynamic, as well as the significant wage increases observed year-to-date, and in light of the resilience of the economy to the energy shock, the ECB maintained an aggressive stance, with increases of 75 bps at its meetings in September and October 2022, a subsequent reduction in the magnitude of rate hikes (to 50 bps) at the three meetings from December to March and, finally, with three rate hikes of 25 bps between May and July.

In Asia, economic growth was impacted by the volatility of economic activity in China. Inflation remained subdued in some economies, while in others it slowed after central bank tightening. In China, economic activity, after the slowdown in the final part of 2022, positively surprised expectations in the first quarter of 2023, benefiting from the rapid (and largely unexpected) removal of the "zero tolerance" strategy to Covid-19 decided by the authorities in the final part of 2022. However, the positive effects of the reopening quickly petered out, leading to a significant slowdown in growth in the second quarter, with, in particular, renewed signs of weakness in the real estate sector, which were not decisively addressed by the authorities except with a series of measures taken at the end of August. Weak domestic demand also led monetary policy authorities to turn more loosely over the period, with two interest rate cuts in June and August. Inflation also continued to remain surprisingly low and even briefly negative during the summer. In Japan, growth accelerated during 2023, positively surprising expectations thanks to the recovery in domestic demand. Inflation has also accelerated significantly, especially in the core component (although remaining much lower than the levels reached in Europe and the US), but the BOJ has made only limited adjustments to its strategy of controlling the yield curve, first (unexpectedly) in December 2022 and then, after the inauguration of the new Ueda Governor, at the end of July 2023.

EQUITY MARKETS

During the financial year, equity markets recovered from the correction experienced during the first half of 2022. Volatility remained high during most of the financial year, with significant factor rotations driven by hedge fund positioning around Federal Reserve's periodic meetings and strong positive earnings surprises in the Technology sector. The default of SVB in the United States had a limited impact on the financial system, thanks to the prompt intervention of the Federal Reserve.

The price performance of the S&P 500 index, the most liquid and competitive stock market, was equal to 13.97% in US Dollars. As the US Dollar weakened from record lows, the performance in Euro was significantly lower, 5.72%. Considering the impact of dividends, the total return of the S&P 500 was equal to 15.92% in US Dollars and 7.52% in Euro respectively.

The recovery of the US was driven by the very good performance of Tech giants, such as Microsoft, Nvidia, Broadcom and Apple, all benefitting from the significant advancements in the field of generative artificial intelligence. The most notable gainer was Nvidia, thanks to its leadership in designing advanced Graphic Processing Units, a fundamental hardware component to accelerate large-data computations such as those required by generative artificial intelligence models.

The Japanese market was helped by the prosecution of monetary easing. The divergence with the ECB policy supported a strong depreciation of the Yen versus the Euro. While the Nikkei 225 price performance was slightly above that of the S&P 500 in local currency (+16.12% vs. 13.97%), the price return in Euro was only 2.68% (total return 5.03%).

During the same period, the Eurostoxx 50 index was the best performer amongst blue chip indices, with a price performance of +22.17% and a total return close to +27%. The result was supported by strong earnings in the banking sector, as well positive developments for the two major constituents of the index, ASML and LVMH. Looking at the overall performance of developed equity markets, the price performance of the MSCI World index for a Euro denominated investor was +5.42%, while the total return +7.82%. Emerging stock markets underperformed the most developed ones during the financial year. The MSCI All Country index, which include both developed and emerging countries, had a price performance of just 3.81% and a total return of 6.26%, as China's macroeconomic data continued to disappoint investors. In local currency, the total return of the CSI 300 index was in fact negative and equal to -5.33%.

FIXED INCOME MARKETS

Over the financial year all major developed markets Central Banks continued to raise interest rates to tame inflation. In that time, the Federal reserve raised the Fed Funds rate by a cumulative 300 basis points, the ECB hiked by 375 basis points and the Bank of England, where inflation became most elevated among G10 nations, by 350 basis points. Also, during 2023, the banks embarked on a quantitative tightening programme to reduce the size of their balance sheets. The exception has been Japan, where the BOJ continue with YCC after making an adjustment to the rate band only recently. The U.S ten-year treasury yield reached levels above 4.3% and real yields pushed 2% during the year. In Europe, German 10-year yield reached a high of 2.75% in March, while Italian ten year peaked at 4.8% last October. This aggressive monetary tightening has seen a pronounced reduction in inflation, but CPIs remain elevated and well in advance of Central Bank targets. Markets had hoped for an earlier conclusion to the global tightening cycle, but economic data has remained robust and employment metrics have held particularly well.

Market attempts to preempt the conclusion of the tightening cycle have proved premature. Also, the pricing of aggressive rate cuts in 2023 that were prevalent in March at the time of the U.S regional banking crisis, have proved to be overly optimistic. It appears likely that interest rates will remain higher for longer even if a pause

in policy is enacted. A pause may be coming as forward-looking data is softening as noted by recent PMI releases. Central bankers will have to decide whether to focus on above-target inflation, or whether they should ease up on rate hikes given the downturn in growth. However, the evolution of inflation and employment data will be key to determine if Central Banks can finally relax their aggressive tightening policies.

FOREIGN EXCHANGE MARKETS

The Euro started the financial year close to parity with the U.S dollar. The fact that the Federal Reserve initiated their hiking cycle in advance of the ECB, and that the size and pace of their action was greater than their European counterparts placed the USD on a sound footing. Continued interest rate differential widening and concerns about energy availability for Europe caused the Euro to dip to 0.96 as winter approached. As the ECB stepped up their fiscal response to inflation and as gas storage increased and a mild winter evolved, the Euro steadily rose and found a range between 1.06 and 1.12 for the past 6 months.

For most of the financial year, the Bank of Japan stuck doggedly to yield curve control, keeping rates stable while all other Central Banks rose rates around them. Anticipation of action in late 2022 helped support the Yen but inaction on the part of the BOJ saw the Yen weaken significantly in 2023. Despite recent widening of the yield curve control bands, the Yen still sits at the lows of the year, some 15% off its peak.

The Euro performed well against a large number of developed market currencies in the past year. Weakness in the price of mining commodities weakened the Australian dollar, while recession like data in New Zealand and the Scandinavian countries contributed to falls in the New Zealand dollar and both the Norwegian Krone and Swedish Krona.

It was more of a mixed picture in Emerging Markets' currency space. Central European currencies tended to outperform the single currency, with the Polish Zloty and the Czech Crown both gaining ground. The Turkish lira has endured a torrid time, depreciating rapidly in May after President Erdogan won reelection. In Asia, the vast majority of currencies weakened materially in the past year as local economies fared less favourably than their European and American counterparts. In Latin America, the Mexican Peso performed well while the Brazilian real was a slight underperformer.

FONDITALIA EURO CURRENCY

The Sub-Fund began the period defensively positioned as global central banks looked to continue with an aggressive hiking cycle in the face of a global growth slowdown and persistent rise in inflation. Through the latter part of the reporting period, a lower rates volatility environment coupled with an improving inflation backdrop and attractive valuations sentiment across credit markets improved.

At the beginning of the reporting period the Sub-Fund was allocated c. 65-70% government securities, 20-25% corporate securities and 10% cash.

With improving market sentiment, the Sub-Fund slowly added back risk across the corporate bucket and reduced exposure to government securities. Mostly through the new issue market and the Sub-Fund retained a bias for quality and a duration below 5.

The Sub-Fund finished the reporting period with an allocation of c. 50% government securities, 40-45% corporate securities and 5-10% cash.

The Sub-Fund maintained a low interest rate duration exposure through the reporting period ranging from 0-0.1. While spread duration began the period at c. 1.1 and steadily increased, as risk was added, to finish the period at 1.7.

The Sub-Fund benefited from roll down effect and carry across the portfolio.

The biggest detractor from performance during the period was due to the volatility initiated by the failure of some regional US banks and collapse of Credit Suisse. However, the Sub-Fund performed well in the aftermath, as the market saw a flight to quality.

Net total return for the period was 0.76%

The Sub-Fund expects to continue to benefit from carry across the high-quality portfolio while also selectively participating in the new issues market and extending spread duration.

FONDITALIA EURO BOND LONG TERM

During the past twelve months, the Sub-Fund has been invested in a wide variety of EU sovereign bond markets. At various times throughout the year, duration positions were taken across these markets. Tactical FX and Fixed Income future and option positions were also undertaken.

EU sovereign yields have continued to rise over the past 12 months as inflation has proved stubborn to extinguish. While it is hoped that tightening cycles are close to ending, stubborn inflation data may lead to a delay in unwinding prior hikes.

The Sub-Fund performance, like all long duration funds, was hindered by rising rates. The Sub-Fund delivered a net absolute and relative negative performance over the period. The long end of the European curves was particularly hard hit. Attempts to preempt a turn in the fixed income proved premature. In FX, GBP strength was a negative contributor.

The evolution of Inflation and Employment data will be scrutinised closely to determine if indeed the current hiking cycle may be ending. However, with those metrics at current underlying levels and QT continuing, the prospect of interest rates remaining higher for longer seems likely.

FONDITALIA BOND US PLUS

Over the 12-month period as of 31 August 2023 the Sub-Fund returned a negative performance in absolute terms and it underperformed its benchmark.

Positions within securitized credit, mainly via Agency MBS, European RMBS and high quality CLOs, as spreads generally tightened over the period. Security selection within the Investment Grade Financial sector and the High Yield Financial and Industrial sector, as spreads generally tightened over the period. Tactical curve positioning in the U.S., mainly via an underweight to the front-end and the belly of the curve maintained until May 2023, as yields broadly rose and underweight exposure to Japanese duration, as yields broadly rose. Security selection within the Investment Grade Industrial sector, and particularly within the Healthcare sector. Overweight exposure to Brazilian duration in the last quarter of 2022, as Brazilian rates broadly increased due to uncertainty surrounding the country's elections held in October and declarations of President-elect Lula; starting from February 2023, the Sub-Fund closed its overweight exposure as Brazilian yields broadly stabilized, with the central bank announcing the first rate cut in August. Exposure to U.S. TIPS, as breakeven inflation rates broadly decreased while nominal rates generally increased and positioning within Developed Markets' currencies, mostly through a long exposure to the Japanese Yen, as the currency depreciated against the U.S. Dollar over the period.

The Sub-Fund's headline duration is currently underweight vs. the benchmark (5.48yrs vs. 6.13yrs), given macro uncertainties and the continued increase in yields. The Sub-Fund is modestly overweight to U.S. duration versus the benchmark, gradually increasing the exposure in the last quarter; the overall underweight

position is primarily driven by short exposure to interest rates in Japan, although the Investment Manager continues to expect that the BOJ's Yield Curve Control program will likely be phased out. The Sub-Fund is long TIPs as valuations look more attractive. The Investment Manager is opportunistic in corporate credit seeking compelling name and sector exposure, preferring defensives over cyclicals and maintaining a preference for senior issues of global systemically important banks. The Sub-Fund is overweight agency MBS and favouring higher coupons thought to be less likely to be impacted by the Fed's balance sheet unwind. Agency MBS are AAA-rated assets that offer relatively attractive spread, high levels of resiliency and good liquidity. The Investment Manager also continues to prefer senior positions in mortgage credit given the inherent fundamental strength and de-leveraging nature of the asset. The Investment Manager remains tactical in currency exposures and is long selected developed market currencies, based on current valuations favouring G10 currencies (AUD and JPY) and is long a basket of EM Asia countries likely to benefit from China's re-opening (Indonesia and Thailand). The Sub-Fund is also long the Mexican Peso and Indian Rupee, as they remain supported by near-shoring and export growth. The Investment Manager uses a diversified basket of funding currencies consisting of USD and CAD, along with select Asian currencies and continues to seek overshoots/undershoots with better risk/reward properties.

FONDITALIA FLEXIBLE EMERGING MARKETS

During the reference period (year 2022/2023), the Sub-Fund performance was positive. Rising interest rates in US and the USD strength acted as a headwind for the Emerging market asset class together with the deepening of the housing market downturn in China. Persistent geopolitical tensions between US and China also played a role, keeping the Chinese equity risk premium elevated despite the earning recovery witnessed thanks to the reopening of the economy.

The Sub-Fund started the reference period with a net equity exposure of around 30% and it is now at 32%. The stock selection within the equity portfolio gave a positive contribution in absolute terms and relative to EM equity markets. The exposure towards Femsa in Mexico, Mitra Adiperkasa in Indonesia and Yduqus in Brazil were particularly rewarding. On the negative side, Chinese equities gave a negative contribution to the Sub-Fund performance and to a lower degree the south African stocks in the Sub-Fund did too.

The fixed income part of the portfolio was mainly invested in short duration bonds issued by developed and EM countries. The exposure to EM corporate bonds was further increased during the year and it is currently as follow: EM Sovereign Hard currency bond 24%, EM corporates in hard currency 11%, developed markets short term government bond 23%. The decision to keep a duration at around 2 years helped the Sub-Fund to limit the negative impact in terms of mark to mark from rising rates. The yield to maturity of the fixed income portfolio (Euro hedged) is currently above 5%. Also the decision to fully hedge any USD exposure vs the Euro was rewarding during the period.

The current portfolio construction is based on the view that an end to the tightening in global financial conditions is near. The long-term part of the curve is also starting to offer more interesting returns and the Sub-Fund is expected to marginally increase the duration of the portfolio if rates will continue to increase further. A slowdown of economic activity in US is still a real possibility and if it happens it will probably help reverse the USD strength of the last few years, possibly marking the beginning of a new bull market for emerging market equities. Evidence of a recession in US could bring some volatility in the short term. The Sub-Fund holds some out of the money put options on the major global equity indexes to manage the risk of a possible increase in volatility in the short term but the Sub-Fund manager sees the medium-term outlook for emerging markets as strong with many economies offering strong fundamentals in terms of fiscal and external balances and attractive valuations on the equity and fixed income markets. China represents both an opportunity and a risk and needs to be monitored closely.

FONDITALIA EURO BOND

During the past twelve months, the Sub-Fund has been invested in a wide variety of EU sovereign bond markets. At various times throughout the year, duration positions were taken across these markets. Tactical FX and Fixed Income future and option positions were also undertaken. EU sovereign yields have continued to rise over the past 12 months as inflation has proved stubborn to extinguish. While it is hoped that tightening cycles are close to ending, stubborn inflation data may lead to a delay in unwinding prior hikes. The Sub-Fund performance, like all long duration funds, was hindered by rising rates. The Sub-Fund delivered a net absolute and relative negative performance in the period. Attempts to preempt a turn in the fixed income proved premature. In FX, GBP strength was a negative contributor.

The evolution of Inflation and Employment data will be scrutinised closely to determine if indeed the current hiking cycle may be ending. However, with those metrics at current underlying levels and QT continuing, the prospect of interest rates remaining higher for longer seems likely.

FONDITALIA EQUITY ITALY

Last year was very positive for the Italian equity market that registered a very good performance; September was subdued and characterized by profit taking, but from mid-October on the market trend was very positive till July; then in August again some profit taking. The bond market has viewed a significative increase in the interest rate following a lot of increase from the ECB (there has been the quicker and most significative increase in rate since the launch of the euro), in an attempt to contain and reduce the inflation pressure. The macroeconomic situation remained positive with moderate growth even in a contest of higher interest rate. Only from the summer there has been sign of a bit economic slowdown.

During the period under observation the Sub-Fund experienced a good performance, and it outperformed its benchmark.

Over the year the asset allocation was slightly changed, depending on the market situation. Overall the Sub-Fund maintained an overweight in equity exposure relative to the benchmark since December till July, when the exposure was partially reduced.

The sector allocation changed very frequently, overall the Sub-Fund was overweight on energy and slightly underweight on consumer discretionary for all the period, even though these positions were modified several times. Exposures to utilities and financials also varied several times over the year in connection with the market movements and the expectation on inflation, interest rates, and the economy, but to sum up there has been an underexposure to the utility and overweight of the banks.

The outperformance is a result of both a positive stock selection and asset allocation contributions.

Expectations for the future remain moderately cautious awaiting the movement of the ECB. Recently there has been a macroeconomic slowdown and a negative revision of expectation of growth in a contest of high interest rate and stable inflation, at a level much higher than the ECB target. Thus, in this situation the market could remain volatile.

FONDITALIA EURO CORPORATE BOND

The Sub-Fund started this period defensively positioned just as the peak-inflation narrative took hold, triggering an aggressive rally in iTraxx and opening up a large negative basis against cash credit. Eventually, cash caught up and rallied consistently until the end of January 2023. In this backdrop, the Sub-Fund rotated positioning to net long in cash bonds that had lagged the macro rally, with a preference for banks over non-financials. This positioning remained until March when banking turmoil hit the market with the collapse of SVB and the takeover of CS by UBS. Given the sector specific nature of the volatility, the Sub-Fund rotated

positioning from banks into high quality non-financials as the market recovered. This rally from the March wides defined a range that still largely holds and the approach of the Sub-Fund ever since has been to actively trade this range, adding risk near the wides and reducing risk as spreads approach the tights.

Positive contributors to Sub-Fund performance came from long positioning throughout January, primarily in banks which outperformed at the time. Other positive contributions came from adding low-beta corporate paper at the wides (names such as Siemens, Nestle, Heineken) after the CS induced selloff in March and active trading of the well-defined range that has been in place ever since.

The largest detractors to performance were the defensive positioning in early October 2022 just as the peak inflation narrative began to take hold. The banking turmoil in March 2023 had a negative impact on Sub-Fund performance, with subordinated financials selling off aggressively. The Sub-Fund also had an underweight in CS seniors which rallied aggressively into the UBS curve after their takeover, further detracting from Sub-Fund performance. Total net absolute and relative return of the Sub-Fund for the year was negative.

The Sub-Fund is presently positioned long risk against its benchmark; however the plan is to remain nimble given the range bound environment IG credit has been in this year. The cash-CDS basis remains near the wides and the Sub-Fund is positioned to benefit if this closes as expected, especially given the market appears to be past the September supply peak.

FONDITALIA EQUITY EUROPE

During the reference period, the performance of the Sub-Fund Fonditalia Equity Europe was +10.71% (share class R), while that of its benchmark (MSCI Pan Euro) was equal to +11.08%. The Sub-Fund relative performance was negative by 0.37%.

Average cash level was 1% in the year vs an equity investment of 99%. Sector allocation was quite balanced during the period with an average overweight in Tech and Discretionary compensated by an underweight position in communication and staples. Energy and financial were played more tactically.

The Sub-Fund had a flattish performance in the first part of the year till December 2022 then outperformed in the first part of 2023 being exposed to quality growth stocks but then retraced gradually this outperformance during summer to end of August. The Sub-Fund under-performance can be traced back to the general equity investment style. The Sub-Fund is structurally exposed to quality-growth names, that in Europe have materially underperformed in the second part of the financial year.

The Sub-Fund was rebalanced in June 2023 with the aim to increase exposure to stock sensitive to inflation reduction expected to happen in the second half. By doing so the style bias of the Sub-Fund was increased and so was the active risk.

Market expectations for next year continue to remain uncertain but we are not far from the peak in interest rate cycle. Inflation, despite slowly, is progressively retracing and for 2024 is expected to be significantly lower. The risk of recession in Europe now appears to be modest. The Sub-Fund allocation will continue to be exposed to the factor believed to have more chances to outperform into next financial year.

FONDITALIA EQUITY USA BLUE CHIP

During the reference period, the performance of the Sub-Fund Fonditalia USA Blue Chip was +5.74% (share class R), while that of its benchmark (MSCI USA index in Euro) was equal to +5.47%.

The Sub-Fund outperformance was driven by stock selection in the Information Technology, Industrials and Communication Services sectors as well as a small overweight in the Information Technology Sector. This reflects the Sub-Fund's team efforts to find attractive opportunities in the sell-off last year particularly in areas

of the market with good medium-to-long term growth prospects, but which were hit by several temporary factors namely supply-chain constraints and a post-lockdown lull in demand for technology-related services. The fund's management team adopt a quality approach that should be source of positive excess returns over the medium-long term, by taking exposure to a diversified set of systematic risks. The strategy is supposed to work in efficient markets such as the US blue chip segment. Additional layers of discretionary choices are based on a mix of quantitative and qualitative analysis, aimed at exploiting temporary market inefficiencies.

FONDITALIA EQUITY JAPAN

During the reference period, the performance of the Sub-Fund Fonditalia Equity Japan was +5.10% (share class R), while that of its benchmark (MSCI Japan) was equal to +4.43%. The Sub-Fund relative performance was positive and equal to 0.67%.

The over-performance during the period was driven by the stock selection in Industrials and Information Technology sectors. On the other side, selection in Financials and Communications Services contributed negatively.

During the reference period, the Sub-Fund maintained an overweight to Utilities and Energy stocks, funded with a general underweight to Industrials and Consumer Discretionary sectors. As a result, the Sub-Fund maintained a more value-low multiples bias during the reference period.

FONDITALIA EQUITY PACIFIC EX JAPAN

During the reference period, the Sub-Fund had a negative absolute performance but a positive performance relative to the benchmark.

The Sub-Fund's outperformance was largely driven by bottom-up stock selection across markets.

An underweight to China had a positive contribution as the market was down significantly, but stock selection was the bigger contributor with Trip.com, Li Ning and Nio giving outperformance.

An overweight in some AI related names in Taiwan (Quanta and Wistron) also had a positive contribution. The outperformance in India was driven by consumer tech related exposure (Zomato, Make My trip) and underweights to the Adani Group.

The largest contributor on a stock specific basis was MAPI, an exclusive brand retailer in Indonesia which benefitted from a recovery in sales driving earnings and multiple rerating.

Countries that had the largest positive contribution were China and Taiwan. Singapore and Australia were top negative contributors.

At a stock level, MAPI, Posco Holdings and Quanta were the biggest stock contributors. China Longyuan, Sea and Hang Lung Properties were the biggest detractors. Consumer Discretionary and IT were the biggest contributors, while Energy and Communications were the biggest detractors.

The portfolio manager continues to be cautious about the lagged impact of higher rates on more leveraged economies and stocks. The manager will continue to focus on companies with strong balance sheets which are well placed to capitalise from a shift in positioning and fundamentals as interest rates peak out.

The Sub-Fund intends to remain underweight China until property sales stabilise and the economic recovery gains more visibility. The Sub-Fund remains positive on Indonesia and Philippines, where structural growth drivers should allow earnings to compound for companies with a strong market position.

The Sub-Fund will be selective in India given valuations are at a premium to emerging markets and is mindful of general elections in 2024 which could disappoint the market should there be any risk to policy continuity.

FONDITALIA GLOBAL

During the reference period, the performance of the Sub-Fund Fonditalia Global was 8.24%, while that of its benchmark was equal to 6.20%.

The Sub-Fund outperformed its benchmark by 2.04%. The main driver was the overweight to US technology stocks, implemented with several active positions in software and semiconductors highly exposed to the generative AI revolution, as well as selected high conviction positions in Europe, such as LVMH and Novo Nordisk. The Sub-Fund maintained an average overweight around 2% to the equity asset class, and a duration contribution in line with that of its benchmark.

The Sub-Fund's management team adopts a quality approach that should be source of positive excess returns over the medium-long term. The strategy is supposed to work in efficient markets such as the US blue chip segment, which is the primary component of developed equity markets. Additional layers of discretionary choices are based on a mix of quantitative and qualitative analysis, aimed at exploiting temporary market inefficiencies.

FONDITALIA EURO BOND DEFENSIVE

During the past twelve months, the Sub-Fund has been invested in a wide variety of EU sovereign bond markets. At various times throughout the year, duration positions were taken across these markets. Tactical FX and Fixed Income future and option positions were also undertaken.

EU sovereign yields have continued to rise over the past 12 months as inflation has proved stubborn to extinguish. While it is hoped that tightening cycles are close to ending, stubborn inflation data may lead to a delay in unwinding prior hikes.

The Sub-Fund performance, like all long duration funds, was hindered by rising rates. The Sub-Fund returned a negative net performance in absolute terms over the financial year and underperformed its benchmark.

The shorter duration profile of the Sub-Fund helped limit the negativity. However, attempts to preempt a turn in European fixed income markets proved premature. In FX, GBP strength was a negative contributor. The evolution of Inflation and Employment data will be scrutinised closely to determine if indeed the current hiking cycle may be ending. However, with those metrics at current underlying levels and QT continuing, the prospect of interest rates remaining higher for longer seems likely.

FONDITALIA BOND GLOBAL HIGH YIELD

The Sub-Fund returned a positive performance in absolute terms over the financial year, while it underperformed its benchmark.

An overweight and Security selection within the Technology (o/w Cloud Software Group) sector and an underweight to the Other Financials sector (u/w CIFI Holdings Group) and Automotive (u/w Jaguar) sectors were positive contributors over the period. The Sub-Fund's underweight to BB-rated credits was accretive to performance.

Exposure to the Wirelines sector (o/w Zayo) and sector allocation within the Banking (o/w Credit Suisse) sector detracted from performance. Moreover, an overweight exposure to select BBB-rated credits detracted.

One of the Sub-Fund's main positive contributors was security selection within the US, as the dispersion in sectors and ratings led to increased opportunities for strong credit selection and alpha generation. Decelerating Euro area data pertaining to stickier inflationary pressures and a more sanguine economic outlook, in addition to banking sector concerns have driven material market volatility YTD and have led Europe to underperform over the period.

The picture of the Global economy is growing ever more complex central banks try to tame persistent inflation while avoiding recession. However, pandemic-era distortions are creating an added challenge in grasping events compared to previous tightening cycles, muddying the signal from traditional end-of-cycle indicators, which have been flashing red but not yet delivered the much-anticipated downturn.

Europe shows value vs. the US given the strong resilience of the US economy which has led to credit spread tightening below historical averages YTD. Global tactical asset allocation moderately favours European risk over US risk due to current macroeconomic headwinds and the argument that US spreads may have limited room for further tightening given the prevailing risks/today's starting point.

The Investment Manager recognizes that incremental spread widening is certainly possible, even likely, but that where we stand today should still present long-term opportunity, they see more room for downside from here but think that the market should remain relatively well supported in the intermediate to long-term given the strong fundamental backdrop and attractiveness of coupons, yields and spreads near current levels. Although the HY market is presenting good value over the intermediate term, there are still numerous risk factors to keep an eye for such as the impact of structurally higher rates on the company balance sheets and uncertainty around near-term central bank activity.

The increasing divergence among sectors and industries offers improved opportunities for generating alpha. Given present market conditions, it's essential to adopt a cautious strategy while traversing the market terrain in the future, while also recognizing the correct areas to deploy risk. This market favours a flexible investing strategy and underscores the significance of favouring companies with feasible refinancing avenues, the ability to tap into diverse capital sources, and careful management of liquidity.

FONDITALIA EQUITY GLOBAL HIGH DIVIDEND

During the reference period, the performance of the Sub-Fund was +1.6%, while that of its benchmark (MSCI World High Dividend) was -0.21%. The Sub-Fund relative performance was positive and equal to +1.81%.

The Sub-Fund maintained a neutral sector allocation with a bias towards US equities. The over-performance during the period was driven by the stock selection, mainly from the Health Care, Financials and Consumer Discretionary sectors. On the other side, stock selection in Materials and Industrials sectors contributed negatively.

The Sub-Fund was managed during the year with a pure systematic strategy that privileges investment in quality stocks.

FONDITALIA BOND GLOBAL EMERGING MARKETS

The Sub-Fund slightly underperformed the benchmark over the period (net of fees) but delivered a net positive return due to three main factors:

- Going overweight spread duration in higher yielding countries post the widening of spreads in Q3 of 2022 and then again at the end of Q1 2023.
- Risk neutral relative value pair trades, which added approximately 25 basis points of additional performance over the period.
- Being short US rates duration, expressed via US Treasury futures.

Markets which the Sub-Fund was overweight and added most to the performance were El Salvador, Mozambique, Ghana, Senegal, Tunisia, Ivory Coast and Kenya. Detracting from the out-performance were underweights in China and South Africa, given concerns about economic sanctions.

Current positioning in the Sub-Fund is defensive. The Sub-Fund has an overweight in select high yield markets and is short primarily investment grade spread duration where spreads are at multi-year tights and appear to be pricing a very rosy economic outlook.

The Sub-Fund is now long US rate duration in the 5 year bucket, given attractive prospective real yields, slowing inflation and a view that more challenging economic conditions will be forthcoming in the US and globally (where they have already been challenging).

FONDITALIA EQUITY GLOBAL EMERGING MARKETS

During the reference period (year 2022/2023), the Sub-Fund performance was negative in absolute terms but positive relative to the benchmark. Rising interest rates in US and the USD strength acted as a headwind for the asset class together with the deepening of the housing market downturn in China. Persistent geopolitical tensions between US and China also played a role keeping the Chinese equity risk premium elevated despite the earnings recovery witnessed thanks to the reopening of the economy.

The Sub-Fund started the reference period fully invested and initially benefited from the overweight to Chinese equities that rebounded strongly when China decided to abandon the zero covid policy but underperformed when the rebound in economic activity in China started to lose momentum. Overall during the year the contribution to the relative performance of the Chinese portfolio was slightly negative.

The main positive contributor to the positive relative performance during the year was the Indian portfolio where the Sub-Fund benefited from having almost zero exposure to the Adani group companies. The underweight to Indian equities in the first half of the year was also rewarding as was the stock selection within the country. Positive contribution also came from the Sub-Fund's longstanding overweight to the Indonesian retailer Mitra Adiperkasa that gained almost 100% during the year. Finally, the Sub-Fund increased the exposure to Brazil in February and March and benefited from the strong outperformance of this market in the following months.

The current portfolio construction is based on the view that an end to the tightening in global financial conditions is near. A slowdown of economic activity in US is still a real possibility and if it happens it will probably help reverse the USD strength of the last few years, possibly marking the beginning of a new bull market for emerging market equities. Evidence of a recession in US could bring some volatility but the medium-term outlook for emerging markets is strong with many economies offering strong fundamentals in terms of fiscal and external balances and attractive valuations. China represents both an opportunity and a risk and needs to be monitored closely.

FONDITALIA ALLOCATION RISK OPTIMIZATION

During the reference period, the Sub-Fund net performance was negative in absolute terms.

Global equities rose across the 12-month period to the end of August 2023 in euro terms, although returns were held back by euro strength, as the currency rose by almost 8% against the US dollar. Stocks benefitted from resilient economic data and corporate earnings, despite ongoing monetary policy tightening designed to subdue inflationary pressures. Equities rose sharply in October and November 2022, boosted by hopes for less hawkish monetary policy amidst signs that inflation may have peaked. Despite a pullback in December, markets continued to rise in the first quarter of 2023, as a soft landing for most major economies began to appear more likely. US equities also posted healthy gains across the second quarter, when resilient economic

data balanced hawkish rhetoric from the US Federal Reserve. European stocks were broadly flat in this period amidst a more uncertain economic outlook.

Benchmark 10-year US Treasury yields rose across the period by 91 basis points (bps) to reach 4.26%, in response to tighter monetary policy. The two-year US Treasury yield also rose, reaching 4.87%, as the yield curve flattened and further inverted across the period. Elsewhere, German 10-year Bund yields also rose, to end the period close to 2.50%.

Global investment-grade corporate bonds lost ground during the period, affected by rising yields, although high-yield and emerging market (EM) debt both rose as spreads narrowed on resilient market sentiment.

Brent crude oil prices fell across the year, although they regained some of those losses during the final three months of the period. Prices fell to US\$74 per barrel in June 2023, before recovering to US\$89 per barrel at period-end, on supply concerns.

Following the acquisition of Legg Mason by Franklin Templeton in 2021, the Sub-Fund has continued to broaden the range of actively managed funds it invests in. During the year, the Sub-Fund added exposure to Western Asset Global Core Plus Bond Sub-Fund and Brandywine Global Fixed Income Absolute Return Fund. Elsewhere, the Sub-Fund added more direct exposure to developed market government bonds, including issues from Italy, the United Kingdom, Germany and Italy, as it took a more defensive approach to asset allocation. Exposure to Chinese sovereign bonds was eliminated as growth slowed in the country and economic risks increased.

Elsewhere, Sub-Fund holdings were further diversified with the addition of Amundi Bloomberg Equal-weight Commodity ex-Agriculture ETF and Lyxor US Curve Steepening 2-10 ETF. Environmental, social and governance (ESG) investing also became more prominent, with the addition of Franklin Euro Green Bond ETF and Franklin S&P 500 Paris Aligned Climate ETF. The Sub-Fund also increased equity exposure, holding small volumes of European, Japanese, US and EM stocks by period-end.

The Sub-Fund underperformed its benchmark during the year to 31 August 2023. Fixed income holdings were the main detractor from returns, particularly long-duration European government bonds, US Treasuries and Japanese government bonds, held back by rising rates. In contrast, short-duration bonds added value, as did high-yield credit during a period of narrowing spreads. The Sub-Fund's minimal allocation to equities had no significant effect on returns.

FONDITALIA EURO CYCLICALS

During the reference period, the performance of the Sub-Fund Fonditalia Euro Cyclical was +18.21%, while that of its benchmark (MSCI Cyclical EMU) was equal to +20.65%.

Given the significant concentration of the benchmark, which includes less than one hundred issuers, the Sub-Fund adopts a thematic approach to sector allocation and stock selection process within each sector based on structural catalyst, such as persistent supply-demand imbalances in the reference product market of a certain company.

A significant share of the under-performance was related to the underweight of LVMH, a portfolio choice imposed by ensuring compliance with regulatory constraint. As any other UCITs investment vehicle, the Sub-Fund maximum exposure to a single issuer is capped to 10% of the Net Asset Value. During the reference period, the Sub-Fund's benchmark exposure to LVMH was on average close to 12.8%, 2.8% above the maximum allowed by regulatory constraints. The resulting underweight in LVMH contributed -0.50% to the relative performance. The other active positions assumed to mitigate the previously mentioned underweight underperformed the reference sector (Consumer Discretionary), contributing -40 bps to the overall relative performance. The remainder of the under-performance was driven by stock selection in Industrials, with a negative impact from excluding poor ESG-rated companies, and overall sector allocation.

FONDITALIA GLOBAL INCOME

The Sub-Fund in the reference period had an overall balanced allocation keeping an overweight duration position alongside an overweight equity on the back of a constructive view on inflation and economic growth. Overweight duration oscillated between 1 to 1.5 years. Overweight equity touched a maximum of 10%.

With regards to currency exposure, the Sub-Fund hedged dynamically a significant portion of the USD exposure and held a position long JPY as a macro hedge with the aim also to benefit from a potential convergence of interest rates differentials.

Top contributors: US 2s10s steepener, short Eurostoxx with a focus on Banks, long EUR vs USD, long S&P 500 via options.

.
Top detractors: the overall long duration position and the long JPY, a tactical short on European Auto Sector
The Sub-Fund had a net performance of -3.22% compared to a performance of -2.74% of its benchmark.

The correlation bonds-stocks, turned positive in 2022, kept this sign also for most of the reference period acting overall as a headwind for multi-asset portfolios. The view of inflation normalizing quickly did not materialize because the economy resulted even stronger than what initially expected thanks to a very supportive global fiscal policy stance. As a result, the Sub-Fund suffered mainly on its fixed income exposures.

A very high level of real rates could be supportive for both risky assets and bonds. On the geopolitical front, rising tensions between different blocs warrant a prudent approach. Dislocations at sub-asset class level offer good return opportunities provided being able to sail through these volatile markets. The Sub-Fund will remain well diversified and with a long-term focus to make the most out of these opportunities.

FONDITALIA EURO EQUITY DEFENSIVE

During the reference period, the performance of the Sub-Fund Fonditalia Euro Equity Defensive was +8.65%, while that of its benchmark (MSCI Defensive EMU) was equal to +8.94%. The Sub-Fund under-performed its benchmark by 0.29%.

Given the significant concentration of the benchmark, which includes less than one hundred issuers, the Sub-Fund adopts a thematic approach to sector allocation and stock selection process within each sector based on structural catalyst, such as persistent supply-demand imbalances in the reference product market of a certain company.

The Sub-Fund underperformance was limited compared to the level of relative risk assumed, and mostly related to single stock decisions and portfolio construction, the latter being intended to ensure a systematic risk in line with that of the reference benchmark and avoid excessive risk at single stock level.

FONDITALIA EURO FINANCIALS

During the reference period, the performance of the Sub-Fund Fonditalia Euro Financials was +30.78%, while that of its benchmark (MSCI EMU Financials 10/40) was equal to +27.39%.

The Sub-Fund was invested in a concentrated portfolio to reflect the bottom-up stock selection process focusing on quality names offering a clear equity story and a healthy capital ratio. The investment process is based on a combination of quantitative and qualitative analysis to understand valuation metrics. Portfolio construction ensures an equal active risk distribution, limiting excessive factor and idiosyncratic risk exposure. Accordingly, the Sub-Fund was on average fully invested during the year, targeting a beta coefficient of one with respect to its benchmark.

Despite the collapse of SVB in the United States and the controversial UBS-Credit Suisse merger, the absolute performance during the reference period was above expectations. The aggressive monetary tightening campaign of the ECB boosted the net interest income of the banking sector, whose valuations are more sensitive to short-term economic results compared to other industries within and outside the financial sector. Selection in the banking industry was also the main driver of relative performance for the Sub-Fund.

FONDITALIA DYNAMIC ALLOCATION MULTI-ASSET

Over the 12-month period as of 31 August 2023 the Sub-Fund returned a net negative performance in absolute terms.

As detailed more granularly below, the Sub-Fund holds 5.1 years of duration with an average rating of AA. The duration component is primarily made up of high-quality duration (~2.0yrs in U.S., ~1.5yrs in the Eurozone, ~0.7yrs in Australia, ~0.6yrs in the U.K., ~0.2 in Canada). TIPS represent ~0.4yrs of overall duration. In terms of credit exposure, the bulk of exposure is to Investment Grade credit (~28%).

On a look through basis, the Sub-Fund holds a net equity exposure of ~21.7%, which has been gradually reduced over the year reaching a flat to negative exposure in April/May until June where it has been re-increased following a tactical strategy.

Long exposure to thematic equity baskets (mostly semiconductor, high quality and robotics). Long exposure to credit, more specifically Investment Grade credit as spreads narrowed over the period and exposure to selected EM currencies.

Hedges in U.S. and European equities via short exposure to broad market indices (S&P 500, Nasdaq, Eurostoxx 50) and long exposure to duration, in particular in the U.S., Australia and the U.K., as yields rose significantly over the period.

On the equities side, the net exposure now stands at ~21.7% vs ~4.5% as of end of August 2022; during the 12 months the Sub-Fund reached also a negative net equity exposure between March and May and then added in the last 2/3 months as a tactical strategy. Until May the Sub-Fund held short positions to U.S. equities and European equities, which have been switched into positive positions over the same regions in the last months (12.6% in US and 3.2 in Europe). The Sub-Fund reduced its long exposure to Japanese equities (to ~1.4%). Within the long thematic equity selection, The Investment Manager continue to maintain a preference for secular equity sectors, especially in alternative energy. In fixed income, the Investment Manager remains highly constructive on high quality fixed income and have increased portfolio duration to 5.1 years (from 2.9 years as of end of August 2022). The Team added to US and European duration and marginally also to the United Kingdom reflecting a defensive stance given the prospects of deteriorating economic conditions and recession. In terms of relative value, high quality credit now offers very attractive value vs equities when considered in the context of equity premium vs. IG yields. In IG credit, the Investment Manager focuses on short-dated bonds given attractive yield in the front-end of curves and have been active all year in gradually adding exposure there. The sub-fund has been increasing exposure to Agency MBS, with 20% in PMV terms, with a focus on higher coupon securities.

The Investment Manager seeks to balance near-term tailwinds from better-than-expected growth and steadfast labour markets with medium-term recession risks, which remain prevalent given tight financial conditions, a pullback in credit origination, and the anticipated lagged effects of monetary tightening. While resilient macro data has likely delayed the timing of recession and lessened its severity, the Investment Manager still expects a mild recession over the cyclical horizon. The resilient macroeconomic environment, falling equity market volatility, and a supportive corporate earnings backdrop reinforce a tactical constructiveness on equities. US equities delivered strong Q2 EPS beats and margin expansion, but valuations remain elevated, driven primarily by select mega-cap technology companies. As such, the Investment Manager maintains a neutral equity stance over a cyclical horizon and a preference for high quality fixed income, with exposures scaled to reflect a

“yellow traffic light,” late cycle macroeconomic environment, but they remain vigilant and ready to adjust the stance to a more defensive posture as the environment evolves.

FONDITALIA EURO YIELD PLUS

The Sub-Fund began the period defensively positioned as global central banks looked to continue with an aggressive hiking cycle in the face of a global growth slowdown and persistent rise in inflation. Through the latter part of the reporting period, a lower rates volatility environment coupled with an improving inflation backdrop and attractive valuations, sentiment across credit markets improved.

At the beginning of the reporting period the Sub-Fund was allocated c. 45% government securities, 45% corporate securities and 10% cash.

With improving market sentiment, the Sub-Fund slowly added back risk across the corporate bucket and reduced exposure to government securities. Mostly through the new issue market and the Sub-Fund retained a bias for quality and a duration below 5.

The Sub-Fund finished the reporting period with an allocation of c. 35% government securities, 60% corporate securities and 5% cash.

The Sub-Fund maintained a low interest rate duration exposure through the reporting period ranging from 0-0.2. While spread duration began the period at c. 1.1 and steadily increased, as risk was added, to finish the period at 1.7.

The Sub-Fund benefitted from roll down effect and carry across the portfolio.

The biggest detractor from performance during the period was due to the volatility initiated by the failure of some regional US banks and collapse of Credit Suisse. However, the Sub-Fund performed well in the aftermath, as the market saw a flight to quality.

Net total net return for the period was 0.68%.

The Sub-Fund expects to continue to benefit from carry across the high-quality portfolio while also selectively participating in the new issues market and extending spread duration.

FONDITALIA DYNAMIC NEW ALLOCATION

The Sub-Fund was actively managed to deal with changing market conditions and maintain a moderate level of risk (average ex-ante volatility in the range 6-6.3%, slightly higher than central target given expected normalization of market risk). Main exposures were equities (27-30%, including global regions and sectors) and bonds (46.5-53.5%, including China bonds, linkers and high yield) with a limited allocation to cash & ultrashort bonds (2.5-9%).

The Sub-Fund included a bucket of absolute return strategies, comprising a marginal allocation to gold and commodities, aiming to improve risk-adjusted returns through better diversification (overall allocation around 17.5% after sizable reduction in Q4 2022 in favour of ultrashort bonds on the back of more attractive cash yields).

ESG focus with a variety of approaches through underlying strategies (enhanced, SRI, quantitative, best-in-class, climate bonds) and portfolio MSCI ESG score in the range 6.5-6.8 (full A rating).

Modified duration remained broadly range bound between 3.2 years (end September 2022) and 2.8 (end of March 2023) and was then slightly progressively increased back to around 3 years at the end of the period, with a yield to worst that went up to 3%.

The main positive contributor was the allocation to equity strategies (especially on IT and financials sectors), also supported by the decision to hedge part of the US dollar exposure. The allocation to local currency emerging market debt, absolute return strategies and ultrashort bonds were also positive.

The fixed income allocation to US and global government bonds were the main detractors (impacted by the increase in bond yields), while on the equity side the worst performer was the allocation to China domestic shares. The exposure to commodities was also negative mostly due to the strong depreciation of oil.

The Sub-Fund recorded a slightly negative performance in absolute terms. The return was mainly driven by the exposure to traditional equity markets, which rebounded sharply from the end of October 2022. Asset allocation decisions, which were played tactically during the period, were mixed, with an overall positive contribution of macro positioning favouring equities vs bonds, but a negative impact from cross-sectional equity views (especially on China).

The total alpha generated by underlying strategies was slightly positive, mostly thanks to the good performance of the active manager in the world financials space, while average results from the platform were flat.

The absolute return bucket worked decently as a diversifier, maintaining a limited correlation to market movements, and strongly outperformed fixed income markets with comparable risk thanks to the underweight in duration, but was penalized by the allocation to commodities.

Globally, slower growth and inflation remains the baseline scenario. Lower inflation increases chances of an eventual soft landing, but in the near term increases real policy rates and hence overall policy tightness. An AI/energy transition led investment cycle is likely to partially compensate forthcoming weakness in consumer demand and non-strategic business investments. Below trend global growth is the central scenario for a few quarters. Central banks will remain insensitive to growth until labour markets shows clear signs of weakening or there is evidence that 2% inflation can coexist with a tight labour market.

Equity markets valuations (at least in relative terms to fixed income) do not offer the same tailwind typically present when nominal growth slows: preference for assets where there is potential for policy support. DM credit at risk in an environment where banks keep tightening lending standards and bankruptcies tick up. Uncertainty on US bonds: with data surprising on the upside lack of a catalyst to go long duration. More interest in UK Gilts, where slower nominal growth should bring yields marginally down in the next 6-12 months and potentially European bonds, on which ad addition will be considered. Planned further reduction in absolute return bucket favouring short duration fixed income given attractiveness of quasi cash yields.

FONDITALIA INFLATION LINKED

The Sub-Fund posted a negative performance in absolute and relative terms. During the past twelve months, the Sub-Fund has been invested in all the major sovereign inflation linked markets. At various times throughout the year, duration positions were taken across US, UK, EU, and Japanese markets. An overweight break-even position was undertaken across various tenors in the US, UK, and EU markets at varying times during the year. Tactical FX and Fixed Income future and option positions were also undertaken.

Inflation has continued to be a major theme in global fixed income markets over the past year. While CPI has dropped dramatically from its peak as Central Banks raised rates, inflation and core inflation have remained stubbornly high. Breakeven rates traded in fairly tight ranges throughout the year and while off their highs, they remain elevated.

The Sub-Fund performance, like all long duration funds, was hindered by rising rates. The holding of inflation linked bonds helped reduce the pain but the large increase in rates was by far the dominant driver.

Central bankers will have to decide whether to focus on above-target inflation, or whether they should ease up on rate hikes given the downturn in growth. However, the evolution of inflation and employment data will be key to determine if Central Banks can finally relax their aggressive tightening policies.

FONDITALIA CORE 1

The Sub-Fund in the reference period had an overall balanced allocation keeping an overweight duration position alongside an overweight equity on the back of a constructive view on inflation and economic growth. Overweight duration oscillated between 1 to 1.5 years. Overweight equity touched a maximum of 10%.

With regards to currency exposure, the Sub-Fund held a position long JPY as a macro hedge and with the aim to benefit from a potential convergence of interest rates differentials.

Mostly coming from tactical trades implemented throughout the period (ranging from long Nasdaq 100 to short BTP spread and long USD via options). Long US IG credit vs US Treasuries contributed positively as well.

The overall long duration position and the long JPY, a tactical short on European Auto Sector.

The Sub-Fund had a net performance of -3.33% compared to a performance of 0.61% of its benchmark.

The correlation bonds-stocks, turned positive in 2022, kept this sign also for most of the reference period acting overall as a headwind for multi-asset portfolios. The view of inflation normalizing quickly did not materialize because the economy resulted even stronger than what initially expected thanks to a very supportive global fiscal policy stance. As a result, the Sub-Fund suffered mainly on its fixed income exposures.

A very high level of real rates could be supportive for both risky assets and bonds. On the geopolitical front, rising tensions between different blocs warrant a prudent approach. Dislocations at sub-asset class level offer good return opportunities provided being able to sail through these volatile markets. The Sub-Fund will remain well diversified and with a long-term focus to make the most out of these opportunities.

FONDITALIA CORE 2

The Sub-Fund in the reference period had an overall balanced allocation keeping an overweight duration position alongside an overweight equity on the back of a constructive view on inflation and economic growth. Overweight duration oscillated between 1 to 1.5 years. Overweight equity touched a maximum of 10%.

With regards to currency exposure, the Sub-Fund held a position long JPY as a macro hedge and with the aim to benefit from a potential convergence of interest rates differentials.

Mostly coming from tactical trades implemented throughout the period (ranging from long Nasdaq 100 to short BTP spread and long USD via options). Long US IG credit vs US Treasuries contributed positively as well.

The overall long duration position and the long JPY, a tactical short on European Auto Sector.

The Sub-Fund had a performance of -1.31% compared to a performance of 2.67% of its benchmark.

The correlation bonds-stocks, turned positive in 2022, kept this sign also for most of the reference period acting overall as a headwind for multi-asset portfolios. The view of inflation normalizing quickly did not materialize because the economy resulted even stronger than what initially expected thanks to a very supportive global fiscal policy stance.

As a result, the Sub-Fund suffered mainly on its fixed income exposures.

A very high level of real rates could be supportive for both risky assets and bonds. On the geopolitical front, rising tensions between different blocs warrant a prudent approach. Dislocations at sub-asset class level offer good return opportunities provided being able to sail through these volatile markets. The Sub-Fund will remain well diversified and with a long-term focus to make the most out of these opportunities.

FONDITALIA CORE 3

The Sub-Fund in the reference period had an overall balanced allocation keeping an overweight duration position alongside an overweight equity on the back of a constructive view on inflation and economic growth. Overweight duration oscillated between 1 to 1.5 years. Overweight equity touched a maximum of 10%.

With regards to currency exposure, the Sub-Fund held a position long JPY as a macro hedge and with the aim to benefit from a potential convergence of interest rates differentials.

Mostly coming from tactical trades implemented throughout the period (ranging from long Nasdaq 100 to short BTP spread and long USD via options). Long US IG credit vs US Treasuries contributed positively as well.

The overall long duration position and the long JPY, a tactical short on European Auto Sector.

The Sub-Fund had a performance of -0.16% compared to a performance of 3.48% of its benchmark.

The correlation bonds-stocks, turned positive in 2022, kept this sign also for most of the reference period acting overall as a headwind for multi-asset portfolios. The view of inflation normalizing quickly did not materialize because the economy resulted even stronger than what initially expected thanks to a very supportive global fiscal policy stance.

As a result, the Sub-Fund suffered mainly on its fixed income exposures.

A very high level of real rates could be supportive for both risky assets and bonds. On the geopolitical front, rising tensions between different blocs warrant a prudent approach. Dislocations at sub-asset class level offer good return opportunities provided being able to sail through these volatile markets. The Sub-Fund will remain well diversified and with a long-term focus to make the most out of these opportunities.

FONDITALIA CROSS ASSET STYLE FACTOR

In absolute and relative terms the Sub-Fund returned a negative performance between September 2022 and August 2023. In the end of July 2023 the Sub-Fund was transformed in a relative performance product with multi asset benchmark composition.

The Sub-Fund was invested with positive duration oscillating between 0.5 and 1.5 years over the shadow benchmark, that later in the end of July became the Sub-Fund's relative performance reference index. The positive duration view was wrong and mainly contributed to the negative performance.

Equity exposure was in the range of 30% to 40%. The allocation in Japan and USA was successful and in Emerging Markets and Pacific Ex Japan was with negative contribution.

The Sub-Fund invested in factors, Quality and Growth were the biggest exposures. The specific investment themes remained Clean Energy and Water, Digital Security, Smart Cities, Semiconductors and Energy Infrastructure MLPs.

With regards to currency exposure, the Sub-Fund held a position long JPY as a hedge and for the biggest part of the period a long USD exposure.

FONDITALIA EQUITY INDIA

During the reference period, the Sub-Fund had a negative absolute performance and also slightly lagged its benchmark.

The Sub-Fund was marginally overweight versus the benchmark during the period which gave a slight negative contribution given the index was down in absolute terms.

The Sub-Fund had a quality/growth tilt, however stock specific issues caused the underperformance versus the benchmark.

The overweight to property stocks only started to contribute in second half of the reporting year and a key overweight in financials (HDFC Bank) didn't outperform as a merger with parent HDFC pushed out the recovery of profitability.

For ESG reasons, the Sub-Fund had to sell completely index heavyweight Larsen & Toubro which caused a negative contribution in the second half as the stock rose ~30%.

The Sub-Fund is also subject to long term capital gains tax of 12% which caused some negative contribution over the period.

The largest sector contributor was utilities and the largest sector detractor was industrials.

At the stock level, Adani Total Gas and Adani Transmission the top contributors while Larsen & Toubro and HDFC Bank the top detractors.

MSCI India is not at its peak premium to MSCI Emerging markets but it is still above the long term average premium.

This is reflecting a strong macro environment where top-down drivers such as corporate capex and housing/infrastructure spending are intact. This should support mid-teens earnings growth for the index for a number of years.

The portfolio stock selection is bottom-up driven, but the Sub-Fund intends to hold overweight positions in consumer tech, financials and property in companies which are well positioned to benefit from the strong demand environment.

The manager is cautious however about the risk of a political upset in the 2024 general elections. This could impact investor sentiment towards the market should there be any risk to policy continuity.

FONDITALIA EQUITY CHINA

During the reference period, the Sub-Fund performance was negative in absolute terms (-18.2%) while the benchmark was -16.6%.

China has been a poor performer over the period under review. Expectations of a much-improved consumption environment post the exit from Covid lockdown in November 2022 have been disappointed. The Chinese consumer seems reluctant to spend in view of the weak property market and high youth unemployment. With that said, the equity risk premium implied by current stock prices is at, or close to, thirty-year highs, Chinese money supply is growing at 11% YoY and has been a positive lead indicator in the past. Finally, whilst the market has been waiting in vain for significant fiscal stimulus, this could come at the time of the CPCC Plenum in late October 2023.

During the year the Sub-Fund changed lead PM which led to a slight change in the stock selection process with an increased tilt towards growth and momentum and high Return on Invested Capital (RoIC).

The fund's overweight position in Consumer Discretionary and Internet Verticals (classified under Communications Services) was the principal detractor to performance.

At a stock level the biggest winner was Miniso (+54bps), a consumer discretionary stock. The biggest detractor was Hesai Group (-78bps), the world's leading LiDAR company.

Despite the negative contribution so far, the detractors are all delivering strong growth, have leading market positions and have net cash balance sheets.

More recently, the Sub-Fund has reduced position sizing in view of the difficult market environment and continues to monitor the over and underweights closely in view of H1 2023 results. The Sub-Fund continues to overweight leading businesses exhibiting strong growth and net cash balance sheets. The Sub-Fund is currently 100% invested in Chinese equities with a slight bias (2.5%) in favour of China Onshore (i.e. A shares) versus China Offshore (HK and US listed). By sector, the Sub-Fund has an overweight bias in favour Consumer Discretionary at +7% versus benchmark and an underweight in financials (-4%). Half of the risk versus benchmark is idiosyncratic risk, i.e. stock specific. Of the remainder, by factor, the Sub-Fund has a bias in favour of Price Momentum, Size and Growth.

FONDITALIA EQUITY BRAZIL

During the reference period, the Sub-Fund performance was slightly negative in absolute terms but positive relative to the benchmark. The MSCI Brazil had a slightly negative performance measured in Euro over the time-period. Meanwhile, the local equity market posted a positive return, while the Brazilian Reais weakened slightly against the Euro. As regards sectors, Industrials and Materials were the best performers while the Consumer Discretionary and Healthcare sectors lagged.

Brazilian equity performance over the period were driven by political uncertainty, the direction of future interest rate policy (both domestically and globally) and signs of an economic rebound in China. From late Q2 2022 onwards, market volatility increased on concerns that the election of President Lula may lead to a more interventionist administration. Fortunately, the new administration turned out to be more moderate and pragmatic than expected, thereby leading to a market rebound in Q1 2023. In addition, the gradual improvement in domestic inflation from Q4 2022 allowed the Central Bank of Brazil to start cutting interest rates over the Summer of 2023, which was positive for the performance of rate sensitive domestic names, while materials and energy names also benefitted from the announcement of further stimulus measures in China.

From a portfolio construction perspective, the focus remained on choosing companies with strong bottom-up fundamentals, supported by an improving macro environment, while maintaining a diversified portfolio in line with stated risk parameters.

In terms of market exposure, the Sub-Fund was slightly over invested (around 101%) during H1 2023 as Brazil screened attractively from a valuation perspective. Turning to sector exposures, the Sub-Fund was overweight

industrials throughout the financial year, while maintaining an underweight in Utilities. Moreover, the Sub-Fund also maintained an overweight exposure to Financials and Consumer Discretionary names in advance of the first SELIC interest rates cuts by the Brazilian Central Bank (BCB) as inflationary pressures eased. Overall, the Sub-Fund was overweighted to quality domestic cyclical names with earnings recovery optionality, which would benefit from falling equity rate premiums as interest rates declined. In addition, the Sub-Fund also had some exposure to individual Consumer Staple and Healthcare names which were attractively valued. Overall, the Sub-Fund's absolute and relative performance compared to the benchmark was positive.

FONDITALIA FLEXIBLE ITALY

Last year was very positive for the Italian equity market that registered a very good performance; September was subdued and characterized by profit taking, but from mid-October on the market trend was very positive till July; then in August again some profit taking. The bond market has viewed a significative increase in the interest rate following a lot of increase from the ECB (there has been the quicker and most significative increase in rate since the launch of the euro), in an attempt to contain and reduce the inflation pressure. The macroeconomic situation remained positive with moderate growth even in a contest of higher interest rate. Only from the summer there has been sign of a bit economic slowdown.

The Sub-Fund experienced a good positive net performance during the period, especially in the second part of the year.

The Sub-Fund's exposure to equity market was increased since the end of the year 2022 in order to benefit of the good momentum; the bond segment was increased too, given the interesting yield on the bond side; the cash position was reduced a lot in order to increase the investment: it was invested also in very short terms bonds with interesting yields; in August the equity exposure was reduced a lot given the increase of uncertainty on the market.

The Sub-Fund realized a good performance in connection to both equity and bond market. The equity segment realized the biggest contribution to performance but also the bond component, given the increase in interest rate, gave the possibility to receive an important yield as coupon flow.

The largest contributor to the performance was the equity market, thanks to good stocks selections.

Expectations for the future remain moderately cautious awaiting the movement of the Ecb. Recently there has been a macroeconomic slowdown and a negative revision of expectation of growth in a contest of high interest rate and stable inflation, at a level much higher than the Ecb target. So in this situation the market could remain volatile.

FONDITALIA FLEXIBLE EUROPE

During the reference period, the absolute performance of the Sub-Fund Fonditalia Flexible Europe was +0.81%. The Sub-Fund has no benchmark.

The Sub-Fund maintained a neutral asset allocation, with a net equity exposure on average close to zero during the reference period and a marginal duration contribution. The long-end leg of the portfolio was invested in a basket of stocks selected through a disciplined bottom-up investment process, with a systematic tilt towards companies with better than average operating performances. To achieve a neutral asset allocation, the Sub-Fund maintained a short position on index futures.

Despite the negative contribution the hedging position built via index future, the performance was positive thanks to stock picking and bonds positioning.

FONDITALIA CORE BOND

Macro and political events have predominantly driven last year's markets. War in Ukraine, inflation, geopolitical tensions, supply chain constraints, and balance sheet run-offs from the central banks all contributed to a highly volatile de-risking environment for most traditional asset types.

During the year, the MSCI world equity index returned 22% whereas the 10 years treasury yield moved from 3.05% to 4.25% curbing a global selloff in fixed income products. The Global Commodities index (BCOM) sold off by about 15%, whereas the Dollar (DXY) sold off by about 4.5%.

The Investment Manager expects the last quarter of this year to show a lateral move with Central Banks reducing the pace of hikes and inflation slowly but steadily keep declining.

Overall, the Sub-Fund was always positioned conservatively and indicatively in line with the investment universe.

In Q4 2022 and January 2023 the positioning was more skewed toward a long allocation on US duration whereas February 2023 was a complicated month due to the sharp selloff in US rates. The banking crisis brought a positive price action in March and April whereas May was another negative month due to the long allocation on rates. Since then, the Sub-Fund did not have any meaningful impact from duration positions and movements.

On spread products the Sub-Fund maintained a neutral bias until the end of the 1st quarter 2023 where the allocation moved toward a positive territory benefiting the Sub-Fund; position closed at the end of Aug 2023. The Sub-Fund is now slightly defensive overall. It is positioned with a small underweight in spread and overweight 20 years Treasury via options and long 30 years BTPs.

The Sub-Fund posted a negative performance in absolute terms over the financial year. The 1Y official performance of Core Bond till the end of August 2023 is negative relative to the benchmark. This number reflects mainly the costs of the Sub-Fund and of the underlying products (TER). During the period the Sub-Fund performed in line with its peers with similar risks. The absolute loss is comparable to other funds in the fixed income / multi-assets space and reflects the challenges for long only fixed income products during the period.

FONDITALIA GLOBAL BOND

The Sub-Fund posted a net negative absolute performance over the financial year.

During the past twelve months, the Sub-Fund has been invested in an array of EM and DM Sovereign Fixed Income markets, as well as EM and DM FX. The Sub-Fund was also active in Emerging markets external debt. Global yields have continued to rise over the past 12 months as inflation has proved stubborn to extinguish. While it is hoped that tightening cycles are close to ending, stubborn inflation data may lead to a delay in unwinding prior hikes.

The Sub-Fund performance, like all long duration funds, was hindered by rising rates. However, the portfolio diversification in the emerging markets area and the alpha generation have provided a cushion for the overall performance.

The evolution of Inflation and Employment data will be scrutinised closely to determine if indeed the current hiking cycle may be ending. However, with those metrics at current underlying levels and QT continuing, the prospect of interest rates remaining higher for longer seems likely.

FONDITALIA ETHICAL INVESTMENT

The Sub-Fund posted a net negative absolute and relative performance over the financial year.

Fonditalia Ethical Investment was managed as a multi-asset Sub-Fund without a benchmark in 2022, with exposure to rates, credit, and equities. This was a particularly challenging year for fixed-income and equities and as such, Sub-Fund performance during this year was negative. The investment policy of the Sub-Fund was changed in 2023 and it is now managed against a benchmark of investment grade green corporate bonds and is entirely invested in credit under the management of the FAMI Credit Team. It has performed in line with its benchmark since the change in investment policy.

Positive contributors to Sub-Fund performance during 2023 came from active range trading of liquid, high quality real estate names such as Vonovia which comprise a large percentage of the benchmark. Other contributors came from selective participation in cheap primary deals which were allocated to the Sub-Fund in decent size. The largest negative detractors to Sub-Fund performance came from negative stories on single names such as Thames Water where the Sub-Fund was positioned small-long when speculation rose that the company would need to be taken into special administration.

The Sub-Fund is presently defensively positioned with a small-long in non-financials hedged with iTraxx main and a short in the banking and insurance sectors.

FONDITALIA GLOBAL CONVERTIBLES

Over the period the Sub-Fund delivered slightly negative net return underperforming its benchmark which gained around +1.7%. Market and regional attribution were positive contributors over the period while stock selection and sector attribution detracted.

At the end of the reporting period, the three largest overweights were Live Nation Entertainment, Splunk and Lenovo Group. Conversely, the three largest underweights were Safran, LG Chem and Interdigital.

On a regional and sector basis, the largest contribution came from positioning and stock selection in the US Technology and Utilities sectors as well as Asia-ex Japan Consumer Cyclical. Conversely, positioning and stock selection in EMEA Industrials and US Consumer Cyclical impacted returns.

On a single name basis, the top three contributors were On Semiconductor, Rivian Automotive and STM.

Conversely, the top three single name detractors to performance were Safran, Ivanhoe Mines and Wayfair. The Sub-Funds underperformance was predominantly driven by stock selection and sector attribution.

Global convertibles remain ahead of all other fixed-income assets in 2023, lagging only equities which have seen returns driven by a very narrow band of mega-cap names. The Investment Manager expects market returns to be more muted in the rest of the year as recession risks linger, though underlying equities of convertibles remain oversold versus equity markets providing attractive upside opportunities. Convertibles are well placed to outperform if markets decline from here, however, with the convexity of the asset class providing downside protection. Credit quality is generally good and valuations inexpensive versus historical levels.

In the primary market YTD issuance reached \$52bn through the end of August, well ahead of 2022 levels. With rates remaining elevated the Investment Manager believes this trend will continue, supported also by the HY maturity wall as CBS offer considerable interest savings to these firms.

FONDITALIA EMERGING MARKETS LOCAL CURRENCY BOND

Over the 12-month period as of 31 August 2023 the Sub-Fund returned a positive performance in absolute terms but it underperformed the benchmark for both the hedged and unhedged share classes.

Legacy positioning in Russian local duration, as these securities have experienced a gradual increase in price during the second part of last year due to increased demand for Russian bonds from entities which are not subject to western sanctions increased over the period. Underweight exposure to the Egyptian Pound, as the currency has been experiencing massive depreciation over these months, losing more than half its value during 2022 since Russia's invasion of Ukraine exposed vulnerabilities in the country's finances and still showing significant weaknesses. Overweight exposure to the Hungarian Forint, as the currency has been consistently appreciating over the year, as a result of the central bank's 500 bps emergency rate hike in mid-October, the weakening of the U.S. dollar, the fall in world natural gas prices and the favourable international sentiment.

Underweight positioning in Turkish local duration and in the Turkish Lira, as yields broadly rose over the year as a result of the central bank's prolonged restrictive policy to target inflation, and the currency experienced significant depreciation as a direct consequence of the country's volatility and political pressures following Erdogan's re-election. Underweight positioning in Thai local duration, as rates increased as a result of the restrictive policy implemented by the central bank, which raised its policy rate for the seventh consecutive meeting by 25 basis points in August, the highest in more than nine years. Tactical positioning in Colombian local duration, as yields broadly rose during last year until the beginning of 2023, and then stabilized following prolonged pressures from the government for the central bank to start cutting rates and overweight exposure to the Czech Koruna, as the currency appeared to follow a clear path of appreciation over the period, achieving its highest level versus the Euro since the summer of 2008 in February of this year.

Underweight positioning in Polish local duration, as yields broadly fell over the year (resulting in a surprisingly steep rate cut at the beginning of September). Overweight exposure to the Indonesian Rupiah, as the currency followed along a depreciation path over the period, driven by investors' bearish bets on most Asian currencies as a response to China's uncertain recovery. Overweight positioning in Mexican local duration, as yields broadly rose over the period following the central bank's restrictive interventions (even though benchmark rates have been kept on hold for the third time at the August meeting). Overweight exposure to the Argentinian Peso, as the currency has been suffering severe depreciation, fuelled by money-printing to finance a large government deficit; the central bank guided a sharp devaluation in mid-August, in the wake of a primary election upset (the Sub-Fund's overweight exposure was drastically reduced over these months and is now close to zero). Overweight positioning in South Korean local duration, as the central bank announced a prolonged series of rate hikes until January 2023 in order to tame inflation, while announcing the fifth pause in a row at the August meeting as inflation continues to ease and tactical exposure to Russian Ruble, which fluctuated over the period.

The Sub-Fund is currently overweight duration (5.33yrs) vs. the benchmark (5.07yrs). On the currency front, the Sub-Fund remains overweight to a basket of EM currencies (India, Mexico and Czech Republic are the largest over-weights) and remains underweight to New Zealand, South Africa and Singapore. Given the continued fall in headline EM inflation and growing concerns about China's slowdown, the Sub-Fund switched to overweight to EM local duration and to EM currencies. In local duration, the Sub-Fund increased exposure to high quality names like Thailand, Israel, Czech Republic and Peru, while reducing exposure to Brazil and Poland. In local currencies, the Sub-Fund increased exposure to the Mexican Peso, the Indian Rupee, the Czech Koruna and the Peruvian Sol, while trimming exposure to other currencies like the South African Rand, the Philippine Peso, the Malaysian Ringgit and the Hungarian Forint. Overall, the Sub-Fund favours local duration in countries with benign inflation, credible central banks and support from commodity gains (Brazil, South Africa). In addition, the Sub-Fund maintains exposure to cyclical EM currencies that cheapened on the recent volatility (Mexico).

FONDITALIA DIVERSIFIED REAL ASSET

The Sub-Fund in the reference period had an overall balanced allocation keeping an overweight duration position alongside an overweight equity on the back of a constructive view on inflation and economic growth. Overweight duration oscillated between 1 to 1.5 years. Overweight equity touched a maximum of 10%.

With regards to currency exposure, the Sub-Fund hedged dynamically a significant portion of the USD exposure and held a position long JPY as a macro hedge with the aim also to benefit from a potential convergence of interest rates differentials.

US 2s-10s steepened, short Eurostoxx with a focus on Banks, long EUR vs USD, long S&P 500 via options, dynamic exposure to BCOM realized with certificates.

The overall long duration position and the long JPY, a tactical short on European Auto Sector.

The Sub-Fund had a net performance of -6.01% compared to a performance of -7.26% of its benchmark.

The correlation bonds-stocks, turned positive in 2022, kept this sign also for most of the reference period acting overall as a headwind for multi-asset portfolios. The view of inflation normalizing quickly did not materialize because the economy resulted even stronger than what initially expected thanks to a very supportive global fiscal policy stance.

As a result, the Sub-Fund suffered mainly on its fixed income exposures but thanks to an active management of commodities exposures and equity exposures has been able to offset the losses and achieve a positive relative performance.

A very high level of real rates could be supportive for both risky assets and bonds. On the geopolitical front, rising tensions between different blocs warrant a prudent approach. Dislocations at sub-asset class level offer good return opportunities provided being able to sail through these volatile markets. The Sub-Fund will remain well diversified and with a long-term focus to make the most out of these opportunities

FONDITALIA BOND HIGH YIELD SHORT DURATION

The Sub-Fund posted a net positive performance in absolute terms over the financial year but lagged its reference index. Short duration high yield has underperformed the broader market in 2023 following a dramatic outperformance in 2022 due to the historic rise in interest rates. High yield, and risk assets more broadly, have performed well in 2023 as investors patiently wait for the pending recession as economic growth proved resilient, inflation abated and companies continued to post better than feared earnings. Through the end of August, broad market spreads were roughly 90bps tighter while yields were 0.5% lower, as the high yield market has absorbed the recent move higher in interest rates. Lower quality has drastically outperformed BBs and single-Bs year-to-date; consequently, the Sub-Fund has lagged the index and is now modestly underperforming over the trailing twelve months. Recall, the Sub-Fund outperformed the index in 2022 by over 200bps. For the trailing 12 months the Fonditalia High Yield Short Duration Sub-Fund returned +4.66% vs +4.93% for its benchmark.

The Sub-Fund has been managed since its inception in line with a short duration strategy; key objectives within the strategy are capital preservation, income, and reduced interest rate risk relative to the broad high yield and investment grade universes. In pursuit of these goals, the portfolio management team has maintained a lower risk portfolio that is underweight CCC & Lower credits through all parts of the market cycle.

The Sub-Fund underperformed its benchmark during the trailing 12 months. The Fund's underperformance was driven by security selection in the Aerospace/Defense, Leisure and Oil Field Services sectors. Specifically, overweights to Wesco Aircraft, Rite Aid and Altice as well as underweights to Carnival Corp and Transocean drove relative performance. Security selection in Pharmaceuticals, Healthcare and Technology led

the contributors. Specifically, overweights to Bausch Health and DISH Network as well as underweights to Diamond Sports, Party City and Lumen Technology all added to relative performance.

FONDITALIA CREDIT ABSOLUTE RETURN

The Sub-Fund posted a net positive performance in absolute terms over the financial year.

The Sub-Fund began the period with a short duration, highly granular portfolio with a material exposure to BBB/BB perpetual instruments such as corporate hybrids (14%) and bank Additional Tier 1 (AT1) securities (3.5%). The Sub-Fund has reduced granularity over the period from c.280-300 positions that had specifically focused on very short end (c.70% less than 18 month) to 160-190 positions with c.35% in <18month paper. The focus of the Sub-Fund has been on liquid Investment grade instruments and less than 10% sub investment grade. Interest rate risk has been closely managed in the Sub-Fund where duration has been kept around 0.2-0.3yrs for an extended period, however with the view of peak rates on the horizon, the Sub-Fund has been running a duration of 0.8-1yr since June 2023.

Exposure to Additional Tier 1 securities has sat in the range of 2%-6% at various times over the period (maximum limit 10%) and was defensive going into March 2023 when the effective failure of Credit Suisse (CS) materialised. Given the Sub-Fund's weighting to financials (range of 40%-50% throughout the year) the period saw increased volatility but then added core European banks on the back of the UBS takeover of CS at attractive levels which recovered negative performance in March. Corporate hybrids have reduced further as a part of the portfolio from 14% to the range of 5%-7%, mainly by natural attrition as investor friendly calls and/or attractive tenders took out low coupon issues with the Sub-Fund also being active on new issues with higher coupons. Total return for the Sub-Fund was 2.2% over the 12 month period.

Main contributors to the Sub-Fund's performance was the recovery of financials post the CS takeover and actively trading credit spread ranges within the IG grade corporate sectors. The rally from the March wades defined a range that still largely holds and the approach of the Sub-Fund has been to actively trade this range. The main detractors from performance have been specific to two real estate hybrid issuers that became the only issuers in the hybrid space not to call or replace their respective issuances and also threatened to suspend coupon payments. The Sub-Fund has exited these positions as the uncertainty around the issuers remains and questions over the real estate sector in a high interest rate environment remains elevated.

The Sub-Fund aims to keep a granular portfolio and remain disciplined in high grade, liquid issuers whilst being highly selective in perpetual bond issuances going forward. Repricing of the credit spectrum and a higher interest rate environment have made total returns in credit increasingly compelling over the medium term and dispersion across sectors has allowed for increased opportunities to create alpha.

FONDITALIA FINANCIAL CREDIT BOND

The Sub-Fund recorded a net positive performance in absolute terms over the financial year.

Performance in credit over 2022 was largely driven by central banks' hawkish stance in an effort to tame inflation, coupled with ongoing geopolitical uncertainty in Europe, prospects of gas and food shortages and recession fears.

September saw major disruptions to the Nord Stream gas pipelines and geopolitical tensions with Russia were ratcheted up another notch as Ukraine's swift counteroffensive led to a substantial reclamation of occupied territories before Putin responded with the annexation of four Russian-controlled regions, heightening concerns around nuclear escalation.

Unlike the previous quarters, 4Q22 saw a rally in risk assets, with inflation showing encouraging signs of peaking and the ECB and Fed stepping down to 50bps rate hikes at their respective meetings. That said, both central banks reiterated their hawkish stance and signaled further rate hikes in 2023 in an effort to tame

inflationary expectations, which tempered the tone of risk appetite into year end. Despite the hawkish moves, December marked the end of the only quarter in 2022 with broadly positive performance across assets.

March 2023 saw the end of a difficult quarter for the financial space globally as the risks linked to the rapid pace of central banks' rate hikes came to the fore. The flashpoint was the collapse of Silicon Valley Bank which suffered from extreme deposit flight after failing to follow through with a rights issue to mitigate a \$2bn loss from the disposal of \$21bn securities. This unveiled weaknesses across the US regional banking sector, in part due to regulatory changes a few years ago. In Europe, Credit Suisse was sold to UBS after suffering ongoing liquidity issues. As part of the sale, \$16bn of AT1s were entirely written off.

Calm was restored in April in both the European financial bond and equity markets. The publishing of the 1Q23 results further calmed frayed nerves as European banks beat estimates, printing record returns and demonstrating strong balance sheets. One of the clear positives was manageable sequential deposit outflows of less than 2%.

May started with renewed concerns around US regional banks and culminated in the acquisition of First Republic Bank by JP Morgan, subsequently followed by asset sales from another US regional, PacWest. Both events helped shore up confidence in the US financials' space.

In terms of primary deals, it is worth highlighting that capital issuance via both T2 and AT1 was ~ 50% higher in 1H23 compared to 1H22. Most notably in AT1s, in June we saw the first two deals since the CS event in March, including one from a small issuer that was more than 10x oversubscribed, confirming that the market is receptive to new deals if priced correctly. Financial assets largely rallied in July as another 25bps interest rate hike by the FED, ECB and BoE increased hopes that the peak in rates was closer. The biennial EBA stress test was largely a non-event and confirmed the resilience of European banks under hypothetical severe macroeconomic assumptions. Despite harsher scenarios used with respect to certain pressure points, leading European banks on average had lower core capital drawdowns than in the previous stress test conducted in 2021. Importantly, this drawdown was even better for historically weaker periphery banking entities as it came in on average at half the level of the 2021 exercise.

The debate of higher for longer was a dominant theme in August with the long-end of the US Treasury curve selling off and pushing yields to new year-to-date highs.

2Q23 earnings reached their conclusion for the European banking sector with the most eagerly awaited UBS closing out proceedings. UBS released its first set of numbers including Credit Suisse and eased concerns around the solvency of the combined entity, with both capital and leverage coming in ahead of expectations. Away from UBS, trends in key metrics unsurprisingly remained positive, with net interest income on average +30% year-on-year, loan loss provisioning lower to unchanged quarter-on-quarter, and a further 20bps sequential boost in core capital levels due to the better earnings.

Primary activity in August was subdued due to several factors, namely the uncertainty around higher for longer yields, c.75% of FY23 issuance having already been completed through July, and the seasonal peak summer effect. Interestingly, capital issuance YTD is running c.30% ahead of last year despite the Credit Suisse event in March; a few more AT1s were issued in August and the Investment Manager expects similar, if not more, into year-end as the asset class continues to attract new investors.

As of 31 August, the portfolio is diversified across 153 bonds and 45 issuers, with a focus on global systemically important banks and national champions like Intesa Sanpaolo, Santander, Barclays, UniCredit and Deutsche Bank. The portfolio average yield-to-call stands at 7.7%, yield-to-worst at 6.9% and duration at 3.9yrs with average credit rating of BBB. Focus remains on AT1 bonds, the highest yielding securities across the capital structure.

The names in the portfolio remain solid and yields stand at attractive levels relative to broader credit. Importantly, looking ahead to the rest of the year, central banks' hawkish stance on rates provides continued

support to the fundamental case for the sector. In terms of allocation, the higher spread (and yield) of capital instruments, combined with more subdued issuance plans vis-à-vis senior, means on a beta-adjusted basis they remain the preferred choice across the capital structure.

FONDITALIA CONSTANT RETURN

After four decades high inflation in 2022, key Central Banks implemented their fastest interest rates hikes policy ever to tame it throughout the year of 2023. In the meantime, investors' fast-growing optimism around AI development since the beginning of the year, led to a historically narrow rally buoyed-up by 10 mega-cap IT names, which dominated the narratives for equity markets.

In this environment, the Sub-Fund delivered a net positive performance of +1.1%, partially capturing the equity markets' rally.

The equity markets rebounded strongly over the period, but on a historically narrow base as the prominent style rotation toward Growth and Quality going into 2023 was essentially driven by the 10 biggest mega-caps rallying due to P/E expansion and not by a favourable earnings development. As the Sub-Fund relies on its pure bottom-up process focused on stable/low risk/low beta fundamentals, it was not exposed to the most expansive and unstable ones. Consequently, it only captured a portion of equity markets' rally, meanwhile the Sub-Fund's Stable/Low Risk Equities managed to be the largest contributors, mainly coming from both DM Equity Beta and DM Low Risk Anomaly.

On the fixed income side, yield curves have been inverted on both sides of the Atlantic, with government bonds' yields spiking throughout 2023. The Sub-Fund's exposure to duration has detracted the most from performance, especially as its long exposure to US Treasuries has been hurt by the Fed's fastest interest rates' hike ever, which made them unattractive for investors. While the exposure to Credit posted a gain as spreads tightened across most segments, with the high yield one outperforming.

The Sub-Fund was also impacted by its FX Valuation & Quality strategy. Indeed, its defensive nature has been penalized by risky assets' rally, as the strategy exploits FX alternative risk premia by implementing a long sleeve in defensive and high-quality G10 currencies versus more cyclical peers, as the USD or JPY, which underperformed EUR or CAD, among G10 commodity-linked currencies on which are part of the short.

During the period under consideration, the Sub-Fund did not experience any major structural changes beyond minor adjustments, such as slight increase in DM Low Risk Anomaly, FX Valuation & Quality and Global Stocks Beta, while a small decrease in its Cross Assets Anti Beta strategy. With the combination of risk-balanced approach and the composition of the equity allocation, it is still expected that the Sub-Fund will continue to benefit from a relatively smaller exposure to future downside risk compared to the broader market in case of continued uncertainty and volatility in financial markets. Finally, in a context of rising uncertainties, the use of internally developed proprietary defensive return drivers - which are less dependent on absolute yields' levels - allows to run the Sub-Fund with low duration, while also keeping the balance within the portfolio.

FONDITALIA MORGAN STANLEY BALANCED RISK ALLOCATION

For the year, the net return for the Sub-Fund was +1.43%. During this period, global equities had a positive performance with the MSCI All Country World Index up by around 6% (EUR) whilst fixed income market performance was negative, declining more than -2% (EUR) as measured by the Bloomberg Barclays Euro Aggregate Index.

As of 31 August 2023, the Sub-Fund had an overall equity exposure of 43.0%, 56.6% in fixed income and 0.4% in short-term maturity bonds and cash. Average weights over the year were 36.9%, 51.8% and 11.4% respectively.

The top contributors for the period were S&P 500 Futures (1.20%), Nikkei Futures (1.15%) and Euro Stoxx 50 Futures (1.12%). The top detractors were Global Aggregate Treasury Bonds (-1.45%), iShares US Corporate Bond ETF (-0.35%) and Short Term (1-3 Year) US Government Bonds (-0.32%).

After starting the year cautiously positioned, exposure to risk assets was increased since the end of December, to ensure the Sub-Fund stayed in line with its volatility target, with market volatility broadly subdued. Cognisant that the environment could turn, for instance should inflation pick up again, fixed income duration was kept on the low side whilst emphasis was placed on high carry assets in fixed income and in equities, such as banks and energy.

The Investment Manager is positive on equities as a hard landing is not the base case and the economy continues to find sources of support i.e., Artificial Intelligence investment, labour market resilience. The Sub-Fund also aims to maintain exposure to segments of the market that have lagged the recent rally, as they could catch up on the back of better-than-expected data.

On a regional basis, the Investment Manager prefers US over Europe due to the strength in the labour market, while corporate profit margin weakness is troughing and rebounding. Fundamental momentum is also shifting in favour of US equities and away from Eurozone equities.

The Investment Manager is also positive on Japanese equities as there is room for profit margins to recover as production recovers, supply-chain bottlenecks ease and raw material prices normalise. The Sub-Fund moved negative towards China equities as structural issues make a stimulus-led rebound harder to achieve this time. Earnings trend has been stagnant since 2013 and structurally declining since 2018, which is hard to reverse with macro headwinds intensifying. Additionally, deflating of the housing bubble could lead to wealth destruction and growth drag for years.

With respect to fixed income, the Investment Manager continues to prefer to carry over duration and moved from neutral to underweight USD Investment Grade credit, on lingering duration. The prospect of a soft landing and attractive all-in yields should further support risk appetite for IG credit. The Investment Manager moved from positive to neutral EUR IG, as they prefer its shorter duration compared with USD IG.

The Investment Manager remains cautious and balanced rather than defensive in the positioning, as they believe a slowdown in economic activity and a reduction in longer-term inflation risks are beneficial in the long run.

FONDITALIA OBIETTIVO 2023

The Sub-Fund delivered a net positive performance in the financial year, earning coupon in all but the period's first month. After significant fixed income market turbulence in the prior financial year caused by global central bank rate challenges not seen in a generation, the Fund's quiet and steady performance in the current financial year was most welcomed. While fixed income markets continued to face rates pressure through the period, the very short duration posture proved insulating as the Sub-Fund has been maturing and, therefore, monetized.

Regionally, the portfolio earned the lion's share of its income in Western European holdings which, throughout the year, averaged 57% of the portfolio and produced a somewhat above average return. Outside of Western Europe, a small Asian allocation led returns, while the US exposure also punched above its weight. No regions declined.

From an industry perspective, all sectors returned positively with contributions led by holdings in the portfolio's bigger sectors including automotives and auto parts (+56 bps), sovereigns used to help keep the portfolio invested as corporate positions mature (+54 bps), diversified financial services (+43 bps), and food & drug retail (35 bps). Laggards included building materials, consumer-products, and insurance, each of which contributed just 1 basis point.

Looking forward, the Sub-Fund appears to have largely a coupon-clipping immediate future as the Sub-Fund largely holds yielding, high-quality, short duration government bonds.

FONDITALIA OBIETTIVO EMERGENTI

The Sub-Fund is managed by Abrdn in the Emerging Markets space. It was launched in October 2017 and reached its natural maturity on 7 November 2022, even if the formal closure occurred on 31 March 2023, due to some delay in obtaining the merger plan authorization from CSSF.

So, the period going from 30 September to 7 November represented the latest period of active management of the Sub-Fund. After that Abrdn proceeded to the progressive investments of remaining assets into developed market bonds, money market instruments, and other equivalent short-term instrument (such as German bund with a very short maturity), seeking to consolidate the achieved performance. As a consequence, the portfolio asset allocation in the last part of its life was not in line with the benchmark of the Sub-Fund set in the Prospectus.

The performance registered in the above period was negative, due to various factors: the ongoing monetary policy tightening conducted by central banks around the world, the continue zero covid policy implemented by CHINA (that caused disruptions in the supply chains) and the Russia's ongoing war with Ukraine, that maintained high energy prices.

All of this had a negative effect on EM markets for both bonds and equities, resulting in negative returns for the fund.

In addition, the Sub-Fund never received the proceeds of a position in Alfa bank's bond which matured in August 2022, due to sanctions introduced by OFAC that prevented both the Russian government and the corporates from paying bond holders, and it had to face the default and subsequent restricting of the Ukraine sovereign bonds, resulting in all the government bonds having their maturities extended by two years and a moratorium on the coupon payments for two years as well. This was very unfortunate for the Sub-Fund as the Ukraine sovereign bond, the Sub-Fund held, was due to mature in September 2022. The vast majority of the remaining bonds on the portfolio remained stable over the period, due them all being close to maturity with prices oscillated around par, and Abrdn progressively converted them in money markets funds as stated in the prospectus.

So, in the end, the Sub-Fund was unable to generate that positive return that it expected to provide, at its launch.

FONDITALIA OPPORTUNITIES DIVERSIFIED INCOME

After a highly volatile September, which saw a ramping up in terminal rate expectations and the announcement that Russia intended to cut off gas flow via the Nord Stream pipeline, the last quarter of 2022 saw an improvement in sentiment and a broad risk rally into the end of the year.

The market received some clarity on a number of issues which had driven the volatility through the year. Inflation, which had beaten expectations almost every month since the end of 2021, started to weaken, and with that came better visibility on the reaction function of central banks and where rates were going to end up. European economies, aided by an unusually warm winter, navigated the loss of Russian gas well and with it came significant upgrades to European growth. In addition, China's long held "zero-covid" policy was finally dropped after that country's Party Congress.

As a result, the final quarter of 2022 saw a reversal in the large increases in government bond curves which the market had seen in previous quarters (10yr Treasury's, after peaking at 4.25% in October, fell to below 3.5% by the middle of December), and with better growth forecasts (and lower yields), came strong

performance across equity and credit markets (European high yield returned approximately 5% in the quarter and GBP high yield approximately 10%), although 2022 ultimately remained a very weak year for financial markets. 2023, however, began with some of the highest starting yields in over a decade. Attractive valuations and light positioning (high cash balances and positive Sub-Fund flows), continued to drive markets tighter at the beginning of the year. The new issue market, which had remained dormant for much of 2022, began to open up in December and in the beginning of 2023, particularly in the investment grade space. This was very well received by markets, with many books being substantially oversubscribed. Strong performance continued through January, although it started to weaken at the end of February after a higher inflation print out of the US and tentative signs that the extraordinary number of hikes which the central banks had pushed through the system over the past 12 months were beginning to have an impact on the real economy. March saw a US regional bank crisis when Silicon Valley Bank was seized by the Californian authorities. The bank appeared to have faced unique circumstances of poor risk management, a low level of insured deposits, very large deposit outflows and a very large concentration in long dated Treasuries, held with unrealised losses.

Although there was very little read-across to European banks, they nevertheless suffered contagion, and spreads began to widen across the capital structure. Credit Suisse was caught by the negative sentiment which, after a couple of years in the headlines, had begun its restructuring plan in Q4 2022. The Silicon Valley Bank story came at the worst time for Credit Suisse leading to large deposit withdrawals which eventually led the Swiss regulator to contentiously deem the bank to be non-viable. Additionally, the Swiss regulator's hugely controversial subordination of AT1s below equity holders meant that this sector saw a lot of volatility in March. The European and UK rejection of the Swiss regulator's approach comforted the market with ECB President Christine Lagarde adding: "Switzerland does not set standards in Europe". These statements led to a sharp rebound in Euro and UK bank debt, with Swiss banks unsurprisingly lagging.

May saw fears of the regional banking crisis heighten again. The month began with a deal being brokered for JP Morgan to buy the struggling US regional bank, First Republic. This led to the shares of other regional banks falling sharply in the following days. With fear that the headlines could become a self-fulfilling prophecy, the 10-year US Treasury rallied. However, updates from regional banks announcing new net inflows helped turn the momentum and share prices began to rebound. The ongoing issue throughout May of the US debt ceiling caused alarm to the market. With Treasury Secretary Yellen warning that the debt ceiling could be hit by the beginning of June, the market was closely following the negotiations between President Biden and House Speaker McCarthy. As these soured in the middle of the month, the June 2023 Treasury bill spiked to 5.40% as market participants questioned whether the US Government might default or delay its due payments. Biden and McCarthy eventually came to an agreement at the end of the month which will see fiscal spending reduced by USD 64bn in 2024.

Credit continued to rally through the first months of summer, with still strong fundamentals combining with inflation data in the US that had started to improve. Core inflation printed on a month-on-month basis at 0.16%, which was the lowest reading in over two years, and labour market data remained robust.

The soft-landing narrative had been a key driver of risk sentiment through July, with the FED announcing that they no longer expect a recession and driving up their estimates of GDP growth. This improved outlook for the US economy was confirmed with a stronger than expected GDP print (+2.4% against 1.8% expected). The strong labour data initially pushed the yield on the US 10-year Treasury higher, breaking 4%, to 4.06% from 3.84%. Inflation data then reversed that initial move, and the US 10-year then returned to a yield of 3.75%. Good economic data along with improving market sentiment led to an increase in yields in the later part of the month, the 10-year yield closing July at 3.96%. The trend was similar across the curve of major economies. Notably, the rates sell-off at the beginning of July led 10-year gilt yields to reach 4.67%, a level not reached since 2008 – although the much better inflation data in the UK meant that gilts actually outperformed on the month.

The strength seen in equity and credit markets through most of the summer softened slightly as moved into August, with 10-year Treasury yields rising rapidly in the opening of the month. This was as the US Treasury announced a schedule of greater-than-expected supply, the country was surprisingly downgraded by Fitch

(AAA to AA+), and the ADP payroll number came in significantly above expectations, helping to drive 10 year USTs to a new cycle high of 4.36% on 22 August before falling into month with a less-hawkish Jackson Hole speech from Jerome Powell and softer economic data out of Europe helping the move lower.

The Sub-Fund has returned a net performance of around 0.2% in the reporting period.

Performance has been driven in particular by its exposure to CLOs, which saw a net return of 17.49% during the period, as well as US and European High Yield, which returned 7.94% and 5.49% respectively, offset by weakness in financials (AT1s -2.25% for the period) and government bonds (-2.58%). From a quarter by quarter basis, returns were weak in September 2022 as recession fears were climbing and Russia announced that they were going to shut gas flow off into Europe, before rebounding strongly into calendar year-end and continuing for the first two months of 2023. March 2023 performance was weak given the volatility seen in the financial sectors and the fund's exposure to the space, although the fund's exposure to government bonds helped mitigate some of this weakness in the month and points to the balance within the portfolio. Financials, and in particular AT1s, performed strongly in the months following March, pointing to the market's view that the write-down of Credit Suisse was idiosyncratic in nature, although the sector was slightly down slightly for the full year, albeit ending August with very attractive all-in yields.

From a portfolio perspective, the managers have significantly de-risked the portfolio over the past year. The funds exposure to non-financial high yield (US plus European high yield) has fallen from approximately 33% to below 15%, whilst the funds exposure to government bonds has increased by almost 8%, from 17% to 25%, and the funds exposure to non-financial investment grade has increased from 1% to almost 6%.

The outlook for fixed income over the medium term remains positive given attractive all-in yields, and the opportunity cost of not being invested in credit at these levels is high.

The team's base case is for a mild recession across the US, Europe and the UK, and they expect rates volatility to decline as central banks move through the peak in policy rates, which they expect will happen in the fourth quarter of this year. The key focus for the market (and for the central banks) is understanding the data and how it shapes the direction of policy, so the team will be focused on labour and growth data in the coming months to sharpen their view on the economy, as well as continuing the up-in-quality move within credit.

FONDITALIA EURIZON COLLECTION 2023

The Sub-Fund returned a positive net performance over the one-year review period.

The financial year has been characterized by the prosecution of the strongest tightening cycle ever faced by market participants. The tightening cycle added another 250/300bps on average over the 12 months, pushing global yields higher, especially in the front ends of the term structures. The resilience of the developed market economies, especially in US, surprised markets that had to adjust their forecast, in particular over the job market and the speed of the trend in disinflation. By September 2023, the market is still arguing rather a peak in rate has been reached and if the Soft Landing in the economies will be reached or avoided. During the financial year the overall allocation observed a de-risking trend in line with the July deadline of the investment period. Hence from the average of the previous year, where the bond contribution has been mainly composed by 15% of corporate bond, with 12% circa of IG and 3% circa of HY, an exposure to emerging markets bonds around 5% in hard currency and an exposure to securitized bonds (5%) by investing in a specialized in-house fund, these investments have been gradually divested during the course of the first and second quarter of 2023. The duration exposure, which was driven on average by the exposures to German and US core government bonds has been gradually reduced, from the average exposure of 3.5y towards 0.1, comprised in September of money market instruments.

Given the significant correction of equity prices near the end of the previous financial year, the equity valuation had become less expensive and so the equity allocation at the beginning of the period was at about

38%. Later, during the financial year, equity prices recovered, the equity valuation had become more expensive and so the equity allocation was gradually decreased at about 34% in June. In July, after the maturity date of the fund, the Investment Manager reduced by half the equity exposure and then converted all the equity position into cash in a second step. The sectors with the highest active weight were industrials and consumer staples, the sectors with lower active weight were Energy, Financials and IT.

Positive contribution emerged from the equity allocations, whilst the bond component had negative returns. Main detractors were the core duration exposures, both in US and Eurozone, while spread corporates and emerging markets were marginally negative factors. Neutral the contributions to performance from the currency overlay. The most positive contribution in the equity portfolio was due to the overweight in the Industrial sector.

The performance of the Sub-Fund has been positive over the referring period. The extraordinary tightening cycle continued its bearish impact on global fixed markets in 2023, keeping market volatility at levels 2x/3x that of 2021. The increasing terminal rate of Central Banks, driven by the unexpected economic resilience, pushed core rates higher in 2023, detracting performance from the duration exposure of the Sub-Fund in both EUR and USD exposures. The most negative contribution in the equity portfolio was due to the underperformance of equal weighted indexes vs market cap weighted indexes during this financial year. The equity portfolio is equal-weighted and has been penalized by the huge overperformance of a few mega caps (mainly involved in AI business).

The Sub-Fund has converted all equity and bond positions into cash: that was not due to a very bad market expectation, but only to protect the overall positive performance since inception of the Sub-Fund. The portfolio ended its investment period.

FONDITALIA INCOME MIX

At the start of the review period the Sub-Fund's equity exposure (including derivatives) was around 23%. This was trimmed back to 17% by 31 August 2023. The Fund's bond exposure approximately 14% is allocated to developed market government bonds. There are further allocations to non-financial corporates including 21% in investment grade and 10% in high yield. This is compared to 14% for investment grade and 12% for high yield at the start of the review period.

Around 12% is held in financials, mainly subordinated bank instruments which is up from 8%. The Fund's bond exposure is focused on corporate bonds, typically high yield and higher yielding investment grade. Within the equity allocation, the focus is on high-quality companies with strong balance sheets, healthy free cash flow generation and good management teams that are committed to and capable of returning that cash flow to shareholders where appropriate. Modified duration (sensitivity to interest rate changes) increased from 3.2 to 4.9.

Top 3 contributors: Unicredit +84.5bps, Verallia +62.3bps and 3i Group +51.5bps.

Bottom 3 contributors: American Tower -26.5bps, Link REIT -16.5bps and Treasury Inflation-Protection Security (TIPS) (Coupon 0.25) -14.1bps.

The Sub-Fund returned a positive net performance over the one-year review period.

Equities contributed the most to performance. Moderating inflation and positive economic data boosted equity performance. With credit spreads tightening, returns from credit, in particular investment grade, contributed to performance. With government bond yields falling, duration (sensitivity to interest rate movements) also contributed to performance. Sustained monetary tightening in the face of high inflation has put downward pressure on growth and sentiment and increased market volatility. The Investment Manager thinks that central banks are now close to the peak of their interest rate cycles and is comfortable with a more interest rate-

sensitive portfolio. As growth weakens, the Investment Manager believes it is prudent to improve the credit quality of the fund.

FONDITALIA MILLENNIALS EQUITY

During the reference period, the performance of the Sub-Fund was 11.89% (share class G), while that of its benchmark (MSCI World Growth index in Euro) was equal to 10.83%.

The Sub-Fund outperformed its benchmark by 1.06%. The main driver was the overweight to US technology stocks, implemented with several high conviction active positions such as Microsoft and Broadcom. The positioning in the semiconductor industry was positively impacted by the starting of the AI revolution and is expected to remain a structural driver of outperformance for the next year.

The Sub-Fund invests primarily in companies related to the Millennials generation and, more generally, that might benefit from on-going demographic trends. The exposure to the growth factor is significant, and the Sub-Fund's management team adopts a quality approach that should be source of positive excess returns over the medium-long term. The strategy is supposed to work in efficient markets such as the US blue chip segment, which is the primary component of developed equity markets. Additional layers of discretionary choices are based on a mix of quantitative and qualitative analysis, aimed at exploiting temporary market inefficiencies.

The valuation of growth companies is highly sensitive to change in interest rates and the cost of capital, as cash flows are expected to be higher in the future. Therefore, they tend to outperform in periods of monetary easing and underperform in periods of rising interest rates, especially in conjunction with a deterioration of growth prospects.

For this reason, the Sub-Fund adopts a specific portfolio construction methodology that aims at matching the equity duration of the Sub-Fund to that of its benchmark. This approach allows the Sub-Fund to preserve the thematic bias while limiting additional tracking-error deriving from unpredictable macroeconomic events.

FONDITALIA AFRICA & MIDDLE EAST EQUITY

During the reference period, the net performance of the Sub-Fund was -13.3% while that of its benchmark was equal to -14.8%.

Over the financial year, Morocco, South Africa and the UAE were among the better performing markets, while Egypt, Kenya and Qatar lagged. Inflation and ongoing tightening monetary policy globally was beneficial for financials and Saudi mid-cap names, while UAE equities benefitted significantly from investor inflows due to the Ukraine situation. As regards South Africa, country performance was more mixed. Financials and Consumer Staples names continued to perform strongly on tighter monetary policy from the South African Reserve Bank (SARB) in order to tackle inflation, while material stocks were weaker due to Chinese economic weakness and production shortfalls due to electricity loadshedding. Meanwhile, frontier markets like Nigeria and Egypt were impacted negatively by ongoing currency devaluation.

From the second half of 2022, the Sub-Fund maintained an overweight exposure to the Middle East, which benefitted from its relative defensiveness and a strong U.S. Dollar. Moreover, the Sub-Fund maintained an overweight position in Saudi Arabian Financials and mid-cap Consumer Discretionary and Industrial names, while it was underweight Materials and relatively expensive Consumer Staples. In addition, the Sub-Fund maintained its exposure to value orientated UAE property stocks, while continuing to hold a significant underweight in expensive regional telecommunications names.

From Q2 2023, the Sub-Fund began to increase its exposure to South African Consumer Discretionary names which screened as attractively valued and would benefit from lower interest rates. Moreover, the Sub-Fund continued to benefit from its overweight position in South African financials, while in Sub-Saharan Africa, the Sub-Fund maintained its overweight exposure to Telecommunications and Energy.

The Sub-Fund has a value orientated investment approach focused on selecting companies that screen as undervalued while also having a strong corporate governance ethos focused on maximising shareholder return. Over the year, the Sub-Fund has benefitted from its stock selection and country allocation decisions.

The Sub-Fund recorded a positive performance in absolute terms, while also outperforming the benchmark.

FONDITALIA FLEXIBLE SHORT DURATION

The Sub-Fund posted positive returns over the review period, outperforming government bonds, 1-3 year investment grade bonds and emerging market debt, but underperforming 1-3 year high yield bonds. Credit strategy was the primary driver of positive returns due to a mix of tighter credit spreads and higher coupon income. Stable corporate fundamentals, and positive market technicals supported tighter credit spreads, with corporate bonds outperforming government bonds. At a sector level, the exposure to financials and consumer cyclical names contributed to returns, while property related names hampered performance. From an issuer perspective, Faurecia, a global automotive supplier contributed the most to returns. Holdings in US-based Air Leasing Corp and Italy-based UniCredit also added significant value. Conversely, the exposure to Wanda Properties Global, a leading commercial properties owner in China was the key detractor amid investor concerns around the issuer's inability to service its debt due to financial stress. While its bonds recouped some losses towards the end of July on news that the issuer avoided a default, the Investment Manager used this opportunity to sell this paper amid high possibility of a default. The allocation to France-based Altice and Sweden-based Swedbank Group also weighed slightly on returns. Meanwhile, the exposure US-dollar, euro and sterling duration positions weighed on returns as sovereign bonds sold off sharply and yield curves, including the US Treasuries, UK government bonds (Gilts) and German bunds moved higher over the period. The US Federal Reserve (Fed), the European Central Bank (ECB) and the Bank of England (BoE) stuck to a hawkish stance and delivered several interest rates hikes over the period, with a clear prioritisation of inflation at the cost of growth. In turn, benchmark 10-year sovereign yields touched multi-year highs and government bonds posted negative returns.

In the near-term, key central banks are likely to keep their monetary policies restrictive as labour markets are still tight and underlying inflation is yet to improve significantly. However, market's focus will soon shift to growth as higher interest rates will drag on economic activity. The recent downgrade of the US by Fitch Ratings also suggests that higher rates are unsustainable for long in a world of high debt to GDP ratios. In the US, exhausted savings, higher interest rates and student loan repayments that are poised to resume in October, will increase strain on household finances. Meanwhile, a cohort of corporates are approaching their debt maturities and need to refinance at more punishing rates. A similar story is playing out in Europe and the UK, where higher and more restrictive rates are starting to weigh on the economy, thereby increasing the risk of a recession across developed markets over the next 12 months. In this environment, the managers look to use further tightening in credit spreads as an opportunity to trim risk and rotate into pockets of value. Investment grade bonds, specifically in the Europe appears relatively attractive on valuation grounds. While the outlook for spreads is uncertain and likely volatile, yield curve inversion provides attractive income opportunities in short-end high quality paper across the investment grade markets. Over the period, managers rotated some exposure from emerging market debt to developed market sovereign bonds due to attractive yields in short-dated sovereigns. Meanwhile, high yield exposure was slightly reduced in March 2023 and have been kept in a range given the neutral stance on the asset class. From a ratings perspective, the Sub-Fund remains focused upon BBB-BB rated bonds. On the duration front, managers remain nimble and are focusing on tactical opportunities to benefit from in the short term. Over the period, portfolio's headline duration increased to 1.7 years using US-dollar duration, due to its safe-haven properties.

FONDITALIA FIDELITY EQUITY LOW VOLATILITY

The Sub-Fund recorded a negative net total return over the financial year. The portfolio continues to have a bias towards lower volatility stocks and maintains a fairly defensive posture. As a result the portfolio remains overweight to the Health Care, Consumer Staples, and Utilities sectors and the largest underweight exposures

are in the Information Technology, Consumer Discretionary, and Energy sectors. The portfolio has a predicted beta of 0.6 vs the MSCI World and no major style tilts.

The Information Technology, Utilities, and Communication Services sectors were among the primary detractors from relative performance, while the Financials and Energy sectors contributed. Not owning Nvidia, Meta Platforms and the overweight position to Dominion Energy detracted from performance. The investments in Sumitomo Mitsui Financial, Eli Lilly and not owning Tesla contributed to performance.

Over the last 12 month period ending 31 August 2023, the global equity markets rebounded very strongly, particularly later in the period. The MSCI World rose nearly 8% (EUR) for the full period after finishing the previous 12 month period basically flat. Market performance was very skewed towards high risk (high beta) stocks. Stocks in the top quintile (20%) of risk, rose 17% (EUR) while stocks in the lowest quintile of risk declined by 2% underperforming the market by a wide margin. The defensive strategy has very little exposure to the highest risk companies and is overweight stocks with lower risk (bottom 2 quintiles). As a result, the low volatility portfolio trailed the market during the period. Majority of the underperformance came in the last 5 months of the period when equities rallied. The portfolio did solid job of protecting capital and outperforming when the equities declined as the strategy is designed to do.

The Investment Manager remains steadfast in the belief in the benefits of low volatility investing and thinks it will continue to offer investors compelling risk adjusted returns and a smoother performance pattern than the overall equity markets. The strategy continues to maintain a high exposure to fundamentally buy-rated stocks while seeking to minimize absolute risk (expectation of achieving 60%–80% of the volatility of the MSCI World Index over the long term). As a result of this objective, the expectations is for the strategy to have solid participation if the equity markets continue to rise, while providing downside protection if markets retreat. The strategy is managed on a bottom-up basis, incorporating fundamental analyst views, combining these recommendations with the estimates of risk and correlations from the proprietary risk model to build a portfolio that exhibits lower risk than the market. The portfolio managers do not impose a top down or macro perspective into the portfolio outside of what analyst recommendations.

FONDITALIA CARMIGNAC ACTIVE ALLOCATION

The Sub-Fund posted a positive net total return over the financial year.

During the financial year 2023, the allocation of the Sub-Fund stood in average at: 47.5% of net equity exposure, 43.6% of bond exposure and 4.5% of cash. On the equity side, the top 3 sectors were: Consumer non-cyclical 27.7%, Financial 13.2% and Technology 9.5%.

On the bond side, the breakdown between corporate bonds and government bonds was (base 100): 56.4% of corporate bonds and 43.6% of government bonds. The equity bucket delivered a positive performance during the 2023 financial year.

The top 3 contributors were: Health Care, Information Technology and Consumer Discretionary.

The bottom 3 detractors were: Communication Services, Materials and Utilities (the only sector delivering a negative performance throughout the period).

The top 3 contributors were: NOVO NORDISK, SAP and NVIDIA.

The bottom 3 detractors were: ESTEE LAUDER, ADYEN and ORSTED.

The bond bucket also delivered a positive return during the 2023 financial year.

The corporate bonds contributed four-fifths of the sleeve performance while sovereign bonds contributed one-fifth. The equity bucket posted a good performance between August 2022 and August 2023.

Stocks such as Novo Nordisk and Eli Lilly in the Health Care sector enjoyed very good performances and contributed positively to the bucket's return. The obesity/diabetes theme addressed by these two companies continued to shake up the markets with exponential growth.

In the Technology sector, Nvidia, SAP, Oracle recorded quarter after quarter high turnover and profits thanks to increasing demand in cloud technology and artificial intelligence.

The first part of the financial year was very positive for the fixed income sleeve.

The credit strategies, including corporate and financial bonds as well as a fine selection of collateralised loan obligations benefitted the bond bucket.

Also, the management of the modified duration and the positioning on the yield curve generated positive contribution.

The second part of the financial year was much calmer in terms of performance regarding the fixed income sleeve. Albeit to different extents, global growth rates should slow over the coming months given the increasing impact of monetary and financial tightening; growth forecasts seem to have peaked in the United States, but the Investment Manager is not expecting a recession in the next few quarters.

The European economy is slowing drastically, while China seems unable to escape very weak growth.

Meanwhile, a sharp drop in headline inflation contrasts with very dogged core inflation.

Although the Investment Manager thinks that central banks are approaching the end of their tightening cycle, we are unlikely to see any monetary policy reversal in developed economies.

In China, however, the Investment Manager is expecting a more significant response from the authorities; the question is when it will come.

The Sub-Fund is therefore keeping the bond sleeve long on the long end of the curve.

The risk/reward ratio is attractive at current levels, as growth and inflation are both trending downwards. The Sub-Fund remains exposed to credit, but with active management of its hedging.

The equity sleeve remains centred around promising trends (treatment of obesity/diabetes in the healthcare sector, AI in technology/tech-related stocks) and special cases, mainly in the industrial sector.

The portfolio manager remains attentive to the evolution of both the macro and micro situations. Should the environment change in the coming weeks, he would not hesitate to accordingly adapt the exposures by using the allowed leeway.

FONDITALIA SLJ FLEXIBLE CHINA

In absolute terms the Sub-Fund returned around -16% between September 2022 and August 2023.

The Sub-Fund kept a conservative equity allocation of around 20% before November 2022, given the COVID policy and gradually increased to 27% after the change of COVID policies and increased further to 34% in January 2023 on the recovery theme. Afterwards, the Sub-Fund maintained a stable exposure of 65% in bond and 35% in equity.

The Sub-Fund also increased exposures to IG Chinese offshore USD bonds in Q4 2022 to seek capital gain as UST yields have likely topped out and credit quality should largely improve from the prospective policy pivot, TMT is preferred within the USD bonds due to the regulatory improvement.

For equity investment, the Sub-Fund always kept a good balance between the growth and value stocks with a preference for technology and consumer. The Sub-Fund has increased some exposure in financial and material recently in the new round of stimulus. Overall, the portfolio has reduced active sector weights to control risk and focus on stock selection to achieve alpha.

The Sub-Fund has benefited from its biggest positions: CNY bonds holdings from both the carry and capital gains. Policy bank CNY bonds contribute the most within the CNY bond. Most of the loss is driven by EURCNY rally. Equity is also suffered in Q3 2022, while 2023 is more of a range trading. The biggest detractor for single stock has been China State Construction Engineering Corporation and be biggest contributor is Liuzhou Laojiao.

The loss came mostly from EURCNY rally due to the economic and policy divergence between the two regions. The Sub-Fund is partial hedged the currency risk. The equity was weak in Sep 2022, due to the Covid policies, and the sluggish China recovery after the reopening is drag on the equity performance after the initial rally, but the Sub-Fund saw meaningful policies rollout recently.

The broad equity market is likely to be at the bottom and supportive policies are being rolled out. However, the market may not rebound immediately as investors would like to wait for economic data to confirm the effectiveness of policies. On the equity front, for sectors, the Sub-Fund likes high quality IT companies, which can take advantage from the coming upward trend of semi-conductor cycle. Pro-cyclical sectors like materials and banking sectors will benefit from policy support. Overall, the equity portfolio will control active bet on sector/style allocation and mainly focus on stock selection to control risk and achieve alpha.

For onshore bonds, the Investment Manager believes that economy stimulus package will be well balanced with the monetary easing. While China is experiencing a long-term structure change, the bond yield is likely to keep in a low range. The offshore bond yield is likely to be topped. The Investment Manager will increase offshore bond duration when there is clear signal for the end of US rates hike and is cautious with credit risk for Chinese bond.

US rate should peak in near term and China economy recovery will support the FX and risky asset. The Investment Manager believes that 2H will see better sentiment and will adjust position accordingly.

FONDITALIA QUALITY INNOVATION SUSTAINABILITY

In absolute terms the Sub-Fund returned +12.39% between September 2022 and August 2023. The official relative performance versus benchmark was negative -2.83%.

The Sub-Fund absolute returns were driven mainly by the Information Technology and North America equities where most of the fund's exposure lies. The main relative performance detractor are the Sub-Funds costs.

On the 1st of every quarter, it is the Sub-Fund's quarterly rebalancing with approximately 25% turnover.

During the year the Sub-Fund's benchmark was exposed up to 4 Saudi Arabia stocks with exposure totalling up to 1.7% in June. Given that the Sub-Fund is still to be approved Saudi Arabia trading channels, the Sub-Fund was invested in iShares MSCI Saudi Arabia ETF (ticker IKSA LN) instead.

The Sub-Fund is invested in the stocks of the benchmark with low tracking error volatility.

Information Technology and North America equities is where the positions' most of the exposure lies. With the help of HOLT scores and optimization, the Sub-Fund is implementing some single stocks overweight and underweight positions, filtered with some momentum considerations.

FONDITALIA 4CHILDREN

During the reference period, the net performance of the Sub-Fund Fonditalia 4Children was around -11.9%, while that of its benchmark (MSCI ACWI Sustainable Impact Children) was equal to -5.60%.

The performance has been impacted by a defensive stance taken at the end of last calendar year with limited exposure to equity. At the beginning of the calendar year 2023 equity exposure has been upped and the asset allocation has generated neither positive nor negative relative performance contribution. Most of the underperformance is related to the equity portfolio specific stock picking where the most invested themes have been out of investors preference, mostly clean energy and climate change themes.

Currently the Sub-Fund maintain a preferred exposure to the above mentioned themes keeping in consideration the significant price erosion and the bright prospect for the sector which is still paying the price of a speculative bubble generated almost three years back.

FONDITALIA CHINA BOND

Throughout the period of 1 September 2022 to 31 August 2023, the Chinese yield continued its downward trend last year. In early 2023, there was an optimistic outlook as pandemic restrictions and visa requirements were eased. However, apprehensions about a potential economic slowdown have since gained momentum. This shift in sentiment has been reflected in the government bond market, where yields have generally declined across various maturities, except for those with a maturity of less than one year. To bolster economic recovery, the People's Bank of China implemented a range of measures, but the recovery remains fragile.

The Sub-Fund's portfolio allocation strategy is focused solely on Chinese sovereign and Chinese policy banks (quasi-sovereign), with no exposure to local government debt or corporate bonds. This allocation decision stems from concerns about credit risk during economic downturns.

The Sub-Fund benefited from its duration exposure as China sovereign yield curve shifted downwards. The Sub-Fund is actively taking tactical curve positions when opportunities present.

The Sub-Fund's performance during the reference period has been negative both in absolute and relative terms. This underperformance can be attributed to its lack of exposure to local government bonds and corporate bonds, which constitute 33% of the benchmark. Despite yield compression in these sectors, they do not offer a balanced risk-return profile for Sub-Fund investors.

FONDITALIA GLOBAL EM SUSTAINABLE BOND

This Sub-Fund was approved on 30 June 2023 but no investment activity has started as of the end of the financial year 2023.

FONDITALIA CLEAN ENERGY

This Sub-Fund was approved on 30 June 2023 but no investment activity has started as of the end of the financial year 2023.

FONDITALIA GEM INNOVATORS

This Sub-Fund was approved on 30 June 2023 but no investment activity has started as of the end of the financial year 2023.

Independent auditor's report

To the Unitholders of
FONDITALIA

Opinion

We have audited the financial statements of FONDITALIA (the "Fund") and of each of its sub-funds, which comprise the statements of net assets, the portfolios, the commitments on future contracts, the option contracts, the forward foreign exchange contracts, the swap contracts and the contracts for difference as at 31 August 2023, and the statements of changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 August 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Management Company of the Fund (the "Board of Directors") is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the financial statements

The Board of Directors is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “réviseur d’entreprises agréé” for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the “réviseur d’entreprises agréé” that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.

- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Ernst & Young

1. ACTIVITY

Fonditalia (the "Fund") is a common fund ("Fonds Commun de Placement") organised in accordance with the Law of 17 December 2010. The Fund, as a UCITS established under Part I of Luxembourg Law for unlimited duration, is allowed to distribute its Units in all EU countries under the condition that its "Prospectus" is authorised by each local Supervising Authority.

As of 31 August 2023, the Fund is composed by fifty-nine active Sub-Funds (the "Sub-Fund(s)"), each one having a specific investment policy.

The Sub-Funds which are active as at 31 August 2023 are listed below:

Fonditalia Euro Currency
Fonditalia Euro Bond Long Term
Fonditalia Bond US Plus
Fonditalia Flexible Emerging Markets
Fonditalia Euro Bond
Fonditalia Equity Italy
Fonditalia Euro Corporate Bond

Fonditalia Quality Innovation Sustainability

The investment policy of the above mentioned Sub-Funds is detailed in the Prospectus available at the registered office of the Fund.

The Fund has been created for an indefinite period and it is managed by Fideuram Asset Management (Ireland) dac (the "Management Company").

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment in transferable securities (UCITS) and with generally accepted accounting principles. The financial statements have been prepared on a going concern basis, using the last official/tradeable net asset value of the financial year (31 August 2023).

a) Combined Statements

The Fund's Combined Statements of Net Assets is the sum of the Statements of each Sub-Fund as at 31 August 2023.

There are no Cross Sub-Funds' investments (i.e. where one Sub-Fund has invested in another Sub-Fund of the Fund) as at 31 August 2023.

b) Net Asset Value per Unit

The Net Asset Value of each Sub-Fund is equal to the difference between the total assets and the liabilities of the Sub-Fund.

The Net Asset Value per Unit of each Class of Units is calculated by dividing the Net Asset Value by the number of Units outstanding on the day of calculation in the respective Classes of Units.

c) Valuation of investments in securities

The value of all portfolio securities and money market instruments or listed derivatives that are listed on an official stock exchange or traded on any other regulated market are based on the last available price on the principal market on which such securities or money market instruments or listed derivatives are traded. If such prices are not representative of the fair value, such securities, money market instruments or derivatives as well as other permitted assets, the value of such securities and money market instruments or listed derivatives is defined by the Board of Directors of the Management Company based on the reasonably foreseeable sale proceeds determined prudently and in good faith.

The value of securities and money market instruments which are not quoted or dealt in on any regulated market are based on the last available price, unless such price is not representative of their true value; in this case, they may be valued at a fair value at which it is expected that they may be resold, as determined prudently and in good faith by and under the direction of the Board of Directors of the Management Company.

The value of the investment in investment funds shall be based on the last available valuation. Generally, investment in investment funds will be valued in accordance with the methods described in the instruments governing such investment funds. These valuations shall normally be provided by the fund administrator or valuation agent of an investment fund. To ensure consistency within the valuation of each Sub-Fund, if the time at which the valuation of an investment fund was calculated does not coincide with the valuation time of any Sub-Fund, and such valuation is determined to have changed materially since it was calculated, then the Net Asset Value may be adjusted to reflect these changes as determined in good faith by and under the direction of the Board of Directors of the Management Company.

d) Valuation of securities lending

The Fund may lend securities included in its portfolio to a borrower through a third party broker. The assets continue to be valued as part of the portfolio of the Fund. If the prices of securities lent are not representative of their fair value, all such securities will be valued at their fair value at which it is expected they may be resold as determined in good faith by or under the direction of the Board of

Directors of the Management Company. Securities lending generates additional income for the Fund according to the contracts; the remuneration is recorded under the heading "Securities lending, net" in the Statement of Changes in Net Assets.

e) Income recognition

Interest income is recorded on an accrual basis and dividend income is recorded on a dividend ex-date basis, net of withholding tax if any.

f) Net realised profit / (loss) on sale of investments

Investments in securities are accounted for on a trade date basis. Net realised profit / (loss) on sale of investments in securities are based on the average cost basis. The net realised profit / (loss) and change in net unrealised appreciation / (depreciation) on investments are recorded in the Statement of Changes in Net Assets.

g) Transaction costs

Transaction costs are charged by State Street Bank International GmbH for the processing of the Fund's transactions. Transaction costs are included under the heading "Other charges and taxes" of the Statement of Changes in Net Assets.

h) Allocation of expenses

All the expenses directly and exclusively attributable to a certain Sub-Fund are borne by that Sub-Fund. If it cannot be established that the expenses are directly and exclusively attributable to a certain Sub-Fund, they will be borne proportionally by each Sub-Fund.

i) Set-up costs

The expenses originated during the establishment of the Fund are amortized over a 5 years' period.

Where further Sub-Funds are created, these Sub-Funds may bear their own set-up costs. The set-up costs for new Sub-Funds created may, at the discretion of the Board of Directors of the Management Company, be amortized on a straight-line basis over 5 years from the date on which the Sub-Funds started activity. The Board of Directors of the Management Company may, in its absolute discretion, shorten the period over which such costs are amortized.

As of 31 August 2023, set-up costs were fully amortized and no additional costs were capitalised.

j) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the market forward rates applicable on the valuation date for the remaining period from valuation date to maturity date. The unrealised profits or losses on forward foreign exchange contracts are disclosed in the Statement of Net Assets under the heading "Unrealised profit / (loss) on forward foreign exchange contracts".

k) Non-deliverable bond forward contracts

Non-deliverable bond forward contracts are financial derivative instruments which differ from normal forward contracts in that there is no physical settlement of the reference security at maturity. Instead, a net cash settlement will be made by one party to the other based on the movement of the reference security. Any realised profits and losses are recognised on trade date plus one and recorded in the Statement of Changes in Net Assets under the heading "Net realised profit / (loss) on sales of investments, currencies and other financial instruments".

For non-deliverable bond forward contracts, unrealised profits or losses are recorded in the Statement of Net Assets under the heading "Unrealised profit / (loss) on non-deliverable bond forward contracts".

l) Future contracts

Futures contracts are valued using quoted daily settlement prices established by the stock exchange on which they are traded. The Fund and the broker agree to exchange an amount of cash equal to the daily fluctuations in the value of the futures contract (the "variation margin"). For open futures contracts, unrealised profits or losses are recorded in the Statement of Net Assets under the heading "Unrealised profit / (loss) on futures contracts". Variation margin are recorded in the Statement of Net Assets under the heading "Other banks and broker accounts".

Unrealised profits and losses on future contracts are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on future contracts".

m) Swap contracts

Swaps are, in general, contracts by which two parties commit themselves during a given period to exchange two flows, one in exchange of the other, determined on the basis of a nominal value. The flows may be linked to interest rate(s), exchange rate(s), share(s), index(es) or credit event(s).

Swap contracts are valued using the difference between the values of forecasted flows the counterparty is to pay to the Sub-Fund and those owed by the Sub-Fund to its counterparty.

Credit Default Swaps and Interest Rate Swaps are valued by reference to the net present value of the expected future cash flows based on the market interest rates and the markets expected default and recovery rate of the underlying asset. Total Return Swaps are valued by reference to the mark to market value based on the market value of the underlying asset. The estimated market value is based on the valuation elements laid down in the contracts, and is obtained from third parties pricing agents, market makers or internal models.

Swap premium is recorded in the Statement of Net Assets under the heading "Other interest receivable".

Unrealised profits or losses on swap contracts are recorded in the Statement of Net Assets under the heading "Unrealised profit / (loss) on swap contracts".

Credit Default Swap contracts are presented at clean price; therefore interest income is recorded in the Statement of Changes in Net Assets under the heading "Interest on others".

n) Option contracts

Option contracts quoted on an official stock exchange or on another regulated market are valued according to the last known market price where the contracts were negotiated by the Fund or, if there are several markets, according to the last known price of the principal market.

Option contracts not quoted on an official stock exchange or on another regulated market are valued at their last known market value or, in the absence of a market value, according to their probable market value in the reasonable estimation of the Board of Directors of the Management Company.

In the case of options on futures, no premium margin is required because here a daily profit and loss adjustment (variation margin) is made by the procedure known as "marking-to-market". The profit of one party to the contract is the loss of the other party. The resulting gains and losses are either debited or credited to the appropriate account on a daily basis via the mark-to-market process.

Unrealised profits and losses are recorded in the Statement of Net Assets. The final valuation is made at the final settlement price of either the expiration date of the option or the day on which it was exercised.

Market value of option contracts is recorded in the Statement of Net Assets.

The variation of unrealised profits and losses on option contracts are recorded in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on option contracts".

o) Contracts for difference

In a contract for difference, two parties commit to exchange payments, which replicate the economic consequences of holding a long or short position in the underlying security. Contracts for difference are valued at the closing price of the underlying instrument less the financing costs attributable to the relevant contract. When a contract for difference is concluded, the Sub-Fund may be required to deposit an amount ("initial margin") that corresponds to a pre-agreed percentage of the contract price in cash and/or other assets with the broker.

Unrealised profits or losses are reported in the Statement of Net Assets under the heading "Unrealised profit / (loss) on contracts for difference".

p) Trailer fees

Trailer fees are paid out from the management fee for the distribution of the investment fund to distributors and asset managers. These rebates are granted out of the management fee to institutional investors who hold the Fund's Units for the economic benefit of third parties.

Trailer fees are recorded in the Statement of Changes in Net Assets under the heading "Trailer fees".

q) Translation of items expressed in foreign currencies

Assets and liabilities in foreign currencies are converted into the base currency of the Sub-Fund at the closing exchange rates of the final day of the financial year.

Income and expenses in currencies other than the base currency of the Sub-Fund are converted into the base currency of the Sub-Fund at the closing exchange rates in force on the day of the transaction.

The resulting realised and unrealised profit or loss made on foreign exchange is included in the Statement of Changes in Net Assets; any unrealised profit or loss on cash positions, receivable on assets and payable on liabilities denominated in currencies other than the base currency of the Sub-Fund being recorded under the heading "Net change in unrealised appreciation / (depreciation) on foreign currencies and forward foreign exchange contracts".

The exchange rates as at 31 August 2023 are the following:

3. BANKS, BANK OVERDRAFTS AND BROKER ACCOUNTS

As at 31 August 2023, the counterparty for the "Banks" and "Bank overdrafts" accounts is State Street Bank International GmbH, Luxembourg Branch for all the Sub-Funds. The heading "Other banks and broker accounts" includes cash held with external banks and cash at broker accounts. The heading "Amounts due to brokers" includes amounts payable to brokers. As at 31 August 2023, the counterparties for the "Other banks and broker accounts" and "Amounts due to brokers" accounts are J.P. Morgan Securities PLC and UBS AG.

The heading "Other banks and broker accounts" consists primarily of cash receivable for collateral from the Portfolios' clearing brokers and various counterparties. "Amounts due to brokers" consists primarily of cash payable for collateral to the Portfolios' clearing brokers and various counterparties.

"Other banks and broker accounts" / "Amounts due to brokers" balances are valued at cost, which approximates market value.

4. PLACEMENT FEE

For certain Sub-Funds, the Management Company was entitled to receive a placement fee, the existence and amount of which was defined according to the following conditions:

For the Sub-Funds Fonditalia Obiettivo Emergenti¹ and Fonditalia Eurizon Collection 2023 a Placement Fee, equal to 2,00% of the initial Net Asset Value per unit multiplied by the number of resulting units being issued, was applied at the end of the initial subscription period; it was levied on the Sub-Fund's assets collected as capitalized fees and was amortized over the next 5 years.

For the Sub-Fund Fonditalia Obiettivo 2023 a Placement Fee, equal to 2,10% of the initial Net Asset Value per unit multiplied by the number of resulting units being issued, was applied at the end of the initial subscription period; it was levied on the Sub-Fund's assets collected as capitalized fees and is amortized over the next 6 years.

For the Sub-Funds Fonditalia Carmignac Active Allocation (classes R,S), Fonditalia SLJ Flexible China (classes R,S) and Fonditalia 4Children (class R) a Placement Fee, equals to 1,80% of the initial Net Asset Value per unit multiplied by the number of resulting units being issued, was applied at the end of the initial subscription period; it was levied on the Sub-Fund's assets collected as capitalized fees and is amortized over the next 3 years.

¹The Sub-Fund Fonditalia Obiettivo Emergenti merged into Fonditalia Bond Global Emerging Markets on 31 March 2023.

The amount of the placement fee yet to be amortised is recorded in the Statement of Net Assets under the heading "Other assets". As at 31 August 2023, the residual amounts of placement fee were as follows (in EUR):

Sub-Fund	Placement fee
Fonditalia Carmignac Active Allocation	735 818,85
Fonditalia SLJ Flexible China	618 378,10
Fonditalia 4Children	935 042,91
Total	2 289 239,86

For the year ended 31 August 2023, the amortisation recorded in the Statement of Changes in Net Assets under the heading "Other charges and taxes" was as follows (in EUR):

Sub-Fund	Net amount
Fonditalia Obiettivo 2023	(1 548 858,30)
Fonditalia Obiettivo Emergenti ¹	(386 533,05)
Fonditalia Eurizon Collection 2023	(220 733,76)
Fonditalia Carmignac Active Allocation	(1 924 254,45)
Fonditalia SLJ Flexible China	(1 523 561,10)
Fonditalia 4Children	(1 013 645,15)
Total	(6 617 585,81)

¹The Sub-Fund Fonditalia Obiettivo Emergenti merged into Fonditalia Bond Global Emerging Markets on 31 March 2023.

5. SUBSCRIPTION TAX

According to Luxembourg Law, the Fund is not subject to any income tax but is liable to a subscription tax ("Taxe d'Abonnement") at an annual rate of 0,05% of its Total Net Assets of each of the Sub-Funds, payable quarterly and assessed on the last day of each quarter.

Value of assets represented by units/shares in other Luxembourgish undertakings for collective investment ("UCI") is exempted from the "Taxe d'Abonnement" provided that such units/shares have already been subject to the tax.

6. OTHER CHARGES AND TAXES

The heading "Other charges and taxes" is mainly composed of placement fees, transaction fees and miscellaneous fees.

7. MANAGEMENT FEE

The Management Company, as remuneration for its services, is entitled to receive a management fee calculated and accrued on each Valuation Day based on the Total Net Assets attributable to the relevant Unit Class. For the year ended 31 August 2023, the effective rates for each Sub-Fund are the following:

Annual management fee rate by Unit Class:							
Sub-Fund	Class A and H	Class R	Class R1	Class R and RH	Class S	Class S1	Class T, TH and TS
Fonditalia Euro Currency	-	-	-	0,75%	-	-	0,35%

Sub-Fund	Class A and H	Class R	Class R1	Class R and RH	Class S	Class S1	Class T, TH and TS
Fonditalia Quality Innovation Sustainability	-	-	-	1,50%	-	-	1,00%

¹Commission rate for this Sub-Fund has been changed from 0,90% to 0,70% since 28 July 2023.

²The Sub-Fund Fonditalia Obiettivo Emergenti merged into Fonditalia Bond Global Emerging Markets on 31 March 2023.

³Commission rate for this Sub-Fund has been changed from 1,50% to 0,70% since 7 November 2022.

⁴Commission rate for this Sub-Funds has been changed from 1,40% to 0,80% since 10 July 2023.

The management fee is paid monthly on the basis of the monthly average Net Asset Value of each Sub-Fund. The distribution fees are paid by the Management Company out of the management fees paid by the Sub-Funds.

8. PERFORMANCE FEE

Performance fee is paid annually at the end of each calendar year, based on performance of NAV per Unit of each class separately (after deduction of all expenses, liabilities and management fees but not performance fee), adjusted for investor subscriptions, redemptions and distribution of dividends. In Absolute Return model, the NAV performance is compared to a reference indicator. This indicator is a High on High (highest NAV of all previous periods) increased by annual fixed hurdle value. In Relative Return model, performance fee becomes payable if NAV performance of a Sub-Fund at the end of a calendar year is higher than the performance of a relevant Benchmark Index, even if NAV performance was negative.

The Management Company may earn a performance fee for the following Sub-Funds:

Sub-Fund	Benchmark	Hurdle rate	Performance fee rate

¹As of 31 July 2023, the Sub-Fund changed its performance fee calculation method from Absolute Return model to Relative Return model.

The details of the calculation methods are described in the Prospectus. Performance fees charged during the financial year are detailed in the Statement of Changes in Net Assets of the relevant Sub-Fund, which is available free of charge upon request at the registered office of the Fund.

The below table shows the actual performance fees charged during the financial year ended 31 August 2023.

Sub-Fund	Classes	Unit Class Currency	Amount of performance fees in Sub-Fund Currency	% of the average NAV of the Unit Class
Fonditalia Euro Bond	R	EUR	14,93	0,00
	S	EUR	4,64	0,00
	T	EUR	(57 503,87)	(0,01)
Fonditalia Equity Global High Dividend	R	EUR	1 269 736,32	0,45
	S	EUR	782 709,38	0,45
	T	EUR	2 814 270,97	0,61
	TS	EUR	30 626,06	0,61
Fonditalia Cross Asset Style Factor	R	EUR	2,94	0,00
	T	EUR	11,73	0,00
Fonditalia Equity China	R	EUR	(60 445,03)	(0,04)
	T	EUR	(18 652,34)	(0,01)
Fonditalia Equity Brazil				

Sub-Fund	Classes	Unit Class Currency	Amount of performance fees in Sub-Fund Currency	% of the average NAV of the Unit Class
Fonditalia Flexible Italy	R	EUR	171 251,93	0,71
	T	EUR	144 230,66	0,85
Fonditalia Global Bond	R	EUR	17 706,83	0,02
	T	EUR	269 315,21	0,17
Fonditalia Diversified Real Asset	S	EUR	3,43	0,00
Fonditalia Ethical Investment	R	EUR	1 076,22	0,00
	S	EUR	307,83	0,00
	T	EUR	8 831,04	0,01

For the below Sub-Funds there was no performance fees accrued as at 31 August 2023 even if they are subject to a performance fee:

Fonditalia Flexible Emerging Markets, Fonditalia Euro Bond Defensive, Fonditalia Allocation Risk Optimization, Fonditalia Global Income, Fonditalia Dynamic Allocation Multi-Asset, Fonditalia Euro Yield Plus, Fonditalia Equity India, Fonditalia Flexible Europe, Fonditalia Ethical Investment, Fonditalia Global Convertibles, Fonditalia Credit Absolute Return and Fonditalia Financial Credit Bond.

9. DEPOSITORY AND CENTRAL ADMINISTRATION FEE

The Management Company has appointed State Street Bank International GmbH, Luxembourg Branch as Depositary and Paying Agent. The Sub-Funds pay a maximum depositary fee equal to 0,045% per year, calculated on the basis of the end of month Net Asset Value of each Sub-Fund and payable at the beginning of the following month.

For the Sub-Fund Fonditalia Cross Asset Style Factor, the depositary fees calculated as above is equal to 0,025% per year.

The central administration fee is equal to 0,135% per year calculated on the basis of the end of month Net Asset Value of each Sub-Fund and payable to the Management Company at the beginning of the following month.

For the Sub-Fund Fonditalia Cross Asset Style Factor, the central administration fee calculated as above is equal to 0,075% per year.

10. SWAP CONTRACTS

During the financial year, certain Sub-Funds have taken out swap contracts. Details of open positions as at 31 August 2023 are disclosed following the Portfolios of the concerned Sub-Funds.

Swaps, comprising Interest Rate Swaps, Credit Default Swaps, Total Return Swaps, Index Swaps and Inflation Swaps, can be linked to any number of underlying investments and indexes, and swap terms can vary greatly. Cash flows are exchanged based on the underlying. Swap agreements are carried at market value and the value of the swap agreement is based on a counterparty independent provided price, third party pricing service or valuation model. The model considers various inputs including the market value of the underlying, the risks associated with the underlying and the specific terms of the contract.

For the swap contracts the counterparties are disclosed in the respective portfolio of each Sub-Fund.

The open positions as at 31 August 2023 are disclosed in the "swap contracts" sections of the relevant Sub-Funds and detailed below:

Credit Default Swaps

Total Return Swaps

The following summarises the aggregate value of total return swaps, analysed by counterparty as at 31 August 2023:

Sub-Fund	Currency	Counterparty	Counterparty's country of incorporation	Total Return Swaps	% of Net Assets
Fonditalia Cross Asset Style Factor	USD	BofA Securities Europe S.A.	United States	7 836,63	0,02

The following table details provide an analysis of the maturity tenor of total return swaps transactions outstanding as at 31 August 2023:

Sub-Fund	Currency	1 day	2 to 7 days	8 to 30 days	31 to 90 days	91 to 365 days	More than 365 days	Total
(Absolute values)								
Fonditalia Cross Asset Style Factor	EUR					7 836,63		7 836,63

The above maturity tenor analysis has been based on the contractual maturity date of the relevant total return swap transaction as at 31 August 2023.

Total Return Swaps and more specifically OTC derivative transactions are entered into by the parties under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Sub-Fund and a counterparty that governs OTC derivative transactions (including total return swaps) entered into by the parties.

All returns from OTC derivative transactions will accrue to the Sub-Fund and are not subject to any returns sharing arrangements with the Portfolio's Manager or any other third parties.

Sub-Fund	Change in unrealised	Realised	Return	% of Avg Net Assets
Fonditalia Cross Asset Style Factor	7 836,63	0,02	7 836,61	0,00

The figures disclosed above are the sum of Total Return Swaps contracts.

11. FORWARD FOREIGN EXCHANGE CONTRACTS, FUTURE CONTRACTS, OPTION CONTRACTS AND CONTRACTS FOR DIFFERENCE

During the financial year, certain Sub-Funds have taken out forward foreign exchange contracts, future contracts, option contracts and contracts for difference. Details of open positions as at 31 August 2023 are disclosed following the Portfolios of the concerned Sub-Funds.

As at 31 August 2023, J.P. Morgan Securities PLC and UBS AG are brokers for all the future contracts.

NOTES TO THE FINANCIAL STATEMENTS

Fonditalia

As at 31 August 2023, Citigroup Global Markets Limited is the broker for all contracts for difference.

12. REDEMPTION OF UNITS

The Fund's Units are redeemable daily at the current Net Asset Value per Unit. According to the Fund's Prospectus, the redemption of Units can be temporarily suspended. During the financial year ended 31 August 2023, no suspension was recorded.

Some Sub-Funds are entitled to receive a redemption commission applied on the counter value of the number of Units redeemed based on the initial Net Asset Value per Unit. The redemption commission is recognized as a revenue for each Sub-Fund over the same period and corresponds to the amounts to be amortized of the placement fee levied on Sub-Funds launch.

The Sub-Fund involved and the applicable rates during the financial year from 1 September 2022 to 31 August 2023 were as follows:

Sub-Fund	Year	Rate of Redemption Fee
Fonditalia Obiettivo 2023	From 1 September 2022 to 27 October 2022	0,35%
	From 28 October 2022 to 27 January 2023	0,26%
	From 28 January 2023 to 27 April 2023	0,18%
	From 28 April 2023 to 27 July 2023	0,09%
	From 28 July 2023 to 31 August 2023	Nil
Fonditalia Obiettivo Emergenti ¹	From 1 September 2022 to 6 November 2022	0,10%
	From 7 November 2022 to 31 March 2023	Nil
Fonditalia Eurizon Collection 2023	From 1 September 2022 to 9 October 2022	0,40%
	From 10 October 2022 to 9 January 2023	0,30%
	From 10 January 2023 to 9 April 2023	0,20%
	From 10 April 2023 to 9 July 2023	0,10%
	From 10 July 2023 to 31 August 2023	Nil
Fonditalia Carmignac Active Allocation	From 1 September 2022 to 10 September 2022	1,05%
	From 11 September 2022 to 10 December 2022	0,90%
	From 11 December 2022 to 10 March 2023	0,75%
	From 11 March 2023 to 10 June 2023	0,60%
	From 11 June 2023 to 31 August 2023	0,45%

Sub-Fund	Year	Rate of Redemption Fee
Fonditalia SLJ Flexible China	From 1 September 2022 to 11 October 2022	1,20%
	From 12 October 2022 to 11 January 2023	1,05%
	From 12 January 2023 to 11 April 2023	0,90%
	From 12 April 2023 to 11 July 2023	0,75%
	From 12 July 2023 to 31 August 2023	0,60%
Fonditalia 4Children	From 1 September 2022 to 19 September 2022	1,35%
	From 20 September 2022 to 19 December 2022	1,20%
	From 20 December 2022 to 19 March 2023	1,05%
	From 20 March 2023 to 19 June 2023	0,90%
	From 20 June 2023 to 31 August 2023	0,75%

¹The Sub-Fund Fonditalia Obiettivo Emergenti merged into Fonditalia Bond Global Emerging Markets on 31 March 2023

For the financial year ended 31 August 2023, the redemption fee recorded in the Statement of Changes in Net Assets under the heading "Other income" was as follows (in EUR):

Sub-Fund	Net amount
Fonditalia Obiettivo 2023	983 743,71
Fonditalia Obiettivo Emergenti ¹	285 402,31
Fonditalia Eurizon Collection 2023	120 310,32

16. SECURITIES LENDING TRANSACTIONS

Fund's portfolio securities may be lent to credit institutions and other financial institutions of high standing. The Fund has the right to request, at any moment, the termination of the contract and the return of securities.

Securities lending is guaranteed by government securities and other bonds with a minimum rating of upper medium grade. Any transaction expenses in connection with such loans are charged to the borrowers.

The Management Company has designated Intesa Sanpaolo Wealth Management S.A. as Securities Lending Agent for the Sub-Funds that engage in securities lending transactions under a securities lending authorization agreement.

Intesa Sanpaolo Wealth Management S.A. is a related party to the Management Company being fully owned by ISP group.

For the financial year ended 31 August 2023, Intesa Sanpaolo Wealth Management S.A. acting as Securities Lending Agent had a Securities Lending Agency Agreement in place with Goldman Sachs International Bank for equity portfolio and lending securities to approved borrowers. With regard to bond portfolio, security lending transactions were mainly conducted under a Principal Lending Programme with Goldman Sachs International Bank coupled with an automated Agency Lending Programme.

The following summarises the value of securities lent analysed by the 10 top borrowing counterparties as at 31 August 2023:

Sub-Fund	Currency	Counterparty	Counterparty's country of incorporation	Market Value of Securities Lent (in EUR)	% of Net Assets	% of the Sub-Fund's total lendable assets	Market Value of the collateral received for the securities lent

Securities lending transactions are entered into by the Funds under a securities lending agreement. All collateral received by the Funds under the securities lending agreement is transferred under a title transfer arrangement. The collateral is held in custody by a sub-custodian of the depositary for the duration of the transaction.

For the financial year ended 31 August 2023, income and charges arising from securities lending are described in the following table:

¹The Sub-Fund Fonditalia Obiettivo Emergenti merged into Fonditalia Bond Global Emerging Markets on 31 March 2023.

17. RUSSIA UKRAINE CONFLICT

While the Russian Ukraine conflict's outcome is uncertain, no significant impacts have been registered in terms of going concern or operations during the financial year. The Board of Directors of the Fund continues to monitor the evolving situation and its potential impact on the financial position of the Sub-Funds impacted.

On the 21 August 2023, the Management Company made the decision in relation to the treatment of dividends and coupons received in Russian rouble sanctioned bank accounts in the NAV of five Sub-Funds Fonditalia Income Mix, Fonditalia Flexible Emerging Markets, Fonditalia Bond Global Emerging Markets, Fonditalia Equity Global Emerging Markets and Fonditalia Emerging Markets Local Currency Bond. Considering that the income is not available to the relevant Fund due to sanctions and given the uncertainty surrounding the availability of the income, it was decided to exclude such income from the NAV. This caused no significant impact on the relevant Fund.

18. EVENTS OCCURED DURING THE YEAR

Effective from 1 January 2023, Fideuram Bank Luxembourg S.A. merged with CBP Quilvest S.A and the new legal name of the entity is Intesa SanPaolo Wealth Management S.A..

The Sub-Fund Fonditalia Obiettivo Emergenti merged into Fonditalia Bond Global Emerging Markets on 31 March 2023.

Absorbed Sub-Fund	Unit Class of merging Sub-Fund	Unit Class of absorbing Sub-Fund	Conversion Ratio 9 Decimals	Absorbing Sub-Fund
Fonditalia Obiettivo Emergenti	R	R	0,724020866	Fonditalia Bond Global Emerging Markets
Fonditalia Obiettivo Emergenti	S	S	1,017413234	Fonditalia Bond Global Emerging Markets

19. INDIAN SECURITIES SUBJECT TO CGT AND TAX ON OTHER INCOME

As of 31 August 2023, the following Sub-Funds had exposure to Indian securities subject to CGT and tax on other income:

- Fonditalia Equity Global Emerging Markets
- Fonditalia Equity Pacific Ex Japan
- Fonditalia Quality Innovation Sustainability
- Fonditalia Flexible Emerging Markets
- Fonditalia Constant Return
- Fonditalia Equity India

With effective date 2 October 2023 (the Effective Date), the tax provision policy of the Management Company is to record both Indian CGT and tax on other income (i.e. dividend income, interest income, surcharges and cess) on a cash basis for realized gains and through

accruals on unrealized gains, where they are not already withheld at source. The tax provision liability accruals - if any - is reflected in the net asset value of the relevant Sub-Fund.

With specific reference to the following Sub-Funds:

- Fonditalia Equity Global Emerging Markets
- Fonditalia Equity Pacific Ex Japan
- Fonditalia Quality Innovation Sustainability
- Fonditalia Flexible Emerging Markets
- Fonditalia Constant Return

from the Effective Date, there is no need to start including a tax provision for India CGT due to the low amount of tax on unrealized gains. Consequently, the current accounting practices of applying Indian CGT only on a cash basis, will remain unchanged. Should it however become necessary, the tax methodology will be amended in order to include in the net asset value of the Sub-Fund impacted a tax provision liability to reflect the potential India CGT payable.

With specific reference to

- Fonditalia Equity India

Starting from the Effective Date, considering that the Sub-Fund is fully invested in Indian securities, an accrual has been recorded in order to include in the net asset value a tax provision to reflect any increase in the India CGT potential debt, calculated at single security level, on a weekly basis. As such, it should be noted that the tax provision could be either in excess or insufficient compared to the actual tax that the Sub-Fund will have to pay following the sale of securities in scope for the tax given that the sell price is expected not to correspond exactly to the market price previously considered when calculating the accrual.

20. SUBSEQUENT EVENTS

Effective from 22 October 2023, the Sub-Fund Fonditalia Euro Yield Plus changed hurdle rate from 0,30% to 0,65%.

Effective from 1 November 2023, the Sub-Fund Fonditalia Diversified Real Asset changed the benchmark component from "MSCI World Real Estate Price Index" in EUR to "MSCI World Real Estate GICS Level 1 Price Index" in USD, converted in EUR.

The Sub-Fund Fonditalia Eurizon Collection 2023 merged into Fonditalia Global Income on 24 November 2023 with merger ratio:

- for "R" Class: 1,950028830
- for "S" Class: 2,640881010.

The Sub-Fund Fonditalia Ethical Investments was renamed Fonditalia Green Bonds on 11 December 2023.

Effective from 11 December 2023, the SFDR category changed from Article 6 to Article 8 for the Sub-Fund Fonditalia Bond Global High Yield.

The following Sub-Funds are going to be launched on 2 January 2024:

- Fonditalia Clean Energy Solutions
- Fonditalia Equity GEM Innovators
- Fonditalia Global EM Sustainable Bond

The Sub-Fund Fonditalia Obiettivo 2023 is going to be renamed Fonditalia Enhanced Yield Short Term on 19 January 2024.

The following table lists the ten largest counterparties by market value of non-cash collateral received/(paid) for Total Return Swaps as of 31 August 2023:

Sub-funds	Security type	Counterparty	Currency	Value (in EUR)
Fonditalia Cross Asset Style Factor	Total Return Swap	BofA Securities Europe S.A.	USD	0,00

As at the balance sheet date all of the cash collateral received in respect of OTC derivatives transactions (including total return swaps), is not part of any reinvestment program.

Non-cash collateral received in respect of securities lending transactions cannot be sold, re-invested or pledged.

The following table provides an analysis of the amounts of non-cash collateral received by the Fund in respect of securities lending transactions held by a custodian, as at the balance sheet date:

Custodian	Market Value of Non-cash collateral received
	Securities lending
State Street Bank International GmbH, Luxembourg Branch	1 000 154 158,87
Total (EUR)	1 000 154 158,87

Non-cash collateral received from the counterparty by way of a security collateral arrangement in relation to OTC derivatives (including total return swaps) is kept in a segregated account.

SUSTAINABLE FINANCE DISCLOSURE REGULATIONS (SFDR)

- Fonditalia Quality Innovation Sustainability

The above listed Sub-Funds have (E) environmental and (S) social characteristics and promote investment into assets which follow good governance (G) practices in accordance with Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR"). The Sub-Funds might invest in activities that are environmentally sustainable which are selected according to their investment policy, but such investments are not per se decisive to the attainment of the Fund's environmental and/or social characteristics.

In addition to integrating sustainability risks into investment decisions, the Management Company considers ESG factors in the analysis and selection of financial instruments with the aim of achieving an ESG score, calculated at the overall portfolio level, which is higher than the ESG score of the investment universe or of the benchmark, if any, using data from the specialised info-provider "MSCI ESG Research". The ESG score of the Sub-Fund is calculated as a weighted average of the ESG scores of the issuers of the financial instruments in the portfolio.

Without prejudice to the integration of sustainability risk analysis, all Sub-Funds belonging to the umbrella Fund do not, however, promote the specific environmental objectives identified in Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 establishing a framework for sustainable investment and amending Regulation (EU) 2019/2088. The investments underlying these financial products do not take into account the EU criteria for environmentally sustainable economic activities.

The Management Company has adopted a specific framework that defines how the "Principal Adverse Impact indicators" ("PAI") are taken into account within the assets managed, in accordance with the provisions of the Regulatory Technical Standards (RTS) of Regulation 2019/2088. This framework provides for the use of specific indicators, as declined in the RTS17, on the basis of the guidelines already defined by FAMI according to the characteristics and objectives of the individual financial products, which provide for the use of mechanisms of (i) negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors deemed not "socially responsible" (such as, among others, the exposure to the unconventional weapons sector) or characterized by environmental, social or corporate governance criticalities, (ii) positive integration of ESG factors in the analysis, selection and composition of financial portfolios (ESG Score), (iii) active shareholders vis-à-vis investee issuers and (iv) identification of sustainable investments under the SFDR Regulation through the methodology for assessing the degree of alignment with each of the SDGs, or pursuing measurable positive impacts. The selected environmental PAI refer instead to the CO2 emissions Scope1 and Scope2 and GHG Intensity, in view of the topics related to the Net Zero Asset Managers Initiative. Two social PAI were selected to limit exposures to violations of the UNGC principles/OECD guidelines and exposure to controversial weapons sector.

Financial products within the Sub-Funds take into consideration Principal Adverse Impact indicators ("PAI"), specifically consider the following indicators:

PRINCIPAL ADVERSE IMPACT (PAI)	PAI CATEGORY
PAI applicable to equity instruments	
Carbon emission (Scope 1 + 2)	Environmental
GHG intensity of investee companies	Environmental
Violations of UNGC principles and OECD guidelines for Multinational Enterprises	Social
Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons)	Social
PAI applicable to government bond and supranationals	
GHG intensity	Environmental
Investee Countries subject to social violations	Social

The Sub-Fund Fonditalia 4Children is classified under Article 9 of SFDR. The Sub-Fund has been categorised as a Sustainable Objective Sub-Fund, as (i) it has sustainable investments as its objective and (ii) the companies in which the Sub-Fund shall invest in need to follow good governance practices, in accordance with article 9 of the SFDR. FAM Sgr, the Investment manager considers the following indicators: PAI 1 - Carbon emission (Scope 1 + 2); PAI 3 - GHG intensity of investee companies; PAI 2 - Portfolio carbon footprint; PAI 4 Exposure to companies active in fossil fuel sector; PAI 10 - Violations of UNGC principles and OECD guidelines for Multinational Enterprises; PAI 12 - Unadjusted gender pay gap; PAI 13-Board gender diversity; PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons).

The other Sub-Funds are currently classified under Article 6 of SFDR.

Outcome:

During the financial year the Management Company ensured compliance with the sustainability processes established for each category corresponding to Articles 6, 8 or 9.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Euro Currency

Legal entity identifier 549300DUBGP6QQFBGR26

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Investment Manager excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities were excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company verified the PAI data through a periodic monitoring report, where the values of the indicators are consulted at product level and, where present and possible, at the respective benchmark level to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
RAGB 0 04/20/25	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	17.00%	Austria
RFGB 4 07/04/25	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	11.42%	Finland
NETHER 0 1/4 07/15/25	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	10.63%	Netherlands
IRISH 5.4 03/13/25	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	7.03%	Ireland
BKO 2.2 12/12/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	5.62%	Germany
RAGB 1.65 10/21/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	1.85%	Austria
EJRAIL 2.614 09/08/25	TRANSPORTATION AND STORAGE	1.08%	Japan
PROXBB 1 7/8 10/01/25	INFORMATION AND COMMUNICATION	0.95%	Belgium
VLVY 3 1/2 11/17/25	MANUFACTURING	0.90%	Sweden
BKNG 0.1 03/08/25	INFORMATION AND COMMUNICATION	0.88%	United States
PPG 1 7/8 06/01/25	PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	0.87%	United States
ISPIM 4 3/8 08/29/27	FINANCIAL AND INSURANCE ACTIVITIES	0.79%	Italy
OBL 0 10/18/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	0.72%	Germany
NGGLN 2.179 06/30/26	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	0.72%	United Kingdom
IBM 0.95 05/23/25	MANUFACTURING	0.71%	United States

What was the proportion of sustainability-related investments?

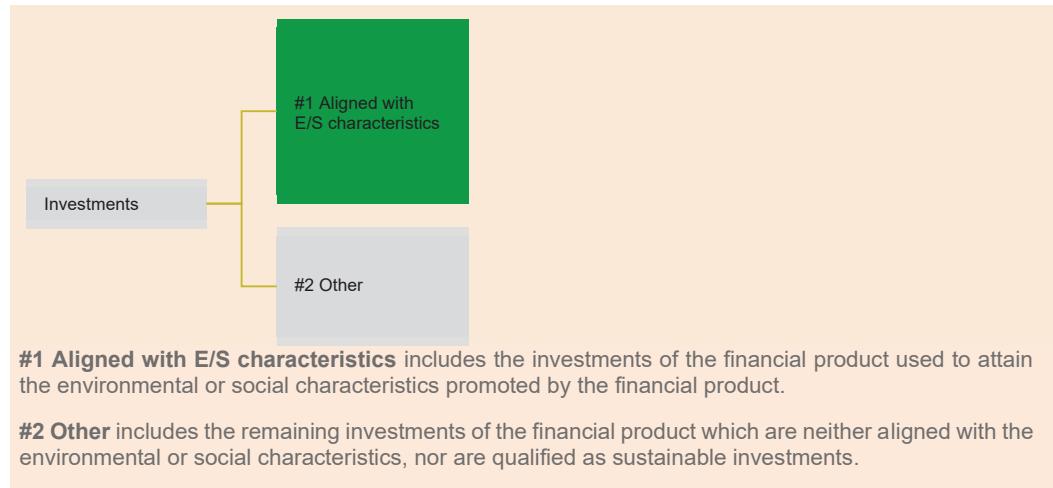

● What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 97.53%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics). The remaining proportion (2.47% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

Asset allocation

describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	54.28%
FINANCIAL AND INSURANCE ACTIVITIES	K	16.85%
MANUFACTURING	C	9.24%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	5.64%
INFORMATION AND COMMUNICATION	J	4.15%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	1.78%
TRANSPORTATION AND STORAGE	H	1.76%
REAL ESTATE ACTIVITIES	L	0.83%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	0.60%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	0.26%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

Yes

In fossil gas

In nuclear energy

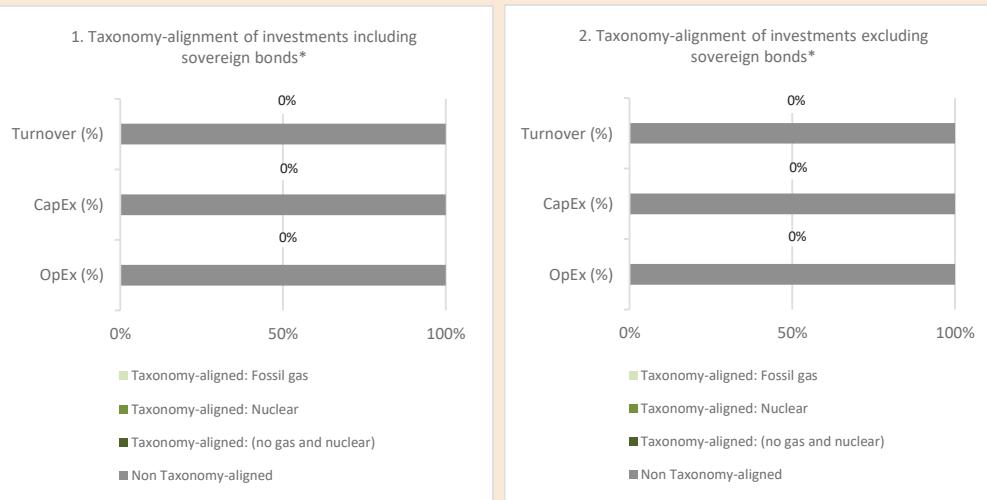

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 46.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

 are sustainable investments with an environmental objective that **do not** take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.
- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that average ESG portfolio scoring is above the score determined as a weighted average of the scores for the AUM of each asset class that make up the financial product.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Euro Bond Long Term

Legal entity identifier 5493003WW14P3X10VO44

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio. To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
BTPS 2.45 09/01/50	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	4.63%	Italy
BGB 5 03/28/35	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	4.56%	Belgium
FRTR 4 10/25/38	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	4.26%	France
DBR 4 3/4 07/04/34	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	4.23%	Germany
DBR 0 08/15/50	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	4.23%	Germany
DBR 3 1/4 07/04/42	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	4.17%	Germany
FRTR 4 3/4 04/25/35	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	4.02%	France
BTPS 2 1/4 09/01/36	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	3.82%	Italy
BTPS 4 3/4 09/01/44	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	3.69%	Italy

DBR 4 01/04/37	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	3.21%	Germany
SPGB 4.9 07/30/40	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	3.12%	Spain

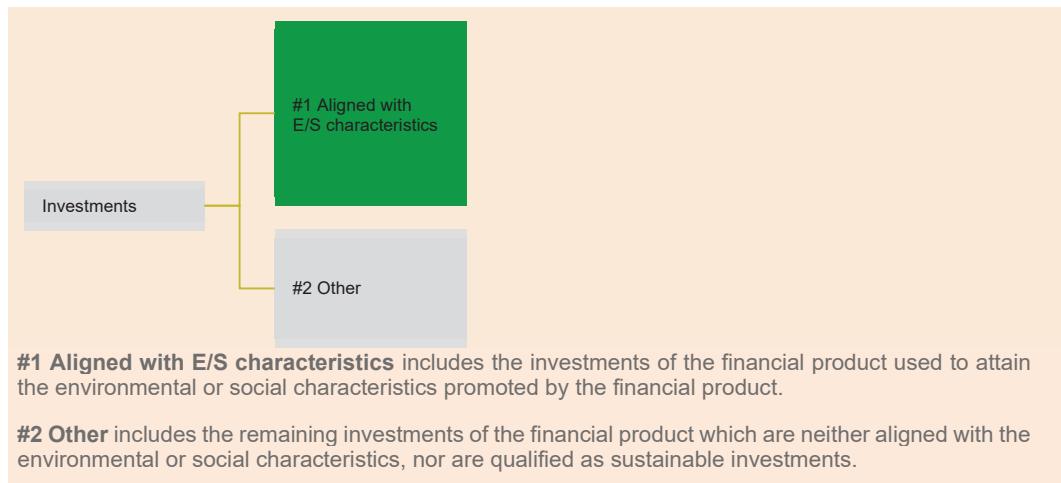

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 100%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics). The remaining proportion (0% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	99.61%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

In nuclear energy

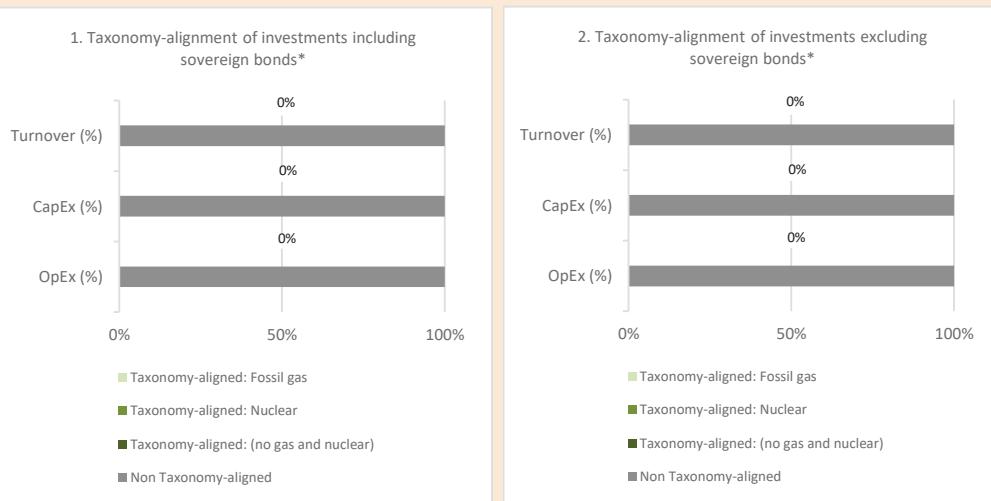

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Flexible Emerging Markets

Legal entity identifier 549300I1SZABISFZGT73

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Investment Manager excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities were excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company verified the PAI data through a periodic monitoring report, where the values of the indicators are consulted at product level and, where present and possible, at the respective benchmark level to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that average ESG portfolio scoring is above the score determined as a weighted average of the scores for the AUM of each asset class that make up the financial product.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable
- **How did this financial product perform compared with the reference benchmark?**

Not applicable
- **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Euro Bond

Legal entity identifier 549300YEIHEJZ8086J72

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio. To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
BTPS 2 02/01/28	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	6.41%	Italy
FRTR 1 11/25/25	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	5.46%	France
BTPS 0 1/2 02/01/26	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	4.46%	Italy
FRTR 0 3/4 05/25/28	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	4.09%	France
FRTR 0 11/25/29	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	3.98%	France
BTPS 2 1/2 12/01/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	3.58%	Italy

FRTR 0 1/2 05/25/29	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	2.59%	France

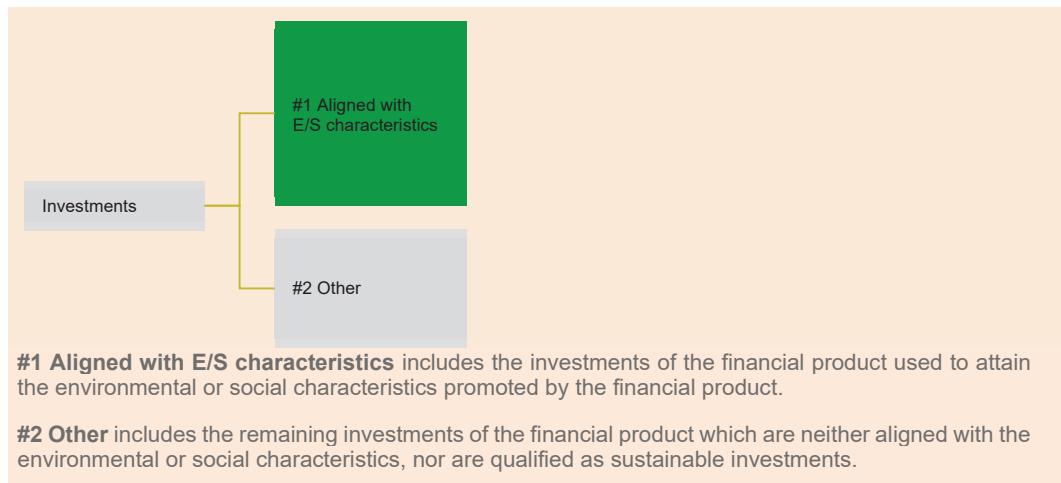

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 100%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics). The remaining proportion (0% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	98.69%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

In nuclear energy

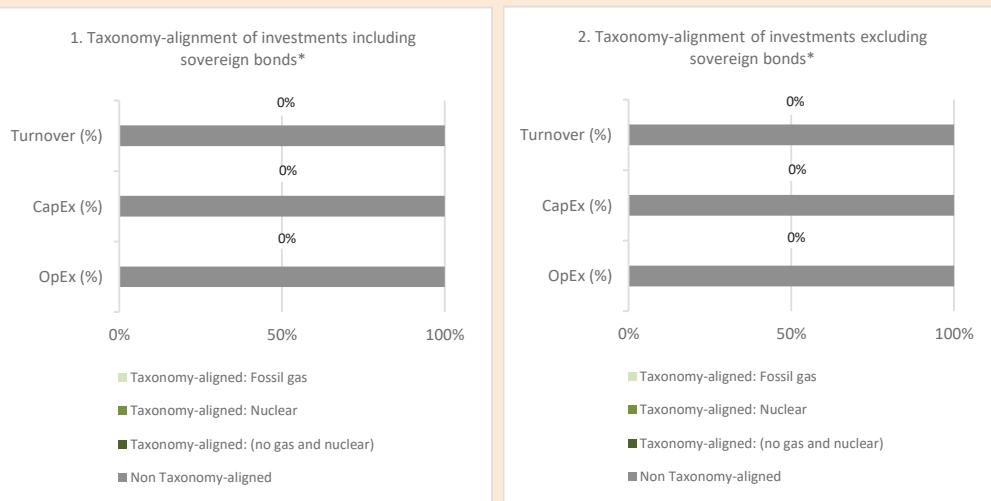

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 1.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Equity Italy

Legal entity identifier 5493006D0RFJ76WQRN58

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 50.88% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
ENEL SPA	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	9.21%	Italy
UNICREDIT SPA	FINANCIAL AND INSURANCE ACTIVITIES	8.82%	Italy
INTESA SANPAOLO	FINANCIAL AND INSURANCE ACTIVITIES	8.65%	Italy
STELLANTIS NV	MANUFACTURING	6.08%	Netherlands
FERRARI NV	MANUFACTURING	5.96%	Netherlands
ENI SPA	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	4.01%	Italy
ASSICURAZIONI GENERALI	FINANCIAL AND INSURANCE ACTIVITIES	3.70%	Italy
STMICROELECTRONICS NV	MANUFACTURING	3.56%	Netherlands
CNH INDUSTRIAL NV	MANUFACTURING	2.65%	Netherlands
SNAM SPA	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.97%	Italy
PRYSMIAN SPA	MANUFACTURING	1.94%	Italy
MONCLER SPA	FINANCIAL AND INSURANCE ACTIVITIES	1.86%	Italy
TERNA-RETE ELETTRICA NAZIONA	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.71%	Italy
FINECOBANK SPA	FINANCIAL AND INSURANCE ACTIVITIES	1.64%	Italy
TENARIS SA	MANUFACTURING	1.56%	Luxembourg

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of investments in specific assets.

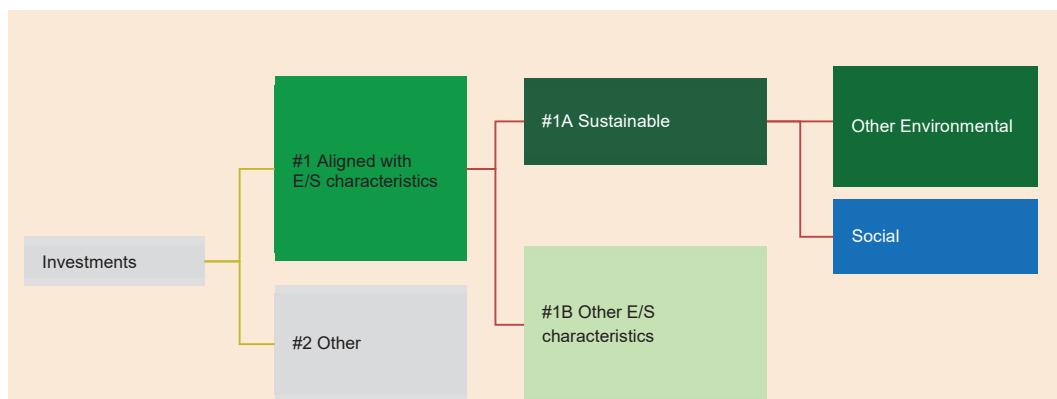

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 94.01%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (5.99% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 50.88%, compared to the minimum threshold of 30% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	37.19%
FINANCIAL AND INSURANCE ACTIVITIES	K	33.60%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	20.21%
INFORMATION AND COMMUNICATION	J	3.97%
CONSTRUCTION	F	1.60%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	1.22%
TRANSPORTATION AND STORAGE	H	0.92%
ARTS, ENTERTAINMENT AND RECREATION	R	0.64%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	0.42%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	0.23%

ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	0.04%
REAL ESTATE ACTIVITIES	L	0.01%
MINING AND QUARRYING	B	NaN
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	NaN

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

Yes

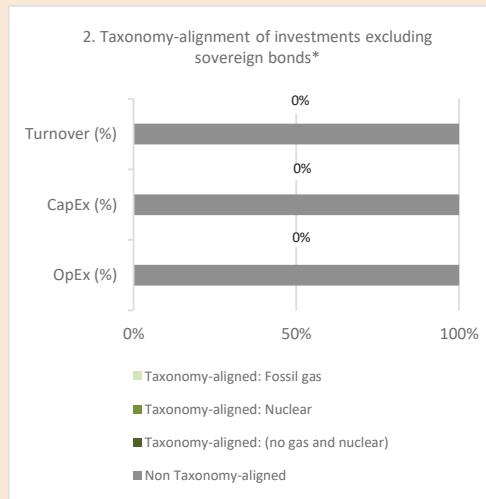

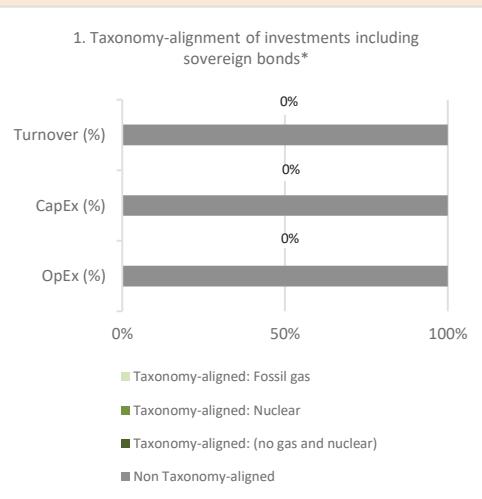

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 36.93% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 49.63% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 10%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);

- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.

- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark. To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

● How did this financial product perform compared with the reference benchmark?

Not applicable

● How did this financial product perform compared with the broad market index?

Not applicable.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Euro Corporate Bond

Legal entity identifier 549300LHCOHL6DW76R11

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

● ● No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.35% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which

means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the
environmental or social
characteristics promoted
by the financial product
are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
UBS 3 1/4 04/02/26	FINANCIAL AND INSURANCE ACTIVITIES	0.29%	Switzerland
DB 1 3/4 11/19/30	FINANCIAL AND INSURANCE ACTIVITIES	0.29%	Germany
BACR 1 1/8 03/22/31	FINANCIAL AND INSURANCE ACTIVITIES	0.28%	United Kingdom
BPCEGP 5 3/4 06/01/33	FINANCIAL AND INSURANCE ACTIVITIES	0.27%	France
BAC 1.776 05/04/27	FINANCIAL AND INSURANCE ACTIVITIES	0.26%	United States
CABKSM 4 1/4 09/06/30	FINANCIAL AND INSURANCE ACTIVITIES	0.26%	Spain
UNANA 1 1/8 02/12/27	MANUFACTURING	0.26%	Netherlands
BAYngr 4 5/8 05/26/33	MANUFACTURING	0.25%	Germany
BPLN 3 1/4 PERP	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	0.25%	United Kingdom
VW 3 7/8 PERP	MANUFACTURING	0.25%	Netherlands
AVY 1 1/4 03/03/25	MANUFACTURING	0.24%	United States
VW 0 7/8 01/31/28	MANUFACTURING	0.24%	Germany
TTEFP 1 5/8 PERP	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	0.23%	France
ISPM 4 3/8 08/29/27	FINANCIAL AND INSURANCE ACTIVITIES	0.23%	Italy
INTNED 2 1/8 05/26/31	FINANCIAL AND INSURANCE ACTIVITIES	0.23%	Netherlands

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

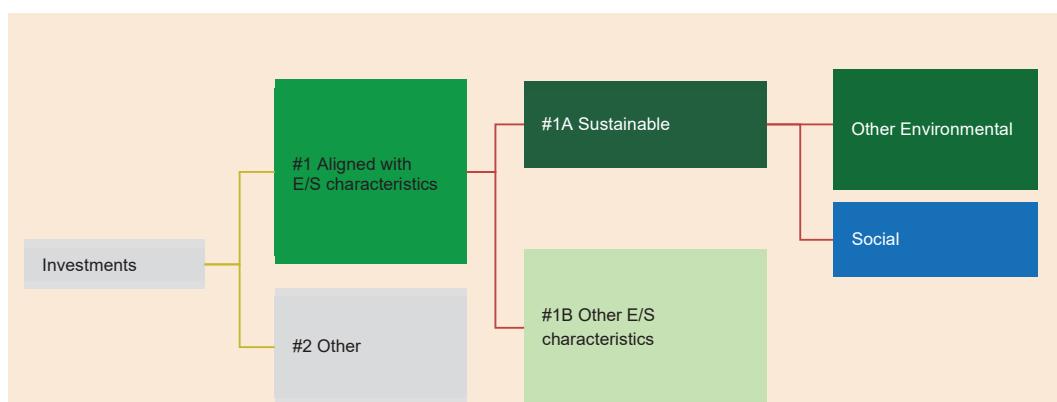

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 95.33, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (4.67% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 49.35%, compared to the minimum threshold of 20% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	K	37.43%
MANUFACTURING	C	19.95%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	14.09%
INFORMATION AND COMMUNICATION	J	6.87%
REAL ESTATE ACTIVITIES	L	4.55%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	2.71%
TRANSPORTATION AND STORAGE	H	2.44%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	2.23%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	1.62%
CONSTRUCTION	F	0.82%
MINING AND QUARRYING	B	0.63%
WATER SUPPLY; SEWERAGE, WASTE	E	0.62%

MANAGEMENT AND REMEDIATION ACTIVITIES		
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	0.26%
ARTS, ENTERTAINMENT AND RECREATION	R	0.19%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	0.17%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

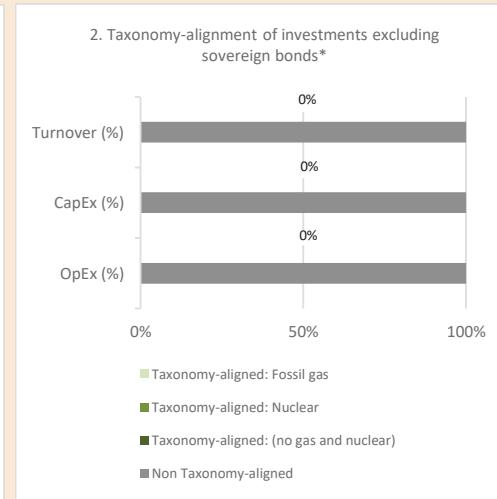

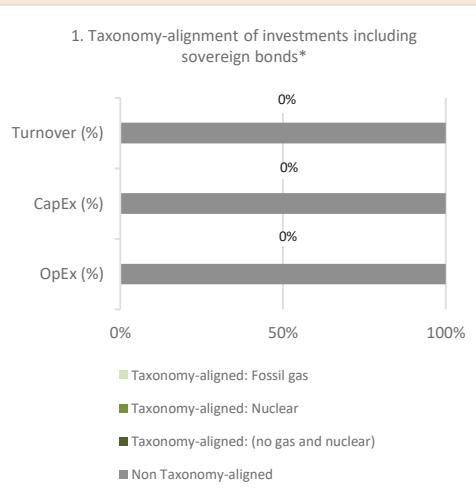

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 36.11% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 44.42% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.
- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or

environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

● **How did this financial product perform compared with the reference benchmark?**

Not applicable

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Equity Europe

Legal entity identifier 549300MORR1P21SN1D66

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55.57% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
NOVO NORDISK A/S-B	MANUFACTURING	3.95%	Denmark
NESTLE SA-REG	ACCOMMODATION AND FOOD SERVICE ACTIVITIES	3.94%	Switzerland
ASML HOLDING NV	MANUFACTURING	3.47%	Netherlands
LVMH MOET HENNESSY LOUIS VUI	MANUFACTURING	3.21%	France
ASTRAZENECA PLC	MANUFACTURING	2.75%	United Kingdom
NOVARTIS AG-REG	MANUFACTURING	2.51%	Switzerland
ROCHE HOLDING AG-GENUSSCHEIN	MANUFACTURING	2.47%	Switzerland
TOTALENERGIES SE	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	2.34%	France
SHELL PLC	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.96%	United Kingdom
UNILEVER PLC	MANUFACTURING	1.95%	United Kingdom
RIO TINTO PLC	MINING AND QUARRYING	1.94%	United Kingdom
HSBC HOLDINGS PLC	FINANCIAL AND INSURANCE ACTIVITIES	1.86%	United Kingdom
SAP SE	INFORMATION AND COMMUNICATION	1.75%	Germany
L'OREAL	MANUFACTURING	1.69%	France
ALLIANZ SE-REG	FINANCIAL AND INSURANCE ACTIVITIES	1.62%	Germany

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

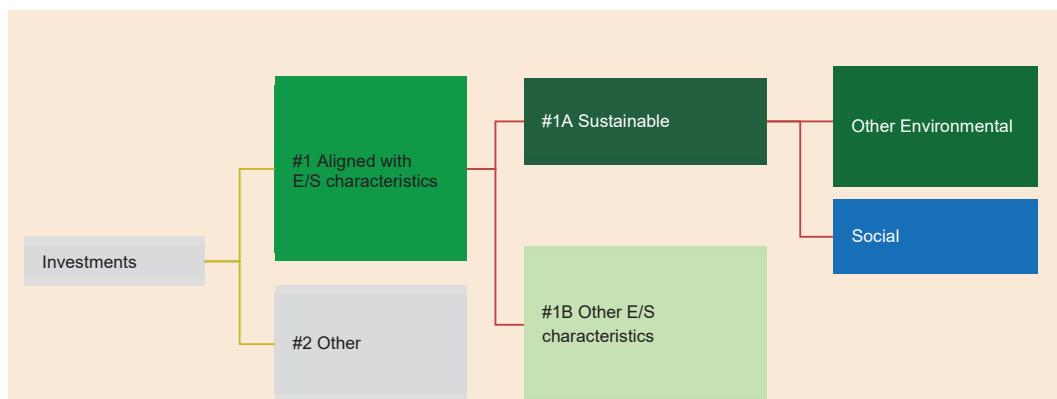

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 99.69%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0.31% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 55.57%, compared to the minimum threshold of 30% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	50.02%
FINANCIAL AND INSURANCE ACTIVITIES	K	16.60%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	10.10%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	5.45%
INFORMATION AND COMMUNICATION	J	5.23%

ARTS, ENTERTAINMENT AND RECREATION	R	0.66%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (Opex) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

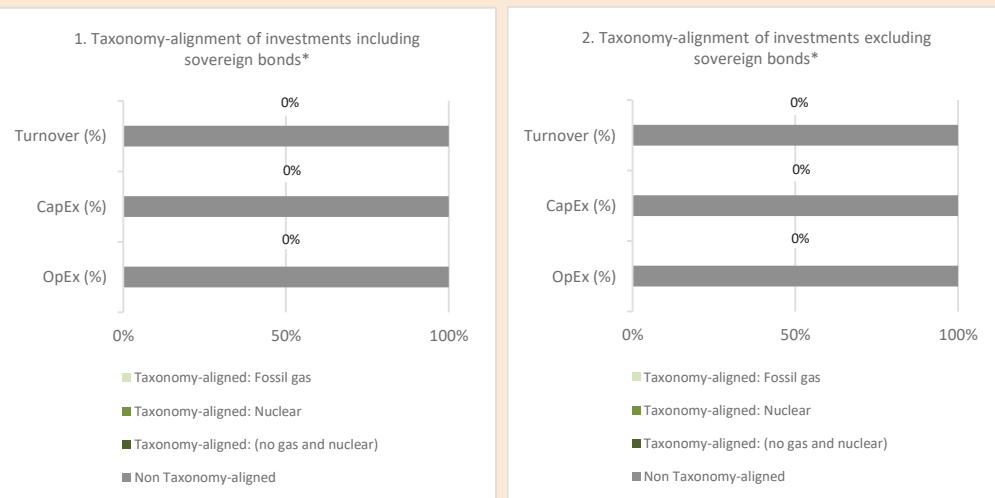

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 42.73 % of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 20%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 54.39% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.
- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Equity USA Blue Chip

Legal entity identifier 5493003ABBXTPGX5KX46

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.03% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
APPLE INC	MANUFACTURING	7.80%	United States
MICROSOFT CORP	INFORMATION AND COMMUNICATION	6.16%	United States
ALPHABET INC-CL A	INFORMATION AND COMMUNICATION	4.37%	United States
AMAZON.COM INC	INFORMATION AND COMMUNICATION	3.66%	United States
NVIDIA CORP	MANUFACTURING	3.39%	United States
TESLA INC	MANUFACTURING	2.08%	United States
META PLATFORMS INC-CLASS A	INFORMATION AND COMMUNICATION	1.51%	United States
JPMORGAN CHASE & CO	FINANCIAL AND INSURANCE ACTIVITIES	1.48%	United States
BROADCOM INC	MANUFACTURING	1.48%	United States
BERKSHIRE HATHAWAY INC-CL B	FINANCIAL AND INSURANCE ACTIVITIES	1.42%	United States
VISA INC-CLASS A SHARES	FINANCIAL AND INSURANCE ACTIVITIES	1.38%	United States
MASTERCARD INC - A	FINANCIAL AND INSURANCE ACTIVITIES	1.36%	United States
EXXON MOBIL CORP	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.26%	United States
ADOBE INC	INFORMATION AND COMMUNICATION	1.21%	United States
HOME DEPOT INC	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	1.12%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

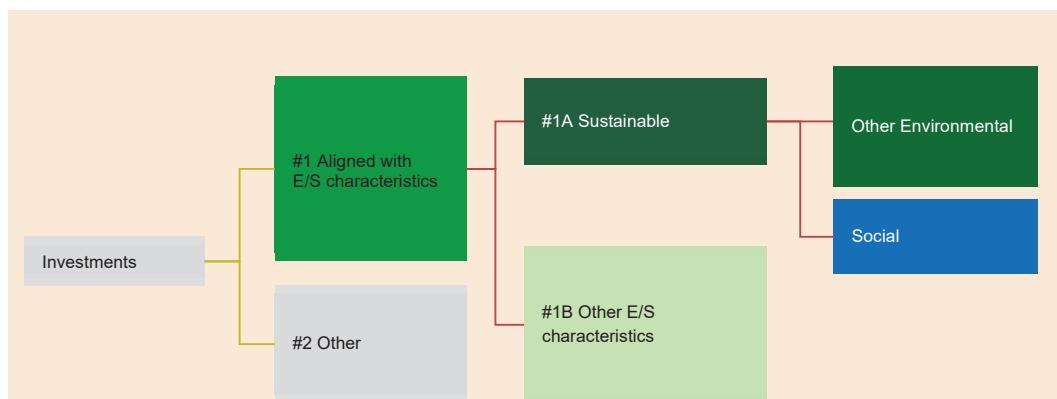

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 99.88%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0.12% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 47.03%, compared to the minimum threshold of 30% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	41.92%
INFORMATION AND COMMUNICATION	J	26.47%
FINANCIAL AND INSURANCE ACTIVITIES	K	12.14%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	4.79%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	4.44%
TRANSPORTATION AND STORAGE	H	1.87%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	1.68%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	1.58%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	1.54%
REAL ESTATE ACTIVITIES	L	1.53%

ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	1.21%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	0.57%
MINING AND QUARRYING	B	0.31%
ARTS, ENTERTAINMENT AND RECREATION	R	0.10%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

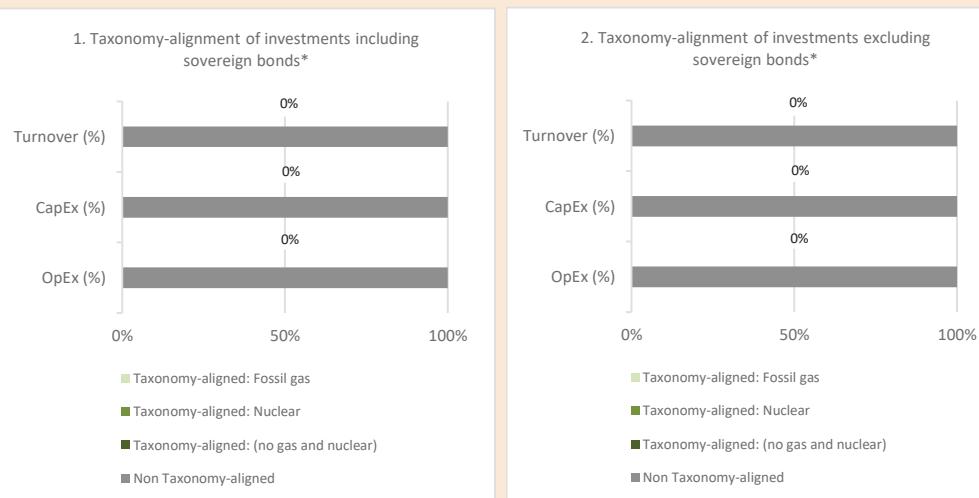

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● ***What was the share of investments made in transitional and enabling activities?***

The share of investments in transitional and enabling activities was 0%.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that **do not** take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-fund, as of 31/08/23, invested 33.21 % of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 20%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 44.55% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.
- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or

environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

● **How did this financial product perform compared with the reference benchmark?**

Not applicable

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Equity Japan

Legal entity identifier 549300TH6O1D5W0ZMP64

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.27% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
TOYOTA MOTOR CORP	MANUFACTURING	3.77%	Japan
HONDA MOTOR CO LTD	MANUFACTURING	2.35%	Japan
SONY GROUP CORP	MANUFACTURING	2.27%	Japan
MITSUBISHI UFJ FINANCIAL GRO	FINANCIAL AND INSURANCE ACTIVITIES	2.08%	Japan
MITSUBISHI CORP	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	1.90%	Japan
RENESAS ELECTRONICS CORP	MANUFACTURING	1.89%	Japan
ORIX CORP	ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	1.88%	Japan
KDDI CORP	INFORMATION AND COMMUNICATION	1.76%	Japan
KEYENCE CORP	MANUFACTURING	1.72%	Japan
TOKYO ELECTRON LTD	MANUFACTURING	1.66%	Japan
SOFTBANK CORP	INFORMATION AND COMMUNICATION	1.65%	Japan
SUBARU CORP	MANUFACTURING	1.61%	Japan
MITSUI & CO LTD	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	1.55%	Japan
ITOCHU CORP	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	1.54%	Japan
ASTELLAS PHARMA INC	MANUFACTURING	1.49%	Japan

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

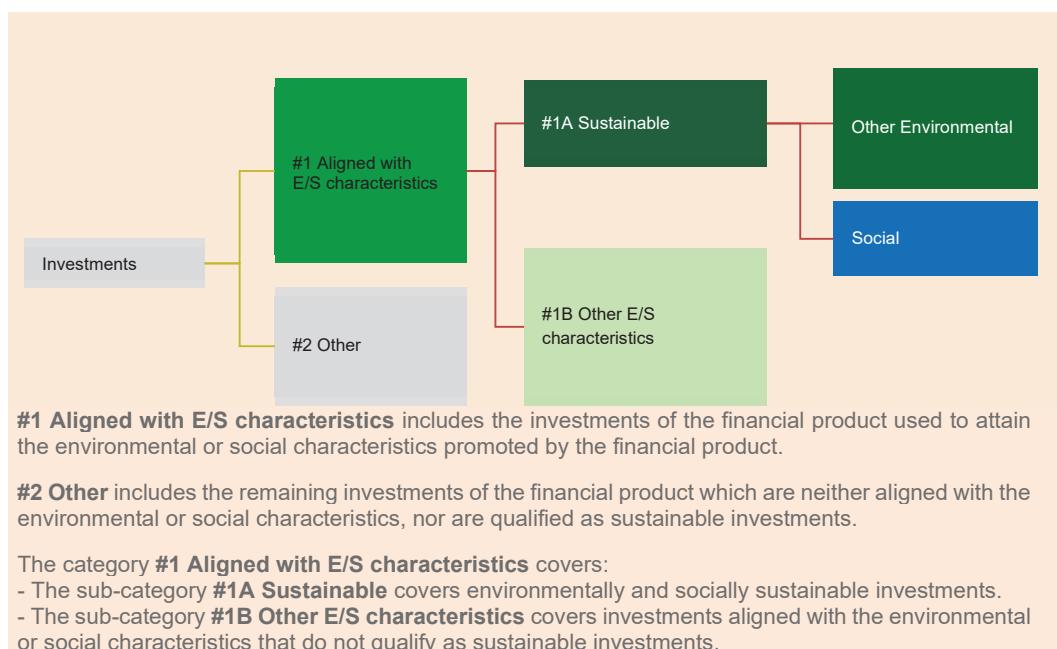

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 100%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 71.27%, compared to the minimum threshold of 30% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	44.45%
FINANCIAL AND INSURANCE ACTIVITIES	K	10.94%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	8.23%
INFORMATION AND COMMUNICATION	J	7.72%
TRANSPORTATION AND STORAGE	H	4.69%
CONSTRUCTION	F	4.36%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	3.86%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	3.69%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	3.39%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	3.26%
REAL ESTATE ACTIVITIES	L	2.26%

MINING AND QUARRYING	B	1.35%
ARTS, ENTERTAINMENT AND RECREATION	R	1.04%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

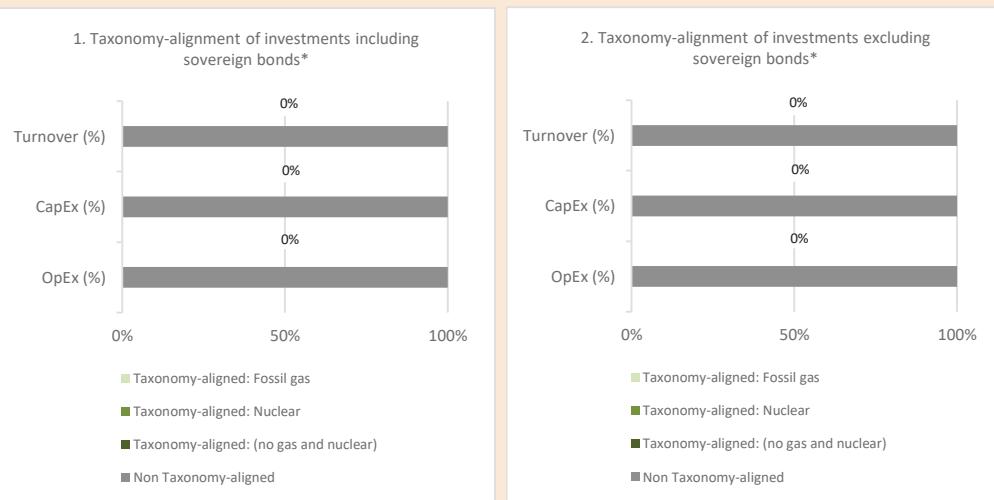

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 40.54 % of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 20%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 62.99% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.
- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Equity Pacific ex Japan

Legal entity identifier 5493009ZKO35OIMTWC62

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.43% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	MANUFACTURING	5.80%	Taiwan
SAMSUNG ELECTRONICS CO LTD	MANUFACTURING	3.52%	Korea
TENCENT HOLDINGS LTD	INFORMATION AND COMMUNICATION	3.46%	China
ALIBABA GROUP HOLDING LTD	INFORMATION AND COMMUNICATION	2.74%	Cayman Islands
UBS 0 12/22/27	FINANCIAL AND INSURANCE ACTIVITIES	2.30%	Switzerland
BHP GROUP LTD	MINING AND QUARRYING	1.76%	Australia
AIA GROUP LTD	FINANCIAL AND INSURANCE ACTIVITIES	1.67%	Hong Kong
COMMONWEALTH BANK OF AUSTRAL	FINANCIAL AND INSURANCE ACTIVITIES	1.47%	Australia
RELIANCE IND-SPONS GDR 144A	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.36%	India
CSL LTD	MANUFACTURING	1.30%	Australia
ICICI BANK LTD	FINANCIAL AND INSURANCE ACTIVITIES	1.27%	India
HDFC BANK LIMITED	FINANCIAL AND INSURANCE ACTIVITIES	1.08%	India

DBS GROUP HOLDINGS LTD	FINANCIAL AND INSURANCE ACTIVITIES	0.95%	Singapore
SK HYNIX INC	MANUFACTURING	0.93%	Korea

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of investments in specific assets.

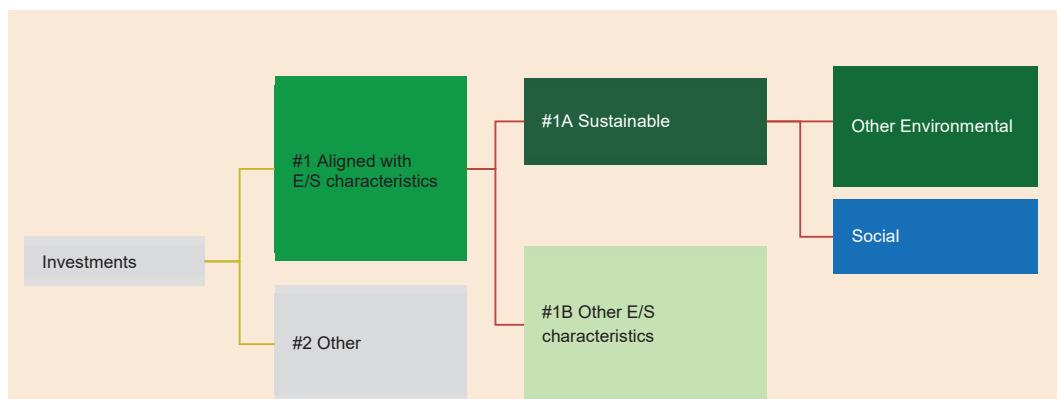

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 99.04, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0.96% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 49.43%, compared to the minimum threshold of 20% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	28.03%
FINANCIAL AND INSURANCE ACTIVITIES	K	25.46%
INFORMATION AND COMMUNICATION	J	16.06%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	5.52%
REAL ESTATE ACTIVITIES	L	4.18%
MINING AND QUARRYING	B	4.05%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	2.35%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	2.33%
TRANSPORTATION AND STORAGE	H	1.21%
ARTS, ENTERTAINMENT AND RECREATION	R	1.01%
PROFESSIONAL, SCIENTIFIC AND	M	0.83%

TECHNICAL ACTIVITIES		
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	0.74%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	0.57%
CONSTRUCTION	F	0.54%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	0.07%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

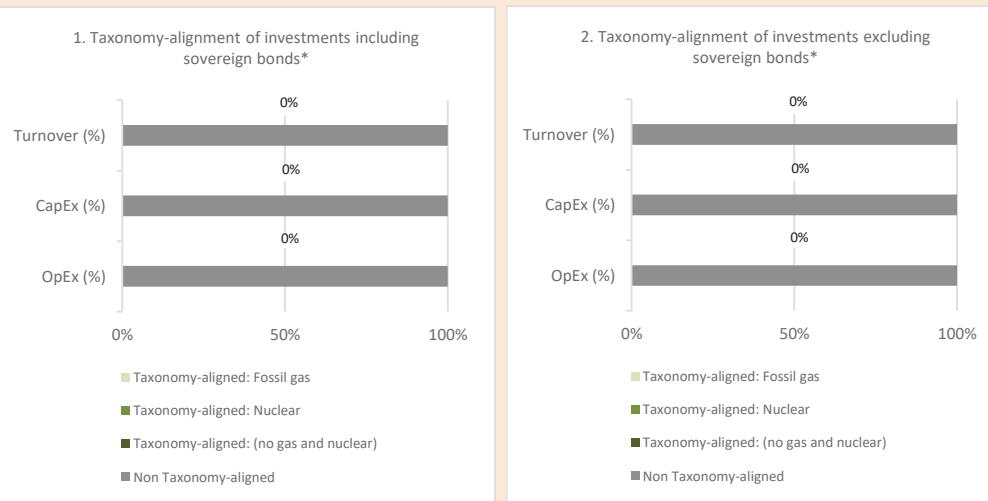

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● ***What was the share of investments made in transitional and enabling activities?***

The share of investments in transitional and enabling activities was 0%.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-fund, as of 31/08/23, invested 29.89% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 44.92% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.
- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or

environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable

● **How did this financial product perform compared with the reference benchmark?**

Not applicable

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Global

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Legal entity identifier 549300UN99QCXY3U4O13

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 36.93% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
APPLE INC	MANUFACTURING	3.43%	United States
ISHARES EURO CORP 1-5YR	-	2.76%	Ireland
MICROSOFT CORP	INFORMATION AND COMMUNICATION	2.72%	United States
BKO 2 1/2 03/13/25	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	2.49%	Germany
FRTR 0 02/25/25	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	2.38%	France
BTPS 0 08/01/26	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	1.95%	Italy

INTESA SANPAOLO	FINANCIAL AND INSURANCE ACTIVITIES	1.52%	Italy
UNICREDIT SPA	FINANCIAL AND INSURANCE ACTIVITIES	1.39%	Italy
FRTR 0 1/4 11/25/26	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	1.25%	France

What was the proportion of sustainability-related investments?

• What was the asset allocation?

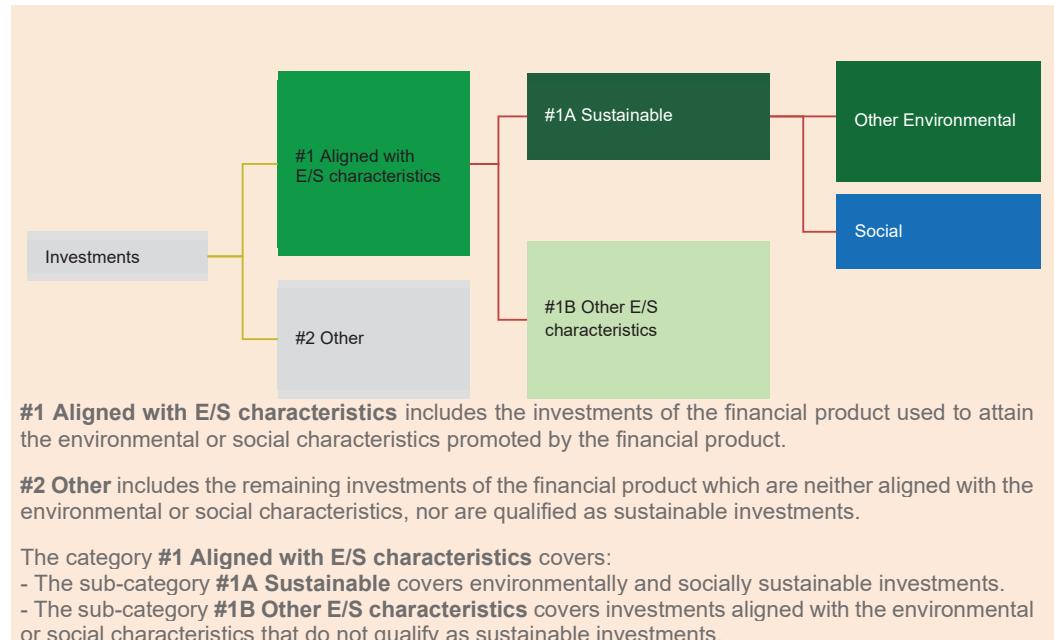

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 100, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 36.93%, compared to the minimum threshold of 20% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

Asset allocation describes the share of investments in specific assets.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	32.64%
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	21.34%

Enabling activities
directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities
are economic

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Yes

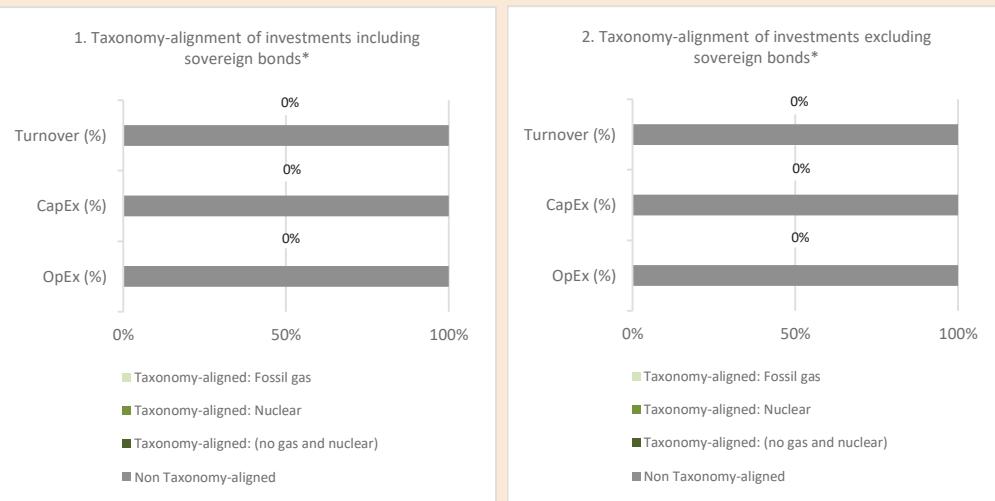

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 77.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 26.69% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 35% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Euro Bond Defensive

Legal entity identifier 549300S28JIB177JCC17

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio. To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Equity Global High Dividend

Legal entity identifier 549300EPPNSUGO83B626

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.92% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
EXXON MOBIL CORP	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	3.32%	United States
JOHNSON & JOHNSON	MANUFACTURING	3.08%	United States
BROADCOM INC	MANUFACTURING	2.91%	United States
HOME DEPOT INC	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	2.72%	United States
PROCTER & GAMBLE CO/THE	MANUFACTURING	2.64%	United States
NESTLE SA-REG	ACCOMMODATION AND FOOD SERVICE ACTIVITIES	2.58%	Switzerland
MERCK & CO. INC.	MANUFACTURING	2.18%	United States
CHEVRON CORP	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	2.07%	United States
ABBVIE INC	MANUFACTURING	1.95%	United States
CISCO SYSTEMS INC	INFORMATION AND COMMUNICATION	1.93%	United States
COCA-COLA CO/THE	MANUFACTURING	1.91%	United States
PEPSICO INC	MANUFACTURING	1.88%	United States
ROCHE HOLDING AG-GENUSSCHEIN	MANUFACTURING	1.74%	Switzerland
NOVARTIS AG-REG	MANUFACTURING	1.63%	Switzerland
PFIZER INC	MANUFACTURING	1.59%	United States

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of investments in specific assets.

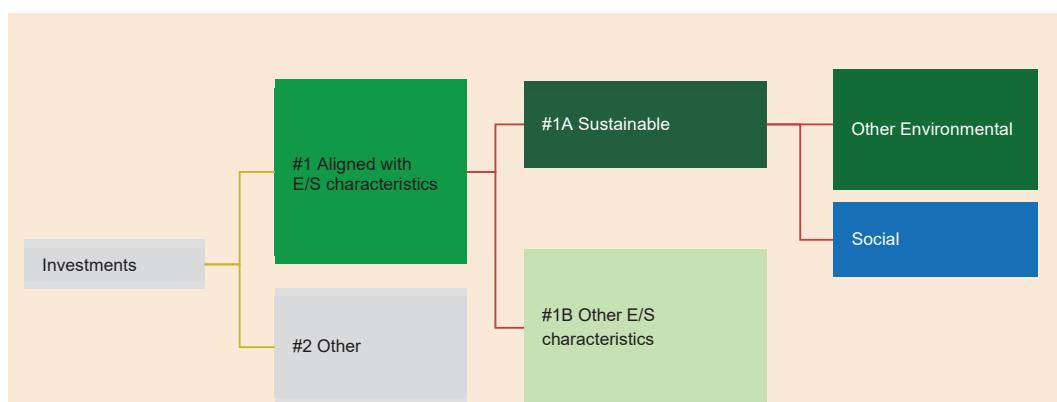

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 99.96%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0.04% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 51.92%, compared to the minimum threshold of 30% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	46.33%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	14.73%
FINANCIAL AND INSURANCE ACTIVITIES	K	12.36%
INFORMATION AND COMMUNICATION	J	6.73%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	5.20%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	4.29%
MINING AND QUARRYING	B	2.88%
TRANSPORTATION AND STORAGE	H	2.11%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	1.81%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	1.25%

CONSTRUCTION	F	1.21%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	0.68%
ARTS, ENTERTAINMENT AND RECREATION	R	0.03%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

Yes

In fossil gas

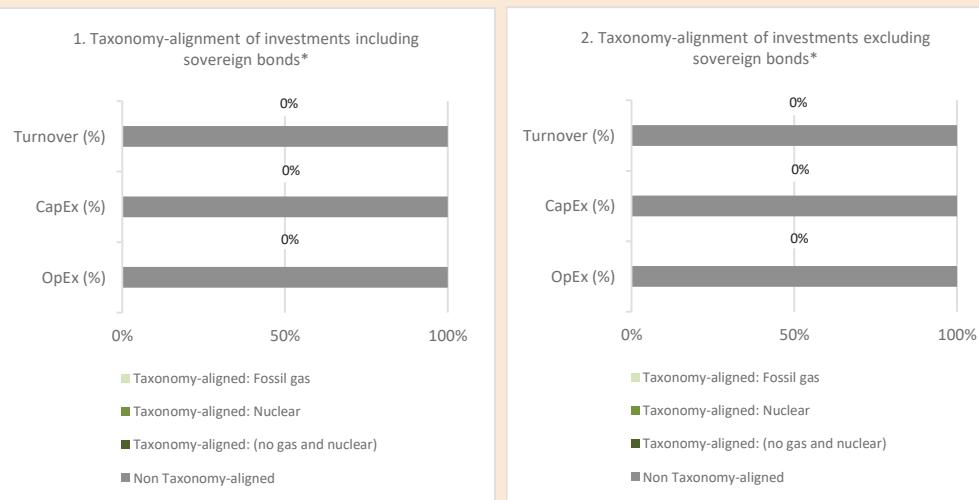

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 36.47 % of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 20%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 47.9% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.
- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Bond Global Emerging Markets

Legal entity identifier 549300WHZVKR11DMXO35

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio. To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI). The ESG score of the portfolio was BB.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU)

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Equity Global Emerging Markets

Legal entity identifier 549300GBDNZ2H3FWJE03

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.71% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	MANUFACTURING	6.37%	Taiwan
TENCENT HOLDINGS LTD	INFORMATION AND COMMUNICATION	4.02%	China
SAMSUNG ELECTRONICS CO LTD	MANUFACTURING	3.69%	Korea
ALIBABA GROUP HOLDING LTD	INFORMATION AND COMMUNICATION	2.58%	Cayman Islands
UBS 0 12/22/27	FINANCIAL AND INSURANCE ACTIVITIES	2.14%	Switzerland
HDFC BANK LIMITED	FINANCIAL AND INSURANCE ACTIVITIES	1.35%	India
RELIANCE INDUSTRIES LTD	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.29%	India
MEITUAN-CLASS B	INFORMATION AND COMMUNICATION	1.23%	Cayman Islands
ICICI BANK LTD	FINANCIAL AND INSURANCE ACTIVITIES	1.05%	India
HANG LUNG PROPERTIES LTD	REAL ESTATE ACTIVITIES	1.03%	Hong Kong
ALIBABA GROUP HOLDING-SP ADR	INFORMATION AND COMMUNICATION	0.93%	China
HON HAI PRECISION INDUSTRY	MANUFACTURING	0.86%	Taiwan
PDD HOLDINGS INC	INFORMATION AND COMMUNICATION	0.83%	Cayman Islands
MITRA ADIPERKASA TBK PT	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	0.80%	Indonesia
CHINA CONSTRUCTION BANK-H	FINANCIAL AND INSURANCE ACTIVITIES	0.78%	China

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of investments in specific assets.

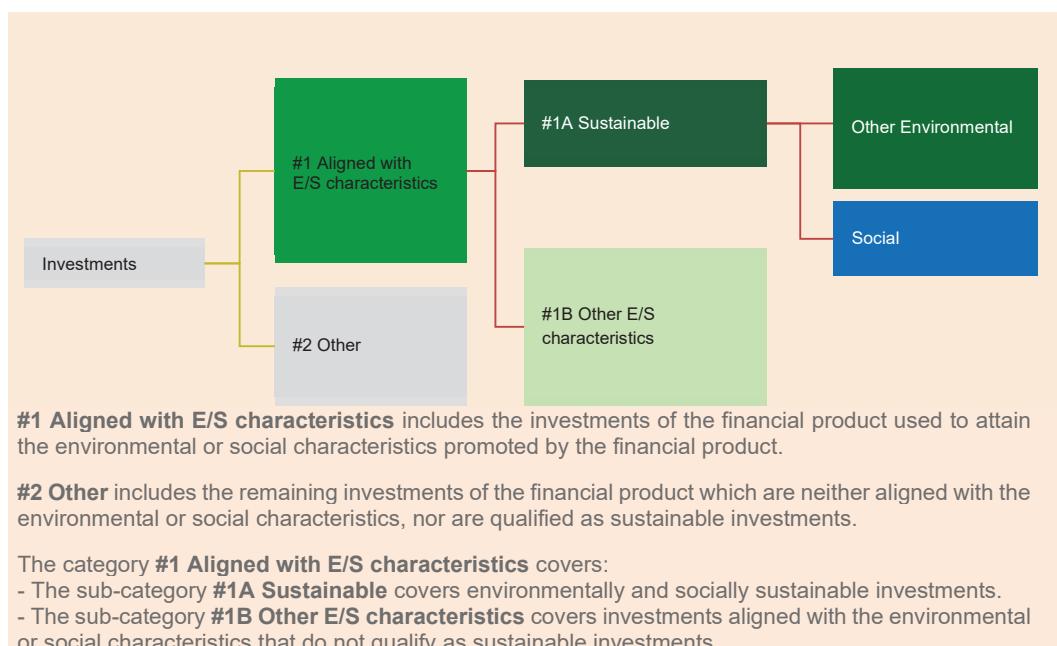

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 98.5, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (1.5% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 51.71%, compared to the minimum threshold of 20% (box #1A Sustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	31.41%
FINANCIAL AND INSURANCE ACTIVITIES	K	24.52%
INFORMATION AND COMMUNICATION	J	18.97%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	5.84%
REAL ESTATE ACTIVITIES	L	3.29%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	2.97%
MINING AND QUARRYING	B	2.89%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	2.32%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	2.19%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	1.22%
TRANSPORTATION AND STORAGE	H	1.20%

ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	0.60%
ARTS, ENTERTAINMENT AND RECREATION	R	0.45%
CONSTRUCTION	F	0.28%
EDUCATION	P	0.27%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

Yes

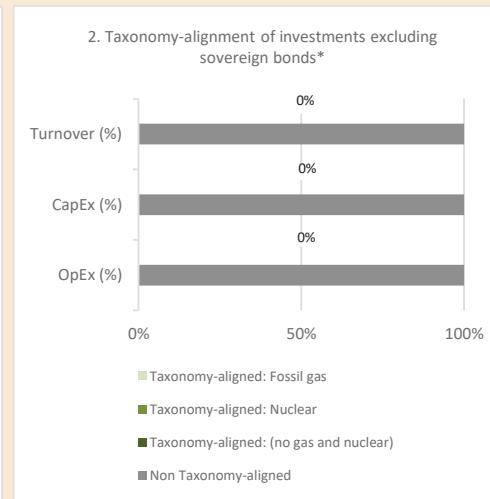

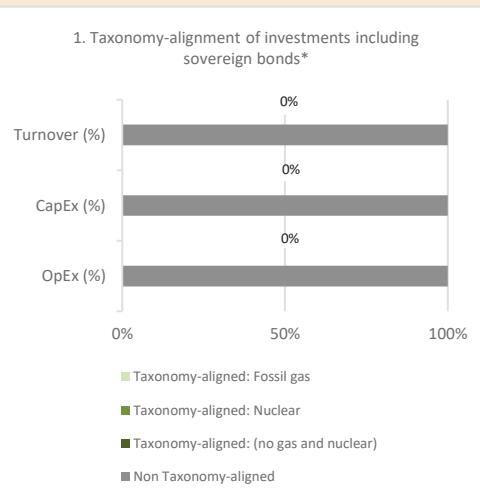

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 30.48% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 49.08% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);

- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.

- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Euro Cyclical

Legal entity identifier 549300ULGWRVHGW8GW76

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.18% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
LVMH MOET HENNESSY LOUIS VUI	MANUFACTURING	9.34%	France
SIEMENS AG-REG	MANUFACTURING	5.65%	Germany
AIR LIQUIDE SA	PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	4.68%	France

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of investments in specific assets.

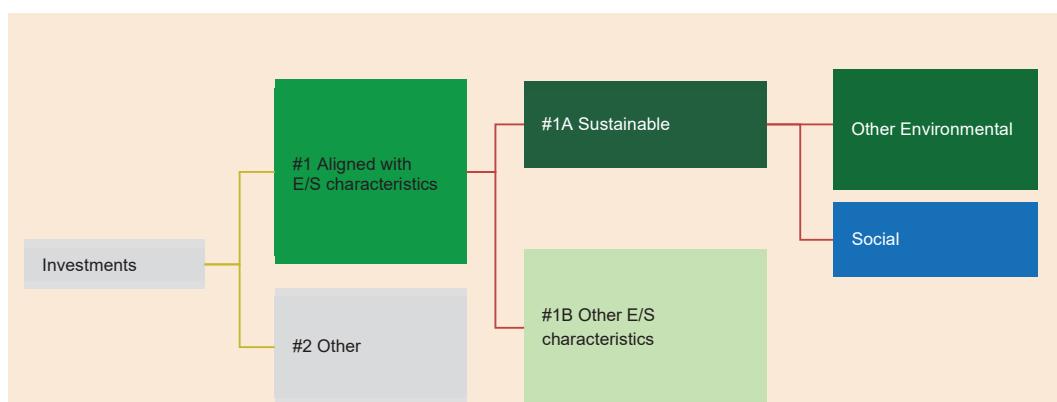

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 97.96%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (2.04% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 66.18%, compared to the minimum threshold of 30% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	63.40%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	8.97%
FINANCIAL AND INSURANCE ACTIVITIES	K	5.96%
INFORMATION AND COMMUNICATION	J	4.27%
TRANSPORTATION AND STORAGE	H	4.24%
CONSTRUCTION	F	3.40%
MINING AND QUARRYING	B	2.89%
ARTS, ENTERTAINMENT AND RECREATION	R	1.90%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	1.75%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	1.57%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND	G	1.20%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

In nuclear energy

No

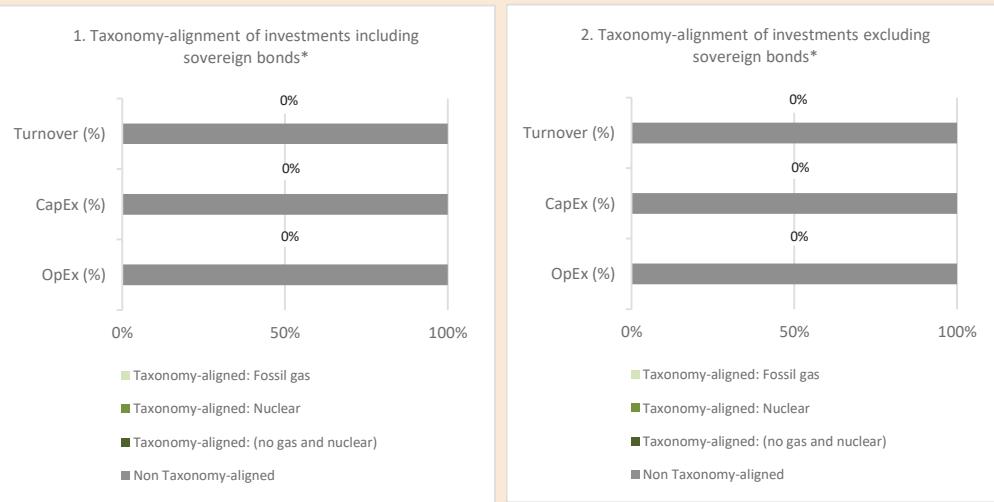

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 47.73 % of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 20%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 65.54% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.
- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Fonditalia Global Income

Legal entity identifier 54930070X6IGKLOR0F97

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Investment Manager excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities were excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company verified the PAI data through a periodic monitoring report, where the values of the indicators are consulted at product level and, where present and possible, at the respective benchmark level to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

In nuclear energy

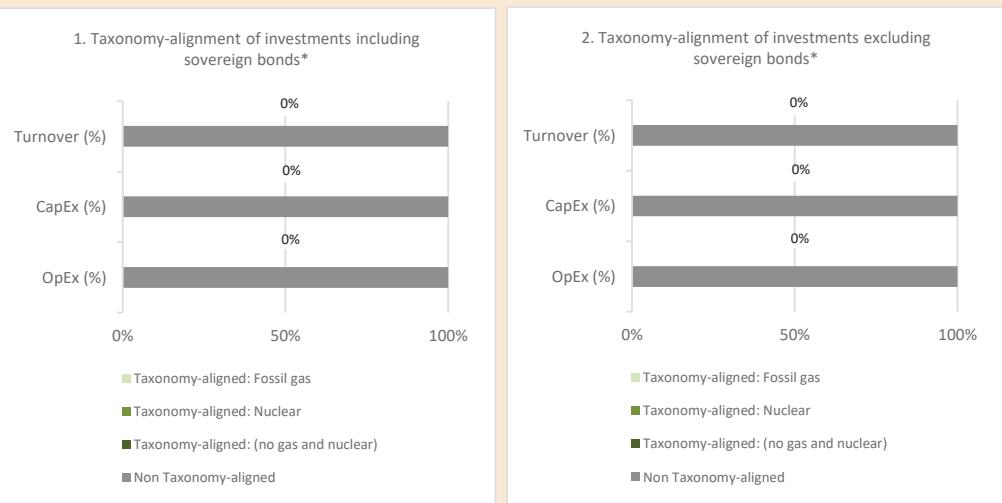

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

No

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 67.00 % of the total investment.

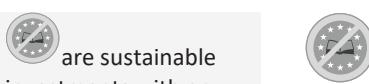

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that average ESG portfolio scoring is above the score determined as a weighted average of the scores for the AUM of each asset class that make up the financial product.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Euro Equity Defensive

Legal entity identifier 549300HYN0ZJ5QEKNJ56

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.56% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
TOTALENERGIES SE	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	9.79%	France
SANOFI	MANUFACTURING	8.80%	France
L'OREAL	MANUFACTURING	7.92%	France
IBERDROLA SA	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	5.35%	Spain
ENEL SPA	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	4.50%	Italy
ESSILORLUXOTTICA	MANUFACTURING	3.74%	France
ANHEUSER-BUSCH INBEV SA/NV	MANUFACTURING	3.60%	Belgium
BAYER AG-REG	MANUFACTURING	3.54%	Germany
ENI SPA	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	3.42%	Italy
PERNOD RICARD SA	MANUFACTURING	2.78%	France
KONINKLIJKE AHOLD DELHAIZE N	ACCOMMODATION AND FOOD SERVICE ACTIVITIES	2.71%	Netherlands
DANONE	ACCOMMODATION AND FOOD SERVICE ACTIVITIES	2.59%	France
HENKEL AG & CO KGAA VOR-PREF	MANUFACTURING	2.52%	Germany
RWE AG	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	2.22%	Germany
VEOLIA ENVIRONNEMENT	WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	1.87%	France

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

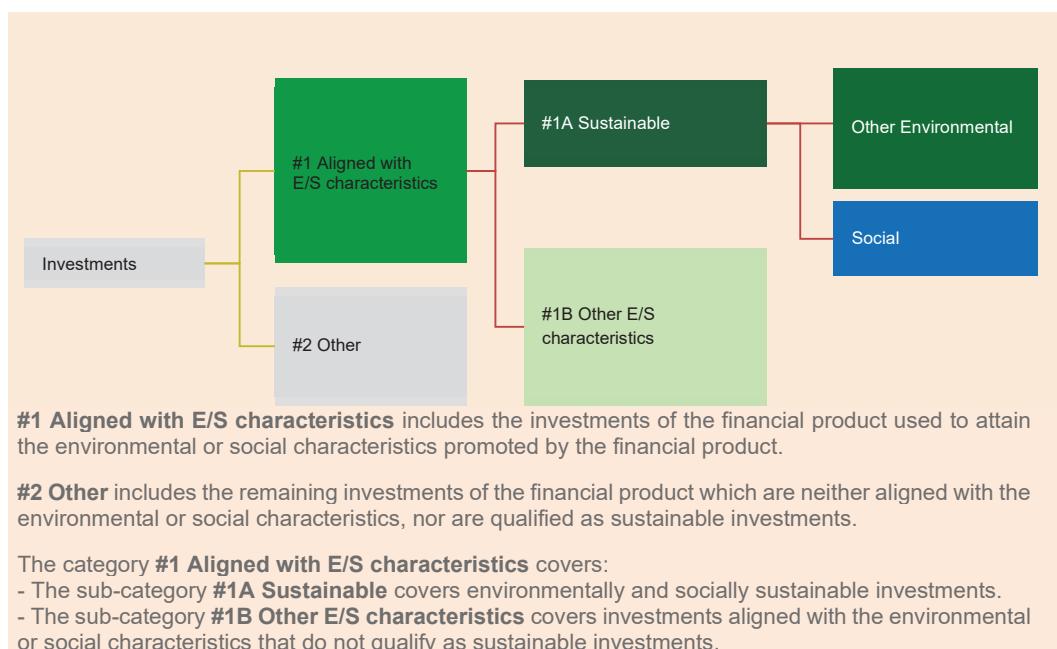

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 99.5%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0.5% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 32.56%, compared to the minimum threshold of 30% (box #1A Sustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	47.29%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	38.85%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	7.67%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	1.87%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	1.51%
MINING AND QUARRYING	B	1.45%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	0.61%
CONSTRUCTION	F	0.47%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

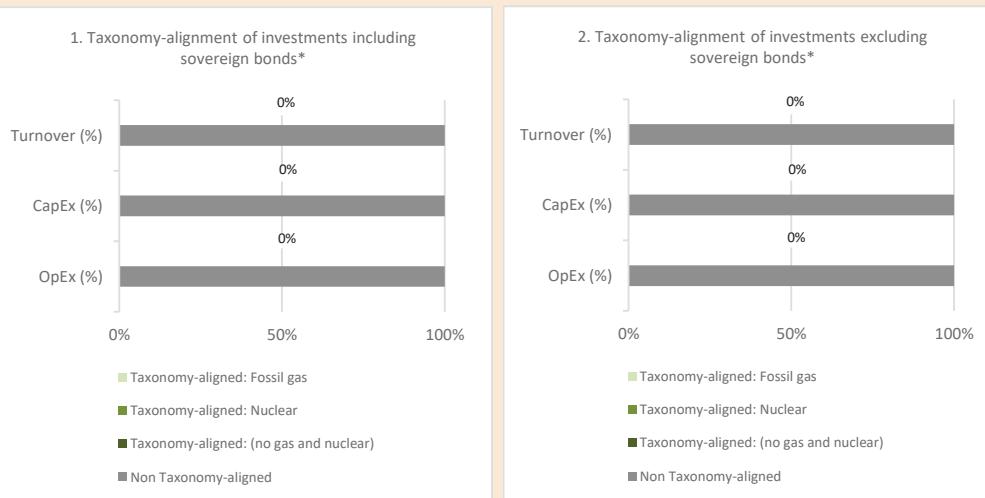

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 20.19 % of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 20%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 32.56% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Euro Financials

Legal entity identifier 549300LNV2NAENYP8P21

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** __%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** __%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.09% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
ALLIANZ SE-REG	FINANCIAL AND INSURANCE ACTIVITIES	8.97%	Germany
BNP PARIBAS	FINANCIAL AND INSURANCE ACTIVITIES	8.60%	France
AXA SA	FINANCIAL AND INSURANCE ACTIVITIES	7.40%	France
MUENCHENER RUECKVER AG-REG	FINANCIAL AND INSURANCE ACTIVITIES	7.15%	Germany
BANCO SANTANDER SA	FINANCIAL AND INSURANCE ACTIVITIES	6.71%	Spain
UNICREDIT SPA	FINANCIAL AND INSURANCE ACTIVITIES	4.83%	Italy
BANCO BILBAO VIZCAYA ARGENTA	FINANCIAL AND INSURANCE ACTIVITIES	4.82%	Spain
INTESA SANPAOLO	FINANCIAL AND INSURANCE ACTIVITIES	4.76%	Italy
ING GROEP NV	FINANCIAL AND INSURANCE ACTIVITIES	4.72%	Netherlands
DEUTSCHE BOERSE AG	FINANCIAL AND INSURANCE ACTIVITIES	4.57%	Germany
ASSICURAZIONI GENERALI	FINANCIAL AND INSURANCE ACTIVITIES	3.59%	Italy
KBC GROUP NV	FINANCIAL AND INSURANCE ACTIVITIES	2.98%	Belgium
CAIXABANK SA	FINANCIAL AND INSURANCE ACTIVITIES	2.88%	Spain
EDENRED	ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	2.82%	France
DEUTSCHE BANK AG-REGISTERED	FINANCIAL AND INSURANCE ACTIVITIES	2.57%	Germany

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of investments in specific assets.

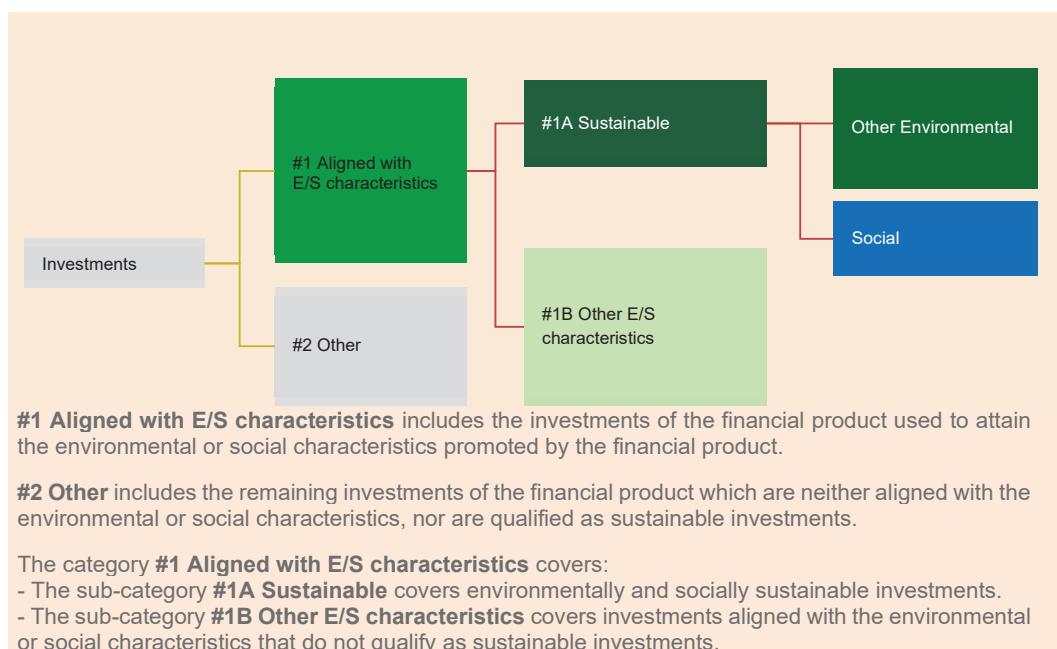

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 100%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 60.09%, compared to the minimum threshold of 30% (box #1A Sustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	K	93.75%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	5.36%
TRANSPORTATION AND STORAGE	H	0.61%

Enabling activities
directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic
activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

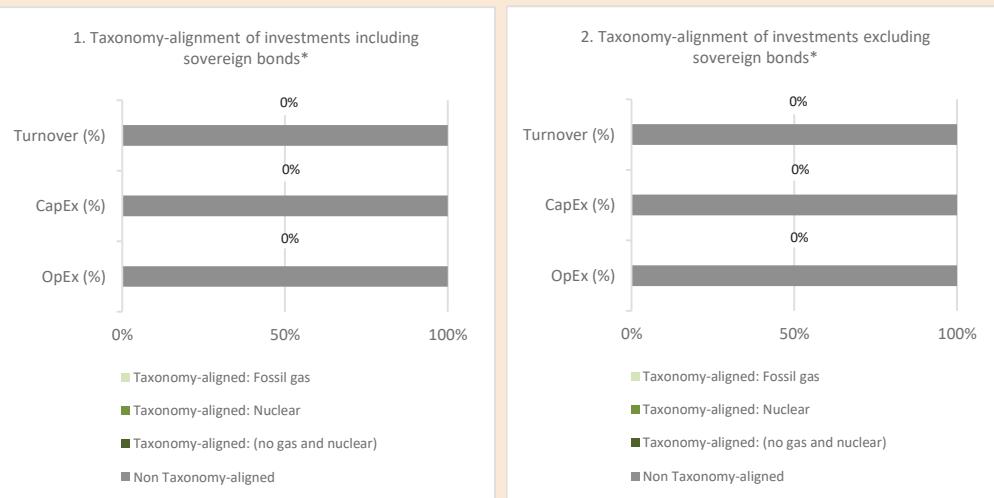

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 42.34 % of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 20%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 59.57% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Euro Yield Plus

Legal entity identifier 549300XVIYNML4N5PT86

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);

- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Investment Manager excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities were excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company verified the PAI data through a periodic monitoring report, where the values of the indicators are consulted at product level and, where present and possible, at the respective benchmark level to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
OBL 0 10/18/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	8.90%	Germany
RAGB 1.65 10/21/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	8.54%	Austria
BKO 2.2 12/12/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	7.59%	Germany

SWEDA 1 1/2 09/18/28	FINANCIAL AND INSURANCE ACTIVITIES	0.85%	Sweden

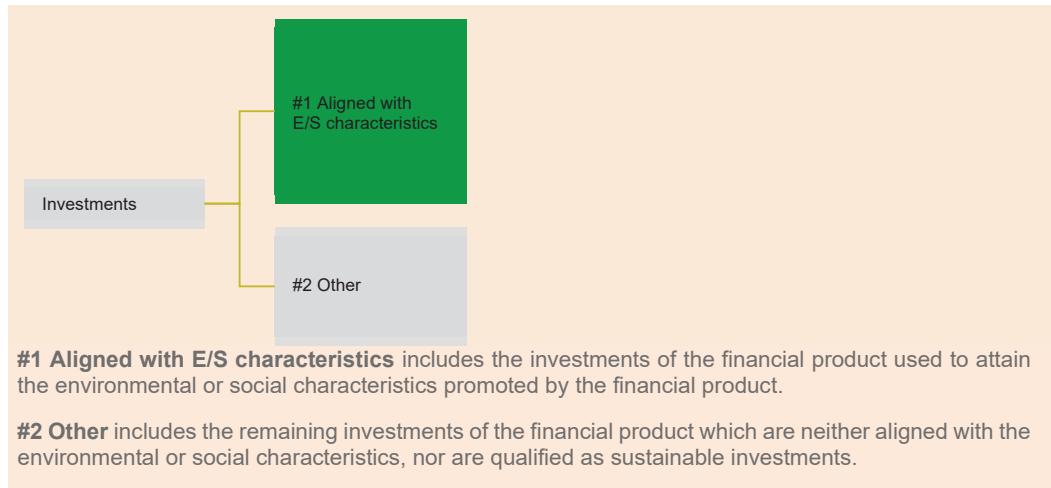

What was the proportion of sustainability-related investments?

• What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 97.46%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics). The remaining proportion (2.54% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	37.24%
FINANCIAL AND INSURANCE ACTIVITIES	K	32.04%
MANUFACTURING	C	8.10%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	6.53%
INFORMATION AND COMMUNICATION	J	5.31%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	1.80%
TRANSPORTATION AND STORAGE	H	1.35%
REAL ESTATE ACTIVITIES	L	1.06%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	0.57%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	0.34%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	0.19%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

Yes

In fossil gas

In nuclear energy

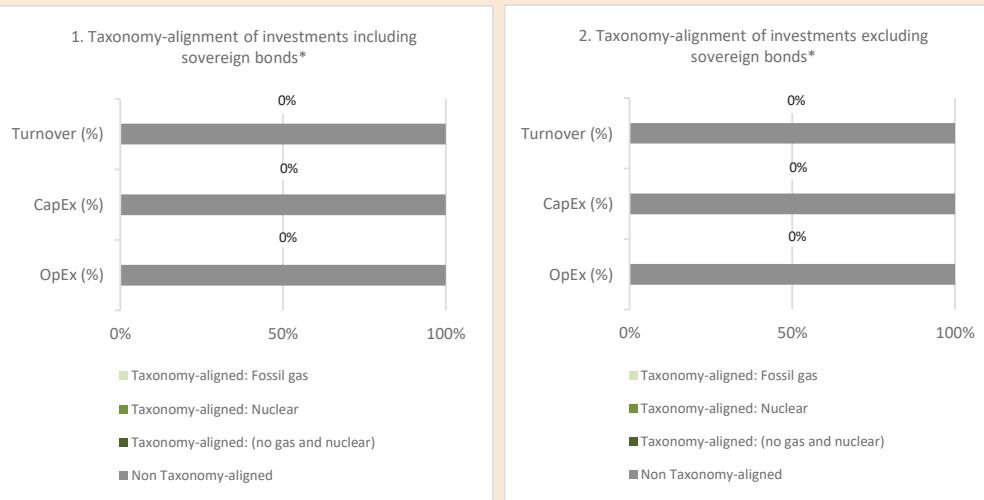

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 63.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.
- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that average ESG portfolio scoring is above the score determined as a weighted average of the scores for the AUM of each asset class that make up the financial product.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

● How does the reference benchmark differ from a broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Dynamic New Allocation

Legal entity identifier 549300R63WAIQYSZQK80

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promoted Environmental and Social characteristics through the Target Funds' selection, which focused on UCITS and/or UCIs which integrated Environmental, Social and Governance ("ESG") factors, followed good governance practices, and qualified under Article 8 or Article 9 of SFDR. In addition, the Target Funds' selection was based on the Investment Manager's assessment of the investment process with the aim to ensure the integration of binding ESG criteria and focused on:

- ETFs on major ESG and/or Sustainable and Responsible Investment ("SRI") indices, designed to ensure the binding inclusion of the best-in-class companies from an ESG and SRI perspective and/or to exclude the ones involved in sectors or whose products or activities may have the potential for negative social or environmental impact;
- UCITS and/or UCI which adhered to binding ESG criteria and incorporated them in their investment decisions through a systematic process (based on, but not limited to, ESG research, screening, ratings, provided by external data providers and/or internal research, and/or on exclusion policies) with the aim to select issuers with strong ESG practices and/or to exclude the ones potentially exposed to ESG controversies or involved in specific activities (such as but not limited to controversial weapons, nuclear

weapons, tobacco, thermal coal, oil sands, UN Global Compact violators and civilian firearms);

- UCITS and/or UCI, including ETFs, whose investment strategies targeted specific themes related to ESG factors (such as but not limited to climate change, green bonds, circular economy, sustainable energy, future of mobility, healthy living and robotics) aiming to select the issuers that most benefit from them.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

In order to promote environmental and social characteristics the Sub-fund invested primarily in the unit/shares of UCITS and/or ETFs and/or UCIs ("Target Funds"), and achieved:

- a percentage of 67.61% (in comparison to the minimum threshold of 50%) of the Sub-fund's assets excluding cash invested in Target Funds which promote ESG criteria in accordance with Article 8 of the SFDR, or investment strategies with sustainable investment objectives or a reduction in carbon emissions as their objective in accordance with Article 9 of SFDR;
- an average annual MSCI ESG rating of the portfolio of A (compared to a minimum average annual MSCI ESG rating equal or above A) The ESG score of the portfolio was A.

● ***...and compared to previous periods?***

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company verified the PAI data through a periodic monitoring report, where the values of the indicators are consulted at product level and, where present and possible, at the respective benchmark level to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

What was the proportion of sustainability-related investments?

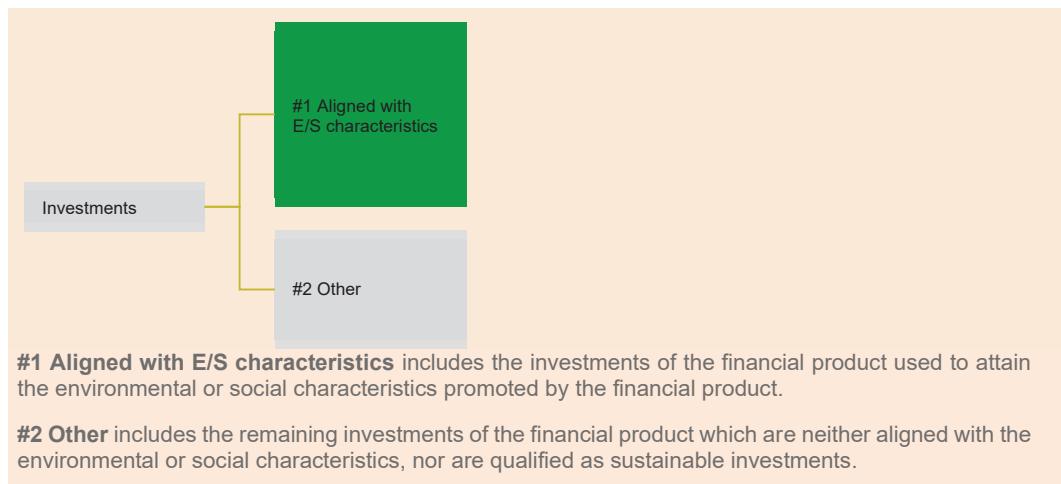

Asset allocation
describes the share of investments in specific assets.

What was the asset allocation?

In accordance with the binding element of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments in Article 8 and Article 9 funds at 31/08/2023 was 93% in comparison to the minimum threshold of at least 50% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (7% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- Target Funds that fall within the investable universe and yet are not classified as Art. 8 SFDR nor Art. 9 SFDR;
- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk hedging;
- derivatives which may be held for hedging and efficiency portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
-	-	99.80%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

In nuclear energy

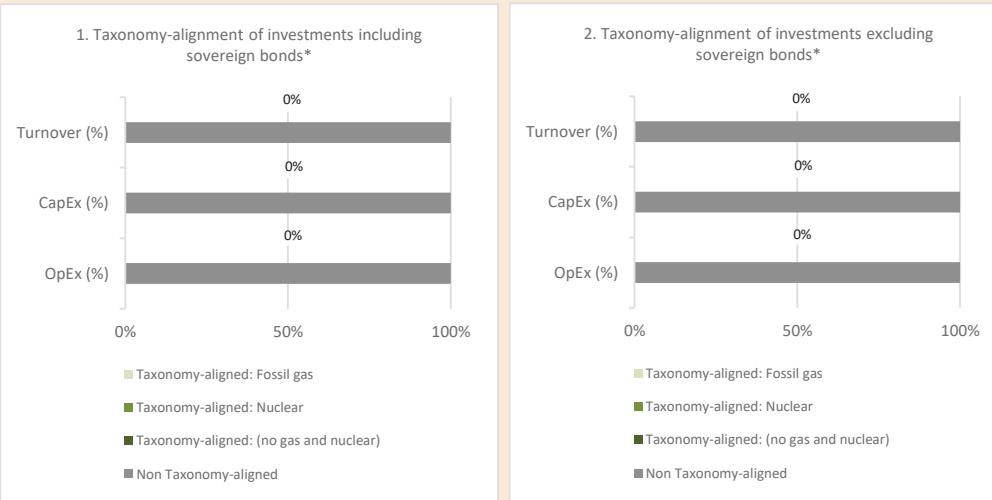

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

X No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investment included under “2 Other” may be Target Funds that belong to the investable universe selected through the internal ESG Due Diligence analysis and yet are not classified as Art. 8 and Art. 9 SFDR. The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments and derivatives used for hedging and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

ESG screening and monitoring of Target Funds:

The investment perimeter is limited to Target Funds belonging to the investable universe identified through a Due Diligence analysis performed by the Management Company to evaluate the level of integration of environmental, social and corporate governance factors into the Policy and investment process of the third-party asset managers of the Target Funds.

Integration of ESG factors:

The integration of ESG factors is promoted through a minimum percentage of investments in UCIs classified as Art. 8/9 SFDR equal to at least 50% of the total composition of the portfolio. The selected Target Funds belong to the investable universe defined by the internal Due Diligence analysis.

To this aim, the Management Company acquires information directly from third-party fund houses and/or through specialized info providers (e.g. Bloomberg, Morningstar, MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

● **How did this financial product perform compared with the reference benchmark?**

Not applicable

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Inflation Linked

Legal entity identifier 549300K50HJ8J28XLS75

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);

- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of investments in specific assets.

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 100%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics). The remaining proportion (0% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	100.00%

Enabling activities
directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities
are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

In nuclear energy

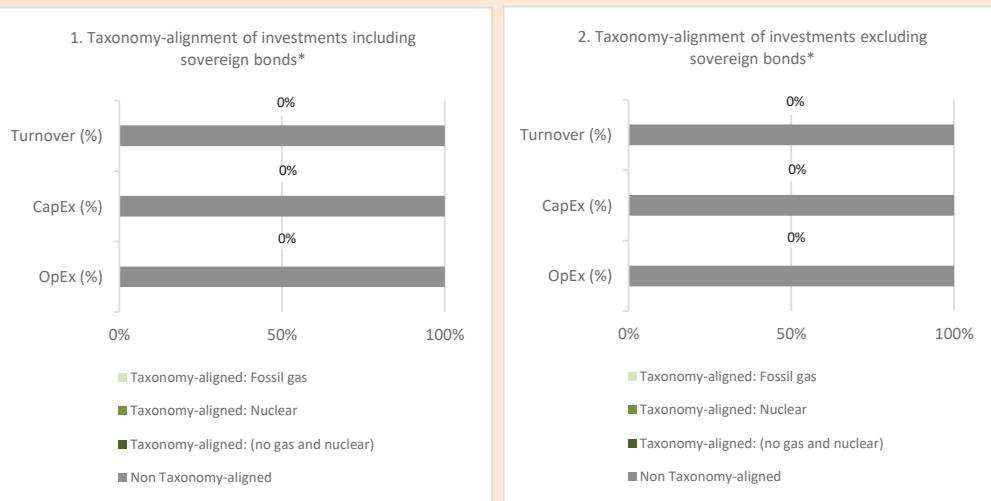

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Cross Asset Style Factor

Legal entity identifier 549300O3IZBRNH3CXX52

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics without committing to invest a minimum share in sustainable investments.

The main environmental and social characteristics promoted by the Sub-fund through the Management Company's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy).
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access

to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Such environmental and social characteristics are pursued through the investment of 65.66% of the portfolio in article 8 or article 9 funds.

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The indicator used to measure the attainment of the environmental and social characteristics promoted by the financial product is the minimum percentage of the financial product's portfolio invested in funds that satisfy the conditions to be categorized as article 8 (products that promote environmental and social characteristics or a combination of such) or article 9 funds (products that have a sustainable investment objective) according to the SFDR . Such funds have been selected from the investible universe as defined by the qualitative and quantitative analysis of the Management Company. The percentage of the portfolio invested in article 8 or article 9 funds is, as of August 2023, 65.66% in comparison to the minimum threshold of 50%.

● ***...and compared to previous periods?***

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

→ ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company verified the PAI data through a periodic monitoring report, where the values of the indicators are consulted at product level and, where present and possible, at the respective benchmark level to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of investments in specific assets.

What was the asset allocation?

In accordance with the binding element of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments in Article 8 and Article 9 funds at 31/08/2023 was 65.66% in comparison to the minimum threshold of at least 50% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (34.34% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- Target Funds that fall within the investable universe and yet are not classified as Art. 8 SFDR nor Art. 9 SFDR;
- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk hedging;
- derivatives which may be held for hedging and efficiency portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
-	-	97.69%

Enabling activities
directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities
are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

In nuclear energy

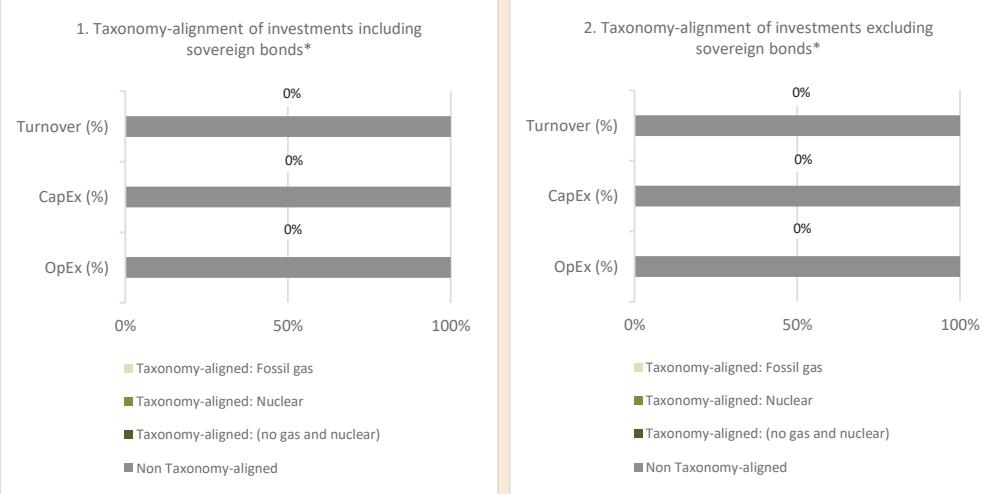

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

X No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0%.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investment included under “2 Other” may be Target Funds that belong to the investable universe selected through the internal ESG Due Diligence analysis and yet are not classified as Art. 8 and Art. 9 SFDR. The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments and derivatives used for hedging and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category “#2 Others”.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

ESG screening and monitoring of Target Funds:

The investment perimeter is limited to Target Funds belonging to the investable universe identified through a Due Diligence analysis performed by the Management Company to evaluate the level of integration of environmental, social and corporate governance factors into the Policy and investment process of the third-party asset managers of the Target Funds.

Integration of ESG factors:

The integration of ESG factors is promoted through a minimum percentage of investments in UCIs classified as Art. 8/9 SFDR equal to at least 50% of the total composition of the portfolio. The selected Target Funds belong to the investable universe defined by the internal Due Diligence analysis.

To this aim, the Management Company acquires information directly from third-party fund houses and/or through specialized info providers (e.g. Bloomberg, Morningstar, MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Equity India

Legal entity identifier 549300S4GO1AZ5G2VI98

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54.91% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was BBB.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

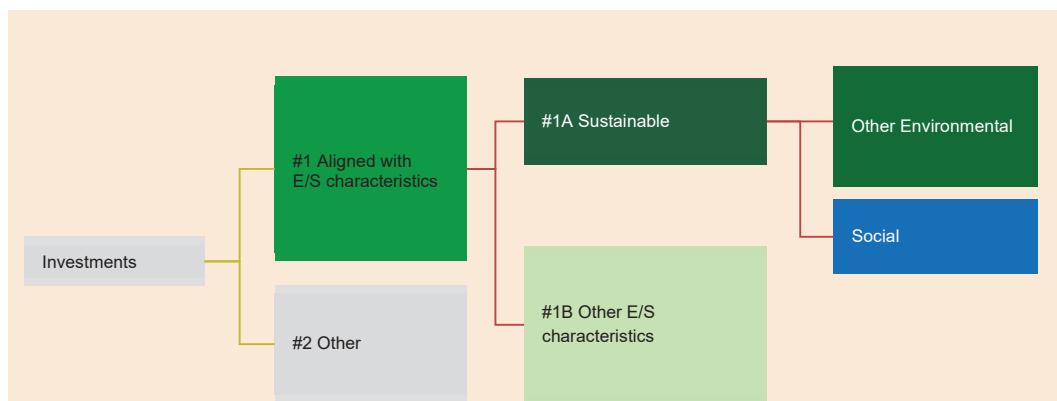

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 98.41, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (1.59% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 54.91%, compared to the minimum threshold of 20% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	38.18%
FINANCIAL AND INSURANCE ACTIVITIES	K	26.86%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	14.12%
INFORMATION AND COMMUNICATION	J	6.68%
MINING AND QUARRYING	B	2.24%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	2.20%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	1.93%
REAL ESTATE ACTIVITIES	L	1.65%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	1.53%
ARTS, ENTERTAINMENT AND RECREATION	R	1.52%
TRANSPORTATION AND STORAGE	H	1.10%

ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	0.51%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	0.19%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

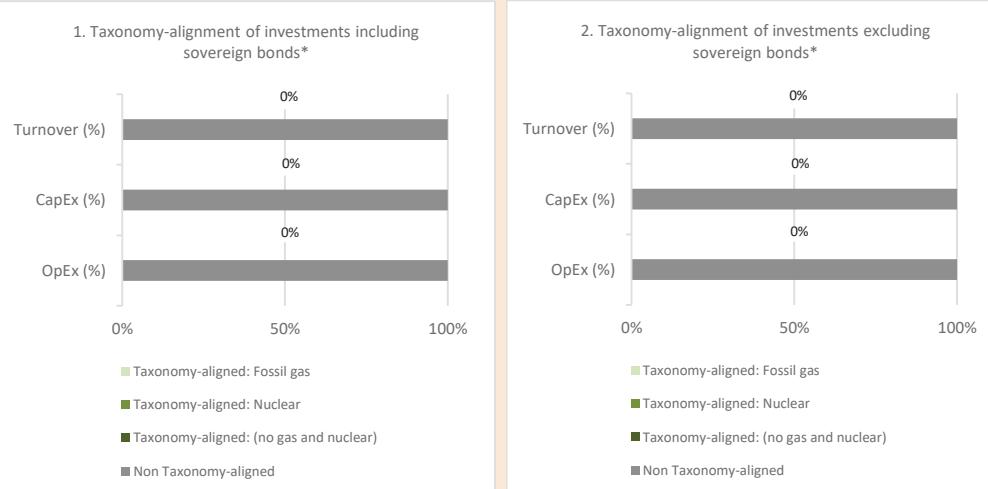

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 34.62% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 52.21% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.
- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Equity China

Legal entity identifier 5493001NBQ9MX9UZVU64

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 33.90% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was BBB.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
ALIBABA GROUP HOLDING LTD	INFORMATION AND COMMUNICATION	8.47%	Cayman Islands
TENCENT HOLDINGS LTD	INFORMATION AND COMMUNICATION	8.02%	China
BNP 0 12/14/23	FINANCIAL AND INSURANCE ACTIVITIES	4.06%	Netherlands
MEITUAN-CLASS B	INFORMATION AND COMMUNICATION	4.02%	Cayman Islands
UBS 0 12/22/27	FINANCIAL AND INSURANCE ACTIVITIES	3.96%	Switzerland
PDD HOLDINGS INC	INFORMATION AND COMMUNICATION	3.41%	Cayman Islands
CHINA CONSTRUCTION BANK-H	FINANCIAL AND INSURANCE ACTIVITIES	2.39%	China
NETEASE INC	INFORMATION AND COMMUNICATION	2.23%	Cayman Islands
LI AUTO INC-CLASS A	MANUFACTURING	1.95%	Cayman Islands
BYD CO LTD-H	MANUFACTURING	1.92%	China
BAIDU INC-CLASS A	INFORMATION AND COMMUNICATION	1.68%	Cayman Islands
PING AN INSURANCE GROUP CO-H	FINANCIAL AND INSURANCE ACTIVITIES	1.63%	China
JD.COM INC-CLASS A	INFORMATION AND COMMUNICATION	1.61%	Cayman Islands
YUM CHINA HOLDINGS INC	ACCOMMODATION AND FOOD SERVICE ACTIVITIES	1.21%	China
HESAI GROUP	CONSTRUCTION	1.21%	Cayman Islands

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

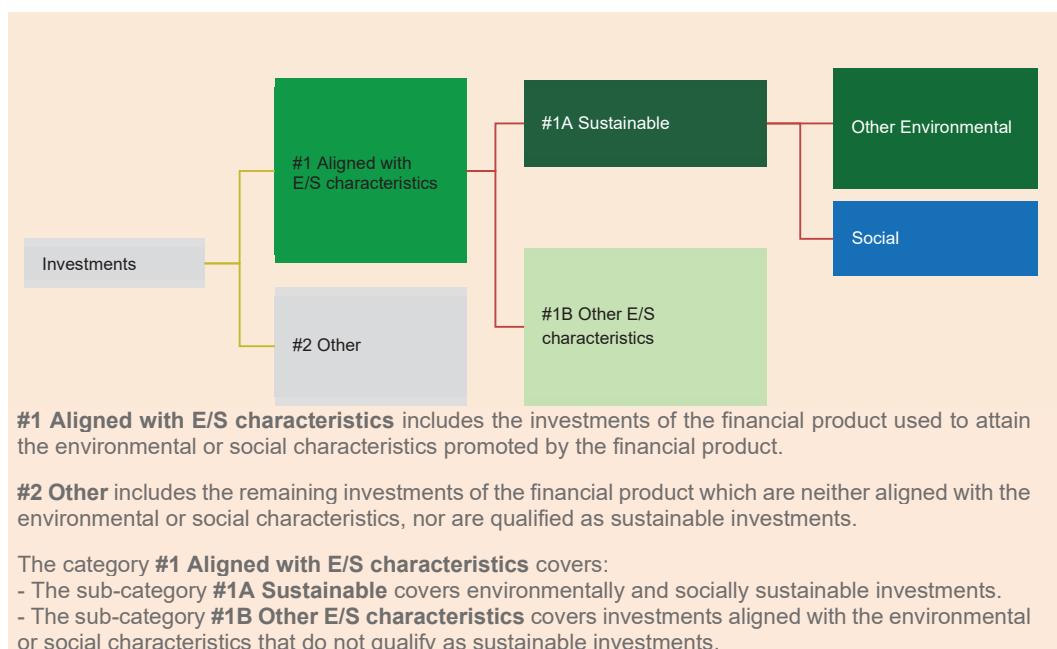

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 93.3, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (6.7% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 33.9%, compared to the minimum threshold of 20% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
INFORMATION AND COMMUNICATION	J	35.52%
MANUFACTURING	C	22.54%
FINANCIAL AND INSURANCE ACTIVITIES	K	19.58%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	3.44%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	3.40%
REAL ESTATE ACTIVITIES	L	2.70%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	2.45%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	2.27%
MINING AND QUARRYING	B	1.83%
TRANSPORTATION AND STORAGE	H	1.72%
CONSTRUCTION	F	1.71%
ARTS, ENTERTAINMENT AND	R	1.39%

RECREATION		
EDUCATION	P	0.47%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	0.32%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	0.11%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

In nuclear energy

No

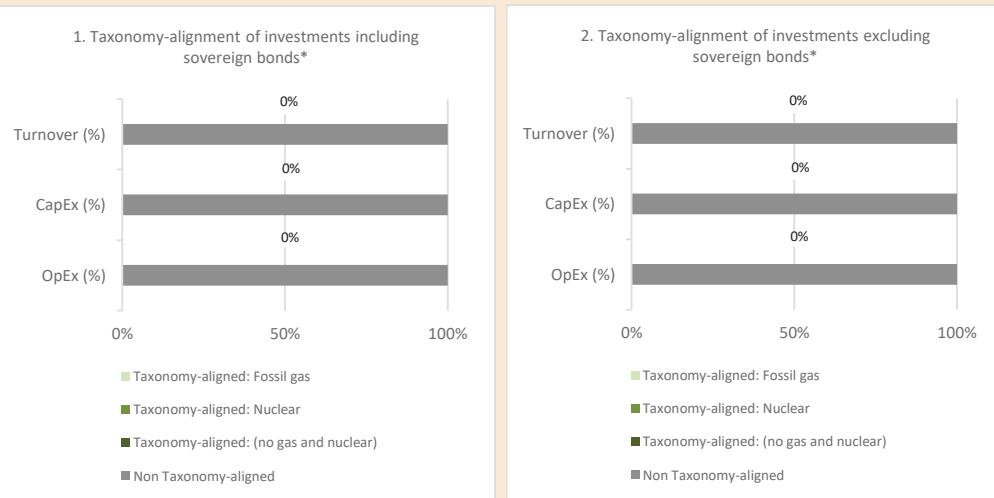

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● ***What was the share of investments made in transitional and enabling activities?***

The share of investments in transitional and enabling activities was 0%.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that **do not** take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-fund, as of 31/08/23, invested 17.13% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 29.19% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.
- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or

environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

● **How did this financial product perform compared with the reference benchmark?**

Not applicable

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Equity Brazil

Legal entity identifier 549300FB5V51AWDBPZ62

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.65% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was BBB.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
VALE SA	MINING AND QUARRYING	8.26%	Brazil
ITAU UNIBANCO HOLDING S-PREF	FINANCIAL AND INSURANCE ACTIVITIES	6.77%	Brazil
BANCO BRADESCO SA-PREF	FINANCIAL AND INSURANCE ACTIVITIES	5.95%	Brazil
PETROBRAS - PETROLEO BRAS-PR	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	5.34%	Brazil
B3 SA-BRASIL BOLSA BALCAO	FINANCIAL AND INSURANCE ACTIVITIES	4.74%	Brazil
AMBEV SA	MANUFACTURING	4.52%	Brazil
PETROBRAS - PETROLEO BRAS	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	4.13%	Brazil
LOCALIZA RENT A CAR	ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	3.91%	Brazil
WEG SA	MANUFACTURING	3.83%	Brazil
BANCO BTG PACTUAL SA-UNIT	FINANCIAL AND INSURANCE ACTIVITIES	2.98%	Brazil
BANCO DO BRASIL SA	FINANCIAL AND INSURANCE ACTIVITIES	2.87%	Brazil
PRIORIS SA	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	2.69%	Brazil
EQUATORIAL ENERGIA SA - ORD	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	2.54%	Brazil
SUZANO SA	MANUFACTURING	2.53%	Brazil
CENTRAIS ELETRICAS BRASILIER	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	2.52%	Brazil

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

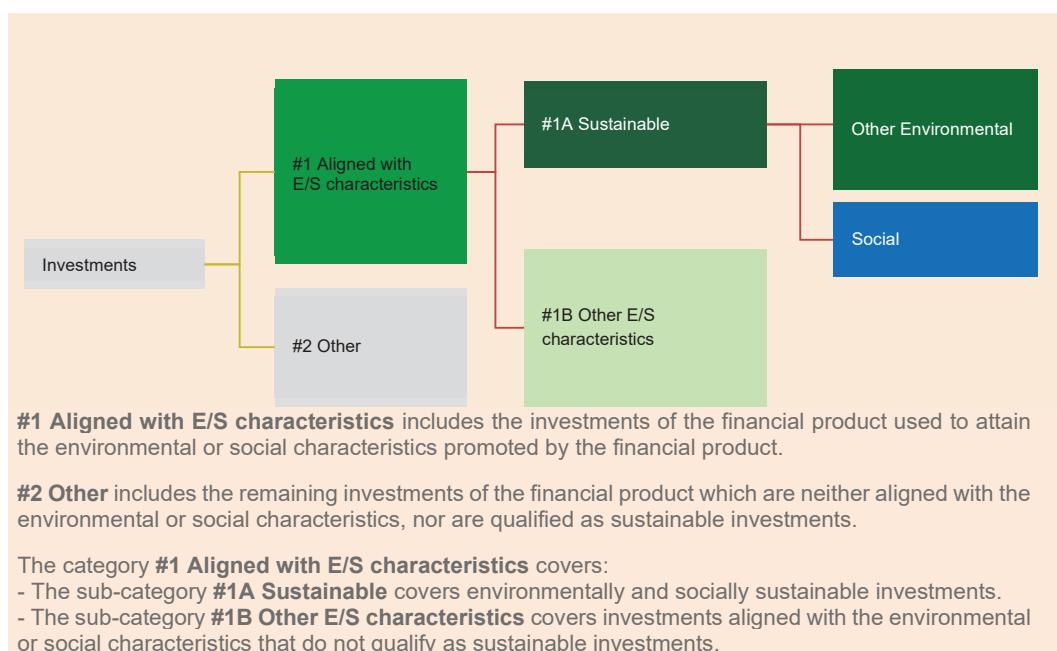

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 99.62, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0.38% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 57.65%, compared to the minimum threshold of 20% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	K	29.72%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	25.06%
MANUFACTURING	C	13.29%
MINING AND QUARRYING	B	10.87%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	5.77%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	5.04%
INFORMATION AND COMMUNICATION	J	3.12%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	2.89%
TRANSPORTATION AND STORAGE	H	2.27%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	1.11%

ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	0.38%
EDUCATION	P	0.09%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

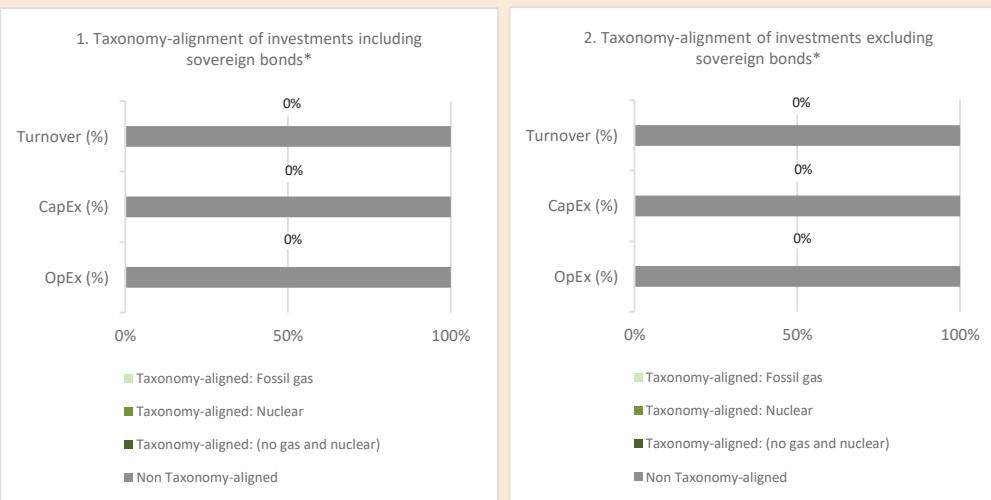

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 26.14% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 57.58% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.
- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Flexible Italy

Legal entity identifier 549300CRPWSADC7MTR11

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Investment Manager excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities were excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company verified the PAI data through a periodic monitoring report, where the values of the indicators are consulted at product level and, where present and possible, at the respective benchmark level to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country

HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	0.54%
REAL ESTATE ACTIVITIES	L	0.38%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

Yes

In fossil gas

In nuclear energy

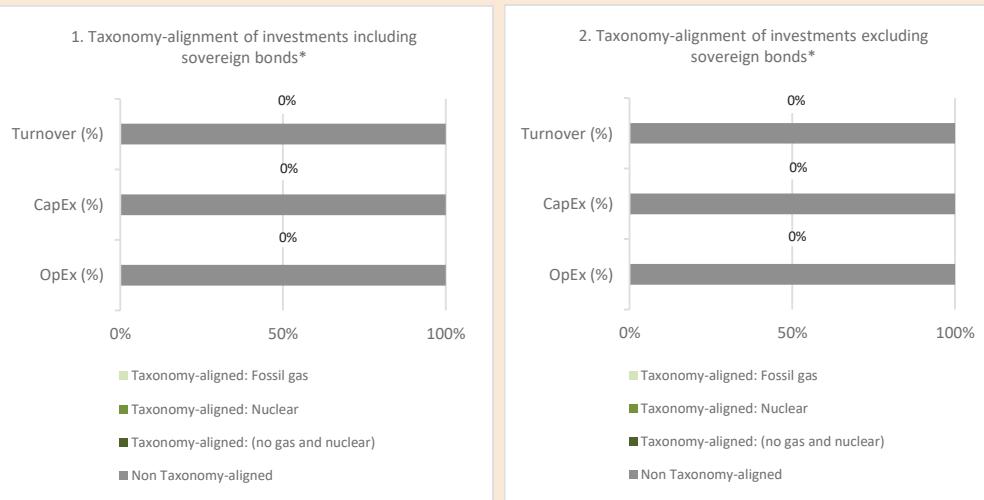

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 67.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

 are sustainable investments with an environmental objective that **do not** take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.
- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that average ESG portfolio scoring is above the score determined as a weighted average of the scores for the AUM of each asset class that make up the financial product.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Flexible Europe

Legal entity identifier 549300JNODPLPXVWXH51

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio. To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
BKO 0 12/15/23	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	9.55%	Germany
BOTS 0 11/14/23	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	9.12%	Italy
SGLT 0 12/08/23	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	9.10%	Spain
BKO 0 09/15/23	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	6.88%	Germany
BOTS 0 12/14/23	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	6.82%	Italy
SGLT 0 11/10/23	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	5.02%	Spain
BOTS 0 05/14/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	4.92%	Italy
BUBILL 0 05/15/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	4.48%	Germany
NOVO NORDISK A/S-B	MANUFACTURING	1.59%	Denmark
NESTLE SA-REG	ACCOMMODATION AND FOOD SERVICE ACTIVITIES	1.50%	Switzerland
LVMH MOET HENNESSY LOUIS VUI	MANUFACTURING	1.47%	France
ASML HOLDING NV	MANUFACTURING	1.33%	Netherlands
ASTRAZENECA PLC	MANUFACTURING	1.04%	United Kingdom
INVESCO AT1 CAP BOND EUR HDG	-	1.01%	Ireland
TOTALENERGIES SE	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.00%	France

What was the proportion of sustainability-related investments?

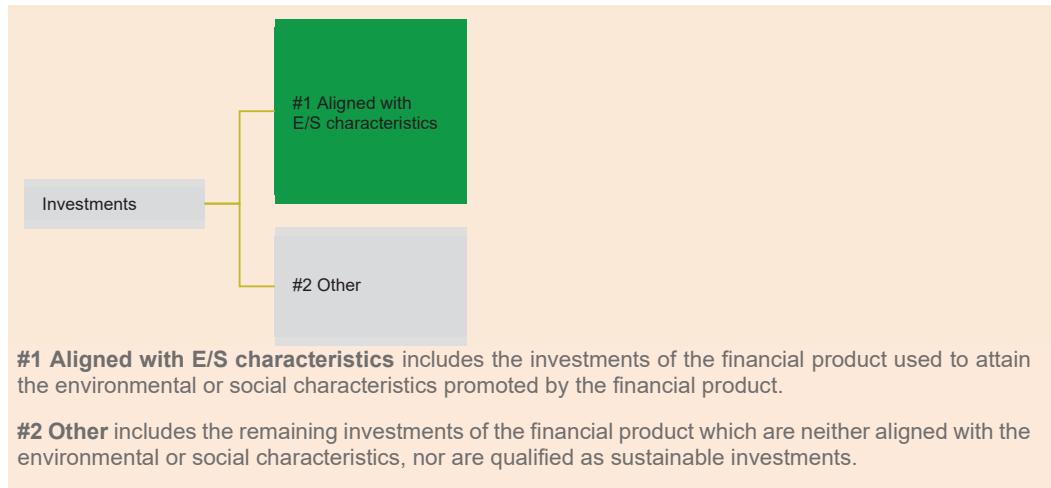

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 100%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics). The remaining proportion (0% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

Asset allocation

describes the share of investments in specific assets.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	55.89%
MANUFACTURING	C	18.22%
FINANCIAL AND INSURANCE ACTIVITIES	K	7.37%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	4.48%
INFORMATION AND COMMUNICATION	J	3.13%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	2.13%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	1.29%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	1.10%
TRANSPORTATION AND STORAGE	H	0.91%
MINING AND QUARRYING	B	0.62%
CONSTRUCTION	F	0.45%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	0.31%
ARTS, ENTERTAINMENT AND RECREATION	R	0.18%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

In nuclear energy

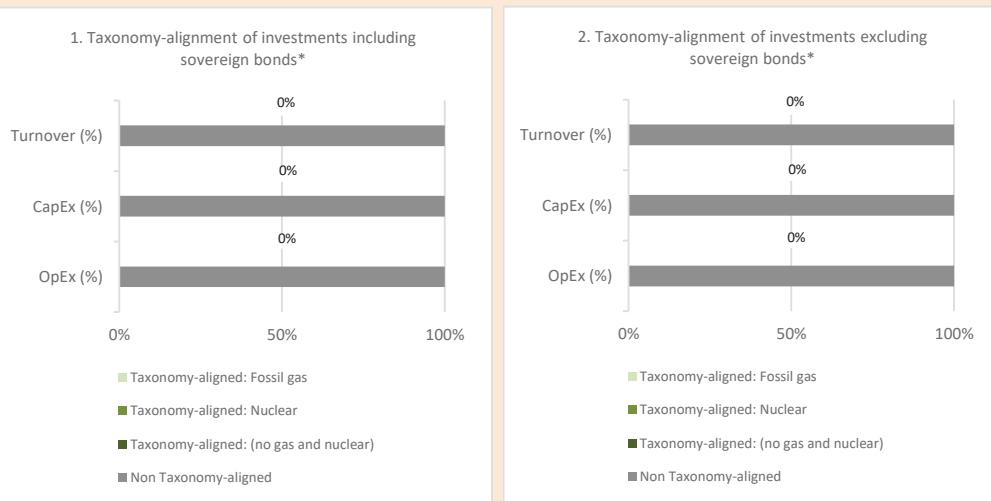

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 44.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Global Bond

Legal entity identifier 549300T6EWCF8K4P7S41

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG score of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI). The ESG score of the portfolio was BBB.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

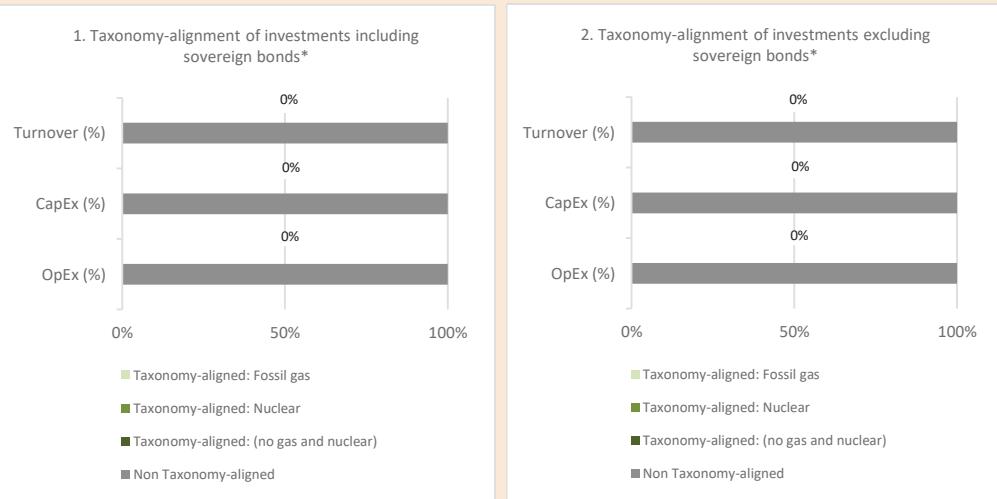

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (Opex) reflecting green operational activities of investee companies.

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 5.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

• a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Ethical Investment

Legal entity identifier 549300BLRJ6E4XRKG541

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 94.16% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Investment Manager excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities were excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
SUEZFP 4 5/8 11/03/28	WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	2.07%	France
ENGIFFP 3 5/8 01/11/30	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.79%	France
IBESM 2 5/8 PERP	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.77%	Netherlands
ISPIM 1 1/2 04/10/24	FINANCIAL AND INSURANCE ACTIVITIES	1.75%	Italy
BNP 1 1/8 08/28/24	FINANCIAL AND INSURANCE ACTIVITIES	1.72%	France
ABNANV 2 3/8 06/01/27	FINANCIAL AND INSURANCE ACTIVITIES	1.68%	Netherlands
ENGIFFP 1 3/4 03/27/28	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.65%	France
NDASS 1 1/8 02/16/27	FINANCIAL AND INSURANCE ACTIVITIES	1.63%	Finland

BPCEGP 0 1/2 01/14/28	FINANCIAL AND INSURANCE ACTIVITIES	1.25%	France
ENGIFFP 1 10/26/36	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.23%	France

What was the proportion of sustainability-related investments?

Asset allocation
describes the share of investments in specific assets.

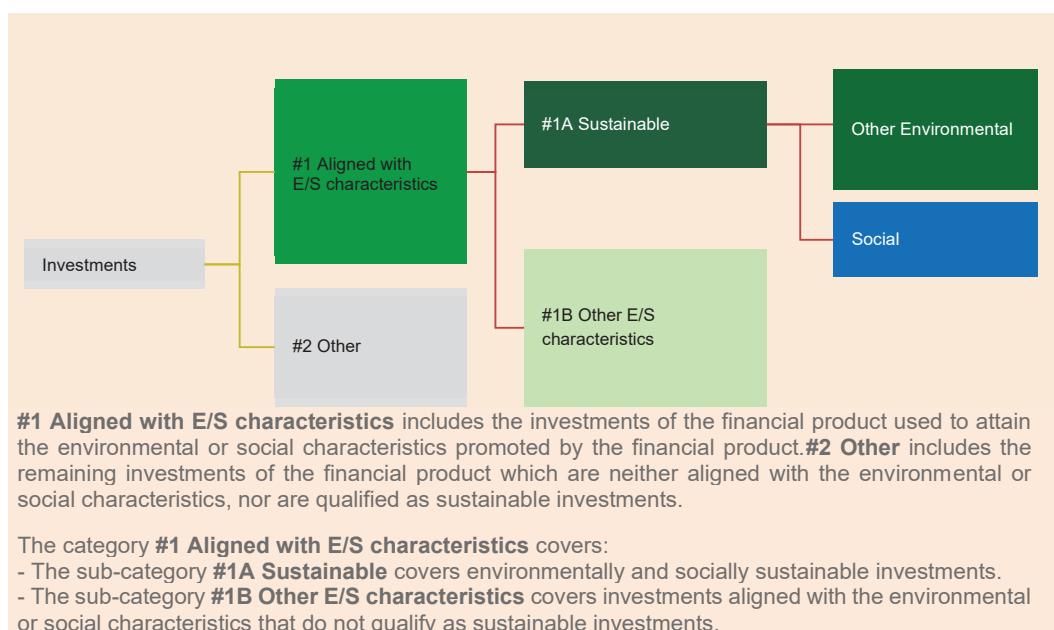

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 89.31%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (10.69% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 94.16%, compared to the minimum threshold of 10% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	K	52.35%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	19.52%
REAL ESTATE ACTIVITIES	L	12.00%
MANUFACTURING	C	3.93%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	3.21%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	1.11%
TRANSPORTATION AND STORAGE	H	1.06%
CONSTRUCTION	F	0.80%
INFORMATION AND COMMUNICATION	J	0.37%

Enabling activities
directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic
activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

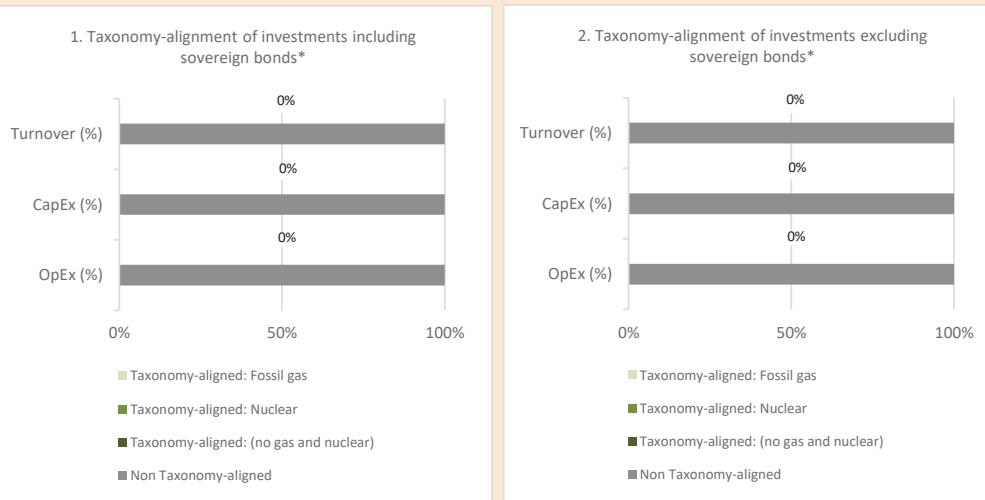

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 94.16% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 48.9% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 10%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that average ESG portfolio scoring is above the score determined as a weighted average of the scores for the AUM of each asset class that make up the financial product.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Global Convertibles

Legal entity identifier 549300WGLPA62WXIJK43

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the ESG rating of the portfolio.

To undertake the ESG rating analysis, sustainable characteristics of the underlying investments were defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers. The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country

Enabling activities
directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic
activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

Yes

In fossil gas

In nuclear energy

No

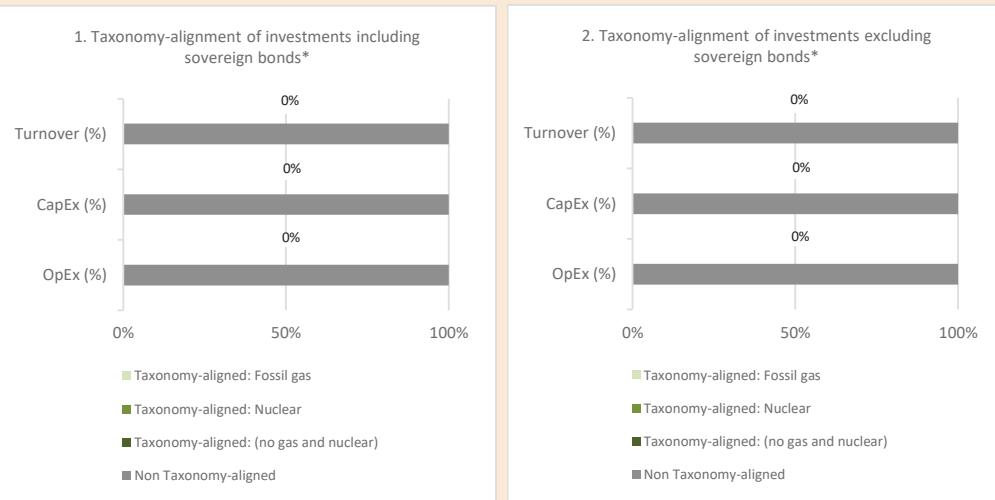

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Investment Manager are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction(WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of the most virtuous issuers in terms of sustainable performance through an ESG rating. To undertake the ESG rating analysis, sustainable characteristics of the underlying investments are defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Fonditalia Credit Absolute Return

Legal entity identifier 549300NXKSA2LGFHQN91

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.07% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Investment Manager excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities were excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm ("DNSH") threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the "SFDR RTS") were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company's website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the "Sustainable And Responsible Investment Policy" as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company's Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of "sustainable investments" with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to "Red" (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization's conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
BTPS 2.45 10/01/23	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	3.32%	Italy
BTPS 0 04/15/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	2.76%	Italy
SPGB 3.8 04/30/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	2.38%	Spain
DBR 1 3/4 02/15/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	1.88%	Germany
CMCSA 1 7/8 11/24/23	INFORMATION AND COMMUNICATION	1.59%	United Kingdom
EUROGR 1 5/8 11/03/23	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.56%	Germany

ACHMEA 3 5/8 11/29/25	FINANCIAL AND INSURANCE ACTIVITIES	0.96%	Netherlands

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

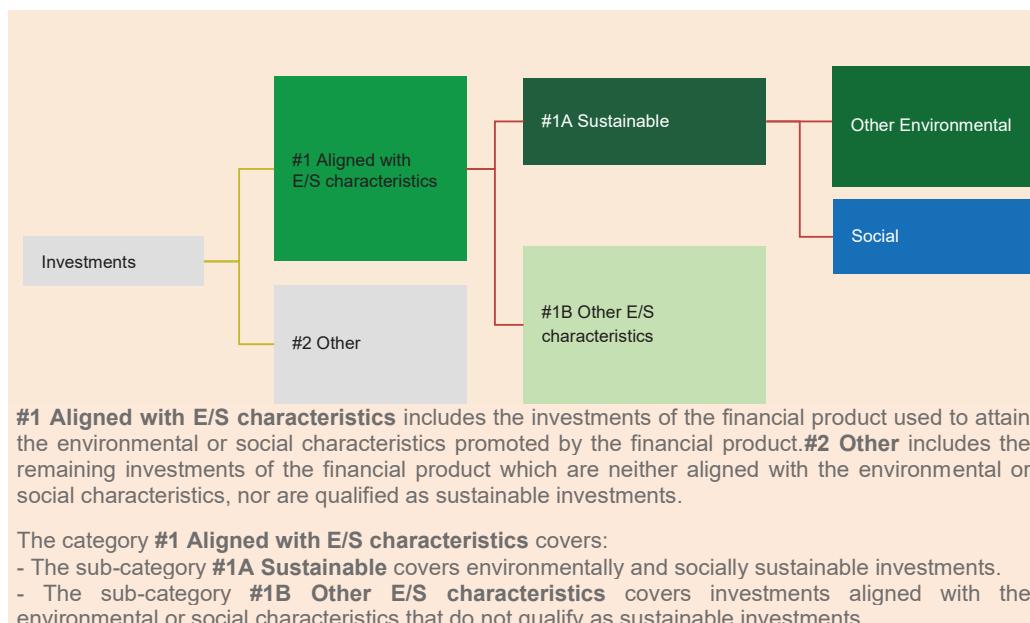

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 91.21, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (8.79% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 51.07%, compared to the minimum threshold of 20% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	K	47.12%
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	11.27%
MANUFACTURING	C	9.80%
REAL ESTATE ACTIVITIES	L	8.76%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	8.14%
INFORMATION AND COMMUNICATION	J	7.14%
TRANSPORTATION AND STORAGE	H	3.07%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	0.71%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	0.46%
MINING AND QUARRYING	B	0.40%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	0.29%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹***

Yes

In fossil gas

In nuclear energy

No

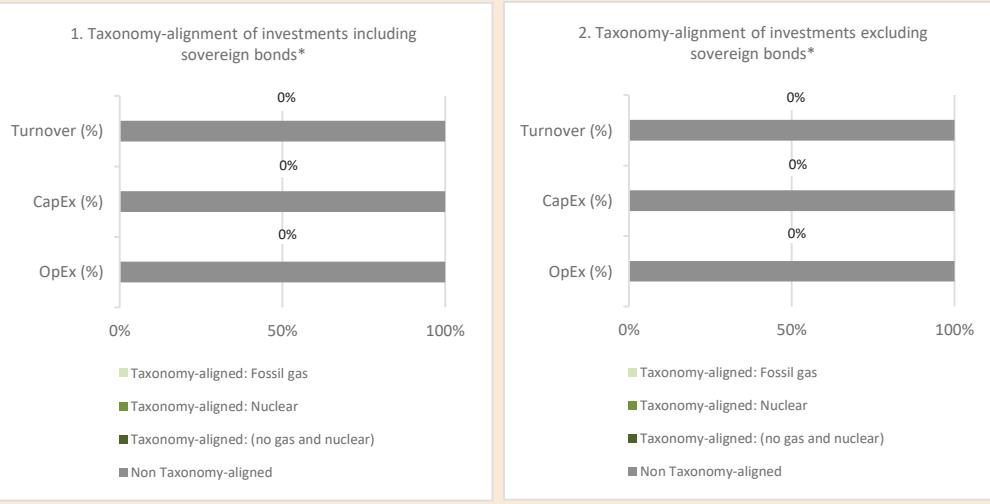

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 89.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- ***What was the share of investments made in transitional and enabling activities?***

The share of investments in transitional and enabling activities was 0%.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 39.64% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 46.92% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);

- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that average ESG portfolio scoring is above the score determined as a weighted average of the scores for the AUM of each asset class that make up the financial product.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI).

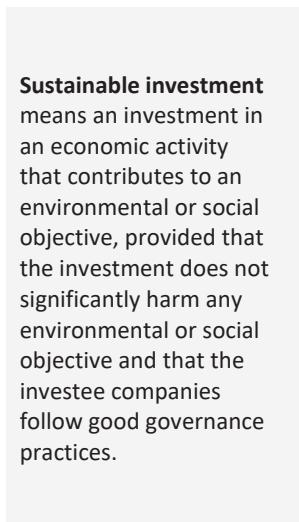

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Fonditalia Opportunities Diversified Income

Legal entity identifier 549300ZEYKXUM1443L90

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Investment Manager excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities were excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the ESG rating of the portfolio.

To undertake the ESG rating analysis, sustainable characteristics of the underlying investments were defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers. The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company verified the PAI data through a periodic monitoring report, where the values of the indicators are consulted at product level and, where present and possible, at the respective benchmark level to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

To undertake the ESG rating analysis, sustainable characteristics of the underlying investments were defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers. The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company verified the PAI data through a periodic monitoring report, where the values of the indicators are consulted at product level and, where present and possible, at the respective benchmark level to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
T 2 1/4 04/30/24	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	5.57%	United States
T 2 7/8 09/30/23	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	3.28%	United States

What was the proportion of sustainability-related investments?

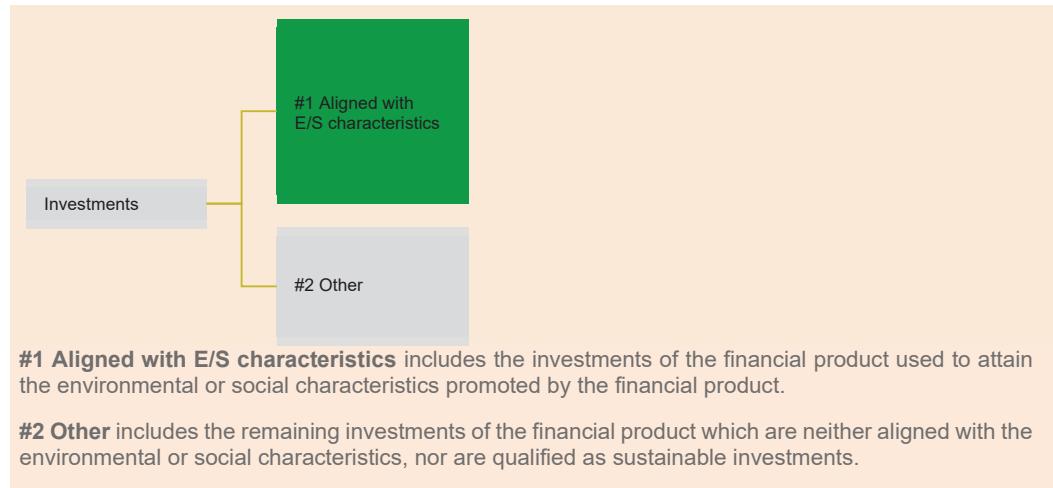

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 92.68%, compared to the minimum threshold of 50% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (7.32% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	24.75%

ARTS, ENTERTAINMENT AND RECREATION	R	2.06%
CONSTRUCTION	F	0.99%
ACTIVITIES OF EXTRATERRITORIAL ORGANISATIONS AND BODIES	U	0.73%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	0.60%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	0.55%

Enabling activities
directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities
are economic activities for which low-carbon

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

Yes

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

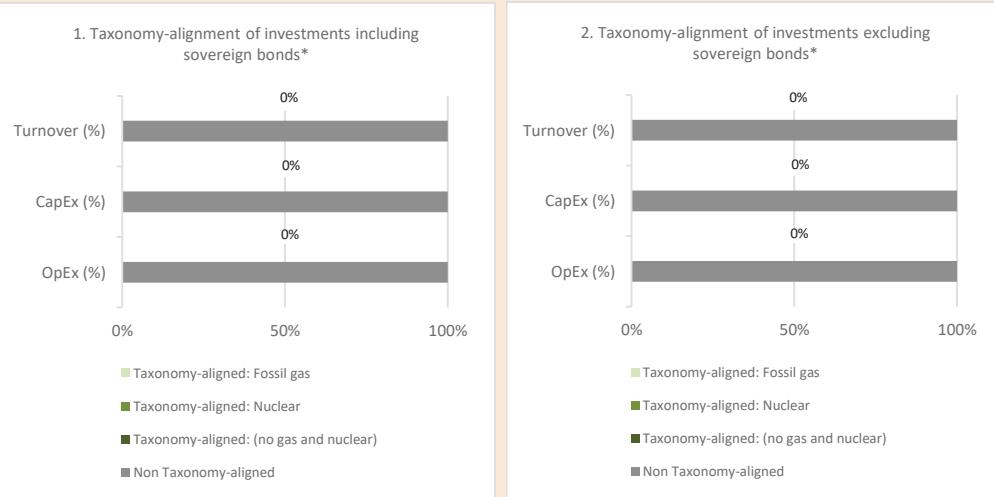

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (Opex) reflecting green operational activities of investee companies.

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 75.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Investment Manager are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of the most virtuous issuers in terms of sustainable performance through an ESG rating. To undertake the ESG rating analysis, sustainable characteristics of the underlying investments are defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

● How did this financial product perform compared with the reference benchmark?

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Millennials Equity

Legal entity identifier 549300O7LC2T3NJHY808

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.70% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

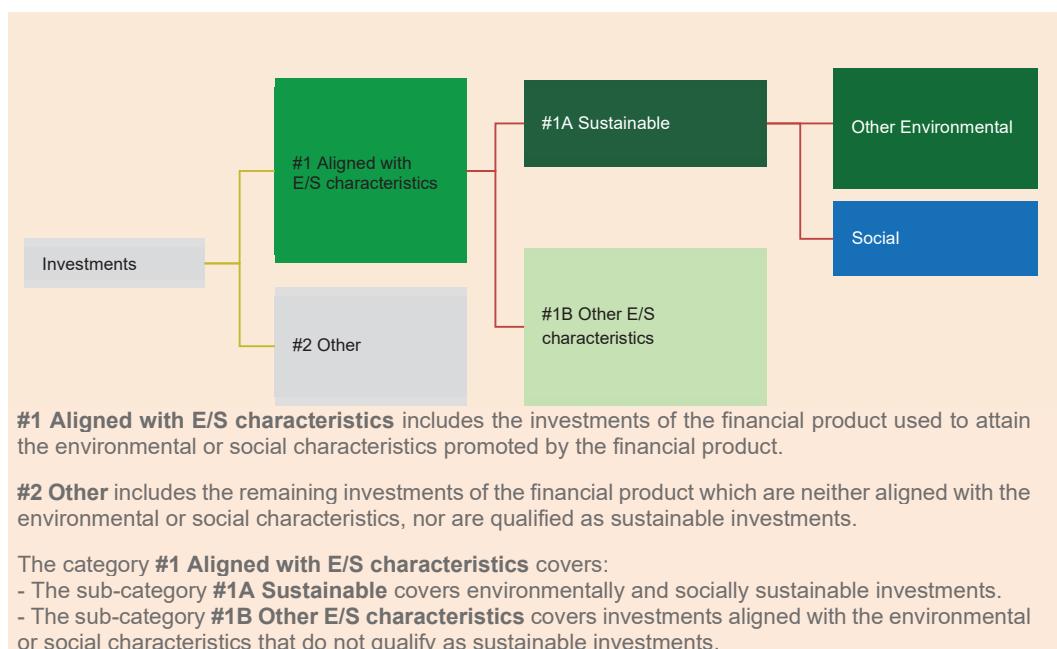

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 100%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (0% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 49.7%, compared to the minimum threshold of 30% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	48.30%
INFORMATION AND COMMUNICATION	J	35.07%
FINANCIAL AND INSURANCE ACTIVITIES	K	4.97%

REAL ESTATE ACTIVITIES	L	0.72%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	0.70%
AGRICULTURE, FORESTRY AND	A	0.25%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

Yes

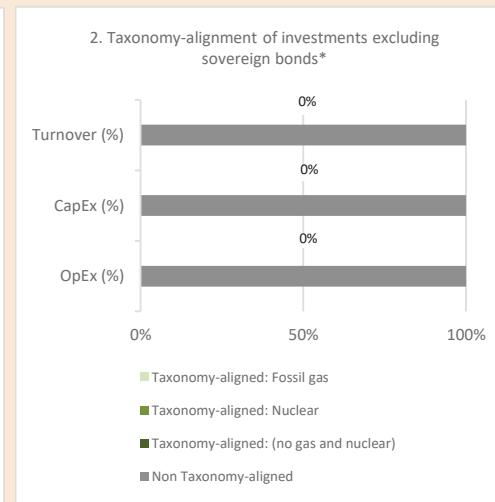

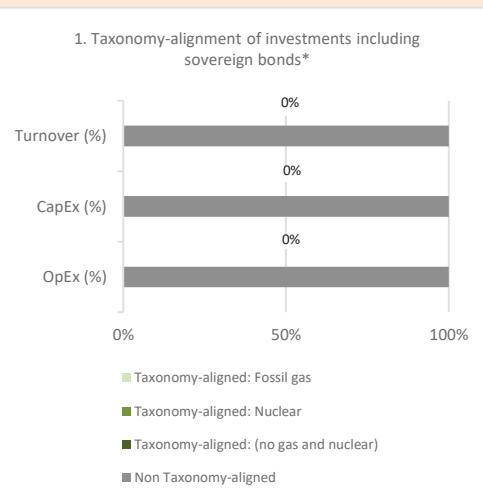

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 39.43 % of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 20%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 48.4% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.
- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Africa & Middle East Equity

Legal entity identifier 549300X0IG0G1KILX624

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.64% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (“DNSH”) threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company’s website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the “Sustainable And Responsible Investment Policy” as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company’s Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of “sustainable investments” with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to “Red” (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization’s conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
AL RAJHI BANK	FINANCIAL AND INSURANCE ACTIVITIES	6.80%	Saudi Arabia
NASPERS LTD-N SHS	INFORMATION AND COMMUNICATION	6.09%	South Africa
THE SAUDI NATIONAL BANK	FINANCIAL AND INSURANCE ACTIVITIES	3.58%	Saudi Arabia
COMMERCIAL INTERNATIONAL BAN	FINANCIAL AND INSURANCE ACTIVITIES	3.35%	Egypt
FIRSTRAND LTD	FINANCIAL AND INSURANCE ACTIVITIES	3.05%	South Africa
STANDARD BANK GROUP LTD	FINANCIAL AND INSURANCE ACTIVITIES	2.67%	South Africa
GOLD FIELDS LTD	MINING AND QUARRYING	2.31%	South Africa
MTN GROUP LTD	INFORMATION AND COMMUNICATION	2.21%	South Africa
SAUDI ARABIAN OIL CO	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	2.20%	Saudi Arabia
NATIONAL BANK OF KUWAIT	FINANCIAL AND INSURANCE ACTIVITIES	1.97%	Kuwait
SAUDI TELECOM CO	INFORMATION AND COMMUNICATION	1.93%	Saudi Arabia
SAUDI BASIC INDUSTRIES CORP	PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	1.91%	Saudi Arabia

ALINMA BANK	FINANCIAL AND INSURANCE ACTIVITIES	1.79%	Saudi Arabia
KUWAIT FINANCE HOUSE	FINANCIAL AND INSURANCE ACTIVITIES	1.72%	Kuwait

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

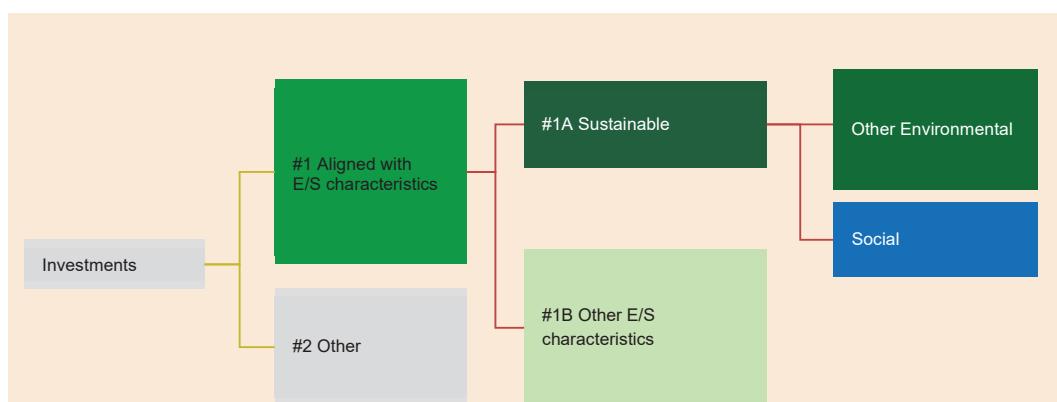

What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 98.57, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (1.43% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 57.64%, compared to the minimum threshold of 20% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	K	49.49%
INFORMATION AND COMMUNICATION	J	16.90%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	6.52%
MINING AND QUARRYING	B	5.86%
MANUFACTURING	C	5.28%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	3.99%

REAL ESTATE ACTIVITIES	L	3.28%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	1.68%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	1.68%

HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	0.91%
TRANSPORTATION AND STORAGE	H	0.63%
ARTS, ENTERTAINMENT AND RECREATION	R	0.37%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	0.04%
CONSTRUCTION	F	0.04%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

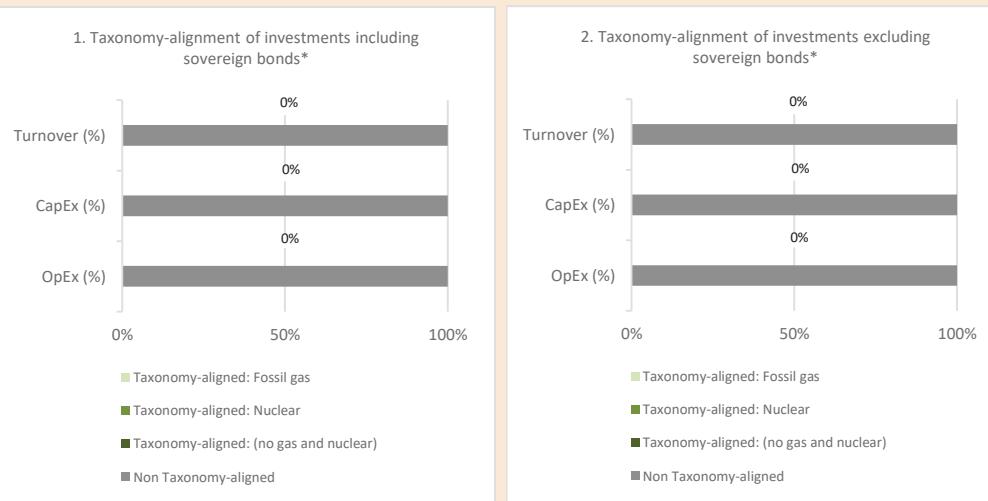

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-fund, as of 31/08/23, invested 28.3% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 10%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 57.41% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to "CCC", classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values going from "AAA", for the best rated issuers, to "CCC" for the riskiest issuers.
- a severe and serious dispute equal to "Red", classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or

environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

● **How did this financial product perform compared with the reference benchmark?**

Not applicable

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia Flexible Short Duration

Legal entity identifier 5493009SFTP2EZJ37243

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Investment Manager excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities were excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the ESG rating of the portfolio.

To undertake the ESG rating analysis, sustainable characteristics of the underlying investments were defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers. The ESG score of the portfolio was A.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company verified the PAI data through a periodic monitoring report, where the values of the indicators are consulted at product level and, where present and possible, at the respective benchmark level to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

In nuclear energy

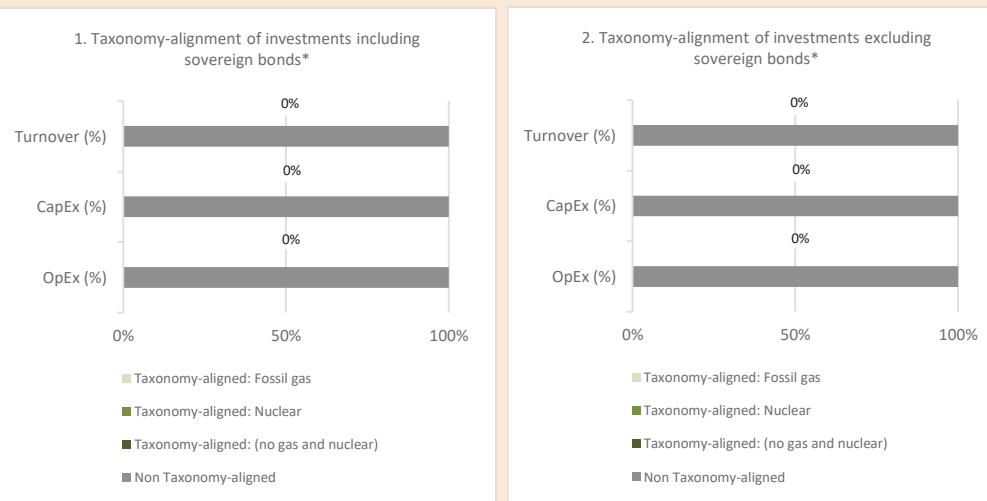

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

No

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 99.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

 are sustainable investments with an environmental objective that **do not** take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Investment Manager are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of the most virtuous issuers in terms of sustainable performance through an ESG rating. To undertake the ESG rating analysis, sustainable characteristics of the underlying investments are defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers.

How did this financial product perform compared to the reference benchmark?

Not applicable

● **How does the reference benchmark differ from a broad market index?**

Not applicable

Not applicable

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia SLJ Flexible China

Legal entity identifier 549300QZN5JN3ZSJ815

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _ %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the absence of investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Investment Manager excluded investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities were excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which included principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the ESG rating of the portfolio.

To undertake the ESG rating analysis, sustainable characteristics of the underlying investments were defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers. The ESG score of the portfolio was BB.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

Principal adverse impacts
are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable, the product promotes environmental and social characteristics but no commitment to make investments with a sustainable objective has been made.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable, the product promotes environmental and social characteristics but does not have a sustainable investment objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company verified the PAI data through a periodic monitoring report, where the values of the indicators are consulted at product level and, where present and possible, at the respective benchmark level to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
SDBC 3.43 01/14/27	FINANCIAL AND INSURANCE ACTIVITIES	13.99%	China
ISHARES MSCI CHINA A	-	12.80%	Ireland
EURIZON FUND CHINA OPP-ZEUR	-	7.00%	Luxembourg
CGB 2.62 09/25/29	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	6.83%	China
SDBC 3.07 03/10/30	FINANCIAL AND INSURANCE ACTIVITIES	5.17%	China
CGB 3.32 04/15/52	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	2.71%	China
SDBC 3.12 09/13/31	FINANCIAL AND INSURANCE ACTIVITIES	2.63%	China

LUZHOU LAOJIAO CO LTD-A	MANUFACTURING	1.40%	China

What was the proportion of sustainability-related investments?

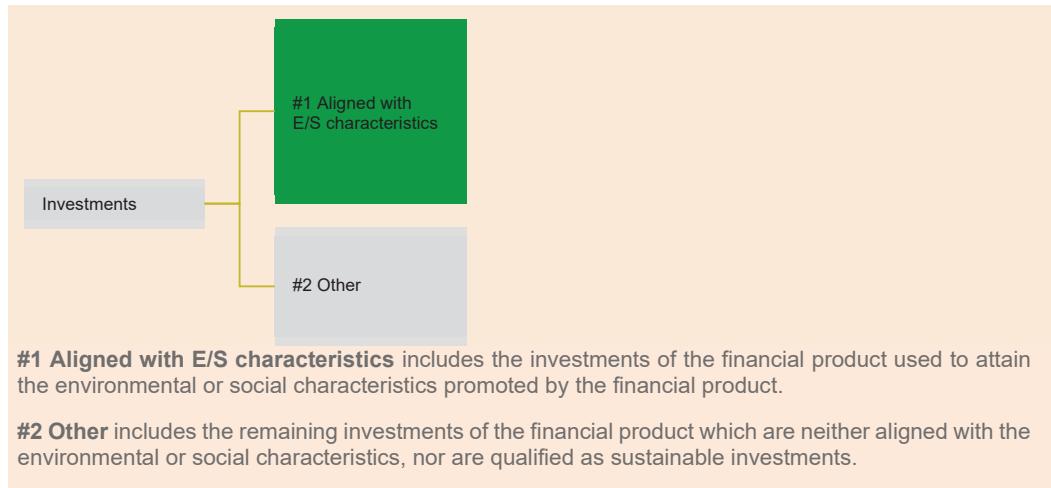

● What was the asset allocation?

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 94.09%, compared to the minimum threshold of 50% of the portfolio (box #1 Aligned with E/S characteristics).

The remaining proportion (5.91% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

Asset allocation describes the share of investments in specific assets.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
FINANCIAL AND INSURANCE ACTIVITIES	K	34.26%
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	16.36%
MANUFACTURING	C	11.78%
INFORMATION AND COMMUNICATION	J	5.66%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	4.89%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	0.81%
REAL ESTATE ACTIVITIES	L	0.75%
MINING AND QUARRYING	B	0.73%
TRANSPORTATION AND STORAGE	H	0.37%
CONSTRUCTION	F	0.34%
AGRICULTURE, FORESTRY AND FISHING	A	0.30%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	0.14%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	0.13%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

In fossil gas

In nuclear energy

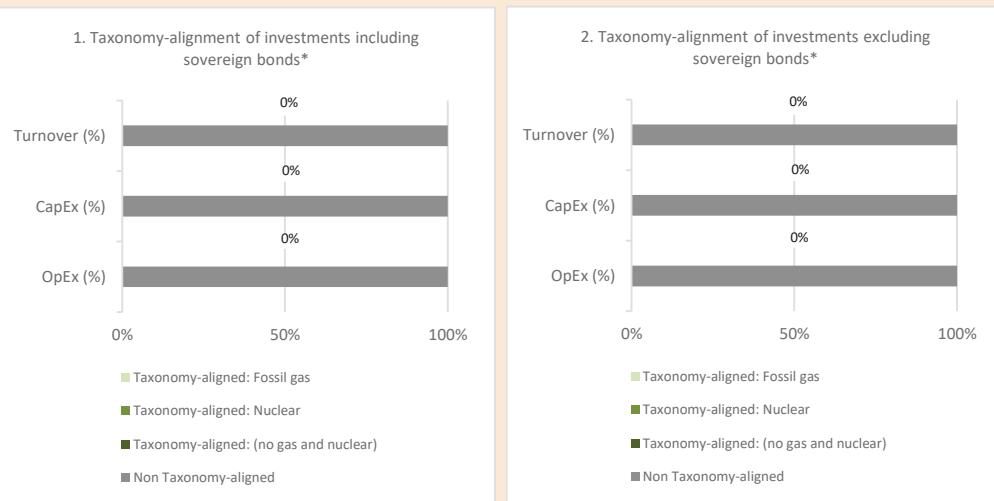

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 57.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable, the financial product does not have sustainable investment objectives.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable, the financial product does not have sustainable investment objectives.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Investment Manager are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain Conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of the most virtuous issuers in terms of sustainable performance through an ESG rating. To undertake the ESG rating analysis, sustainable characteristics of the underlying investments are defined by reference to a combination of data generated internally by the Investment Manager's proprietary models and data provided by external ESG research providers.

How did this financial product perform compared to the reference benchmark?

Not applicable

● **How does the reference benchmark differ from a broad market index?**

Not applicable

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

● **How did this financial product perform compared with the reference benchmark?**

Not applicable

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Fonditalia 4Children

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Legal entity identifier 549300BIMOFGOP4NSE76

Sustainable investment objective

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** 78.72%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 65.86%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The Sub-fund combined environmentally and socially sustainable investment objectives with the general aim to enhance and improve the children's right. It aimed to create positive environmental and social impact by investing in companies that are involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the following objectives:

- Social objectives: selecting companies supporting and facilitating social benefits like, but not exclusively, the enhancement of good health and well-being, decent work and economic growth, quality education, sustainable cities and communities with a thematic focus on children's rights;
- Environmental objectives: selecting companies which have a specific commitments in the reducing of carbon emission according the Science Based Targets initiative (SBTi) of the Intergovernmental Panel on Climate Change (IPCC). Depending on the availability of feasible investment opportunities, the sub-fund may contribute to any of the environmental objectives set out in Taxonomy Regulation (climate change mitigation and adaptation).

In order to reach its sustainable objective the Investment Manager (hereafter also "FAMI") adopted the firmwide sustainable investment framework built around the United Nations Social Development Goals (UN SDGs). This framework helps the Investment Manager to assess the extent companies' products

and services address at least one of the selected social and environmental challenges, as defined by the UN Sustainable Development Goals (UN SDGs) without conflicting with any of the 17 SDGs.

The Sub-fund contributed towards the following sub-set of environmental and social SDGs:

- Goal 2: Zero Hunger
- Goal 3: Good Health and Well-being
- Goal 4: Quality Education
- Goal 6: Clean Water and Sanitation
- Goal 7: Affordable and Clean Energy
- Goal 8: Decent Work and Economic Growth
- Goal 10: Reduced Inequalities
- Goal 11: Sustainable Cities and Communities
- Goal 12: Responsible Production and Consumption
- Goal 13: Climate Action

A reference benchmark with specific focus on the sustainable thematic has been commissioned to a third-party index provider for the purpose of attaining the sustainable investment objective. The benchmark of the Sub-fund consists of the arithmetical weighted average of the following indexes: "MSCI ACWI ex select countries Sustainable Impact Children ESG Index" and "MSCI EUR IG ESG Leaders Corporate Bond Select Index" (the "Benchmark").

The Benchmark did not qualify as an EU Climate Transition Benchmark or EU Paris-aligned Benchmark.

The sustainable investment objective was pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators
measure how the
sustainable objectives of
this financial product are
attained

How did the sustainability indicators perform?

The Sub-fund pursued the sustainable investment objective through the following sustainability indicators:

1. The % of companies that are compliant with the United Nations Global Compact principles (UNGC) and the Human Rights Standard (i.e. ILO) compared to the designated benchmark (29% vs 28.2%).
2. The % of companies which have adopted policies against child labours compared to the designated benchmark (59.6% vs 53.1%).
3. The % of companies which disclosure the gender pay-gap and the sub-fund's average unadjusted gender pay gap of investee companies (PAI 12) compared to the designated benchmark (14.6% of invested companies report the gender pay gap vs 12.3% of the companies in the benchmark report the gender pay gap. The gender pay gap of invested companies is 3.55% and the gender pay gap of the benchmark is 4.66%).
4. The % of companies which have an approved commitment to pursue Science Based Targets initiative (SBTi) compared to Benchmark; (24.6% vs 25%)
5. The sub-fund's weighted carbon footprint / GHG intensity score (3y CAGR) compared to the designated Benchmark; (33.91mt Co2 per 1 mil EUR EVIC invested VS 35.19/ 85.84 mt Co2 per 1 mil EUR of sales vs 97.61).
6. The application of FAMI's Exclusion policy for sectors and critical issuers.
7. The % of investments which have a positive contribution to one or more of the environmental and social SDGs selected. The criteria assumed for measuring the positive contribution of each investment, is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology":
 8. "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
 9. "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific Sustainable

Development Goals (SDGs). This metric takes into account the internal policies, objectives

and practices implemented by the issuers.

● ***...and compared to previous periods?***

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The sustainable investment framework based on UN SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee company is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm (DNSH) criteria and it excludes the opportunity to invest in the issuer. Additional third-party data provides further tools and KPIs to assess if and how any investee company pass the Do Not Significantly Harm (DNSH) test.

→ ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The significant harm to any environmental or social sustainable investment objective (represented by one or more of each SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors. Impacts on PAI were managed directly through the application of the exclusion policy (for Issuers operating in non-socially responsible sectors or exposed to ESG risk) and the active engagement by FAMI on investee companies.

Investment Manager can check the PAIs data concerning the sub-fund through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level to include this information in the investment decision-making process.

The Investment manager considers the following indicators: PAI 1 - Carbon emission (Scope 1 + 2); PAI 3 - GHG intensity of investee companies; PAI 2 - Portfolio carbon footprint; PAI 4 Exposure to companies active in fossil fuel sector; PAI 10 - Violations of UNGC principles and OECD guidelines for Multinational Enterprises; PAI 12 - Unadjusted gender pay gap; PAI 13-Board gender diversity; PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons).

→ ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The Investment Manager's Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was inspired by the principles contained in documents such as UN Global Compact principles (UNG), UN Guiding Principles on Business and Human Rights (UNGPs), OECD Guidelines for multinational enterprises, International Labor Organization Conventions. This approach followed the methodology for the definition of "sustainable investments" with specific reference to the Do Not Significantly Harm Principle.

The Investment Manager monitored the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to "Red" (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization's conventions, and the United Nations Guiding Principles on Business and Human Rights) were excluded from the investment perimeter.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considered the following indicators: PAI 1 - Carbon emission (Scope 1 + 2); PAI 3 - GHG intensity of investee companies; PAI 2 - Portfolio carbon footprint, , PAI 4 - Exposure to companies active in fossil fuel sector; PAI 10 - Violations of UNGC principles and OECD guidelines for Multinational Enterprises; PAI 12 - Unadjusted gender pay gap; PAI 13-Board gender diversity; PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons).

Impacts on PAI were managed directly through the application of the exclusion policy (for Issuers operating in non-socially responsible sectors or exposed to ESG risk) and the active engagement by FAMI on investee companies.

The PAIs taken into consideration are subject to data availability and may therefore overtime change and evolve with improving data quality and availability.

FAMI portfolio managers can check the PAI data concerning their products through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
ISHARES G BD IN F IE-DEURHA	-	5.14%	Ireland
AMUNDI-IMPACT GREEN BNDS-DPC	-	4.99%	France
DBR 0 08/15/31	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	3.83%	Germany
BTPS 4 04/30/35	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	3.65%	Italy
BYD CO LTD-H	MANUFACTURING	3.06%	China
FRTR 1 3/4 06/25/39	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	2.89%	France
CONTEMPORARY AMPEREX TECHN-A	MANUFACTURING	2.81%	China
NIO INC - ADR	MANUFACTURING	2.70%	Cayman Islands
ORSTED A/S	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	2.66%	Denmark
CAN 2 1/4 12/01/29	PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	2.57%	Canada

VERTEX PHARMACEUTICALS INC	MANUFACTURING	2.09%	United States
NOVO NORDISK A/S-B	MANUFACTURING	2.09%	Denmark

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Sub-fund was fully invested in sustainable investments by its own mandate of Art. 9 fund. The Investment Manager set a minimum target at 70% (box #1 Sustainable) only to allow some degree of flexibility related to financial market conditions that would at certain times encourage a prudent approach with some build-up of cash or money market instruments. In accordance with the binding elements of the investment strategy adopted for pursuing a sustainable investment objective, the proportion of the sustainable investments as of 31/08/2023 was 91.75%

Some investments contributed to both the social and the environmental objective given their alignment to both social and environmentally Sustainable Development Goals (SDGs).

Climate change mitigation and adaptation are objectives that set a long-term target to deliver a more sustainable world to children and fulfil the main sub-fund objective which is the protection of children's rights.

Assets which are not sustainable only included cash and money market instruments (8.25% of total investments).

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
MANUFACTURING	C	36.22%
PUBLIC ADMINISTRATION AND DEFENCE; COMPULSORY SOCIAL SECURITY	O	12.95%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	12.84%
REAL ESTATE ACTIVITIES	L	4.78%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	3.95%
INFORMATION AND COMMUNICATION	J	2.90%
AGRICULTURE, FORESTRY AND FISHING	A	2.18%
FINANCIAL AND INSURANCE ACTIVITIES	K	1.93%
TRANSPORTATION AND STORAGE	H	1.45%
ARTS, ENTERTAINMENT AND RECREATION	R	1.44%
EDUCATION	P	1.42%
CONSTRUCTION	F	1.07%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	0.99%
WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES	E	0.82%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND	G	0.41%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Based on the current available data the Investment Manager set a minimum target of 1% classified as aligned to the EU taxonomy.

The proportion of the investments classified as aligned to the EU taxonomy as of 31/08/2023 was 2.9%.

While the Investment Manager did not provide compliance assured by auditors or third parties, the only EU taxonomy alignment data utilized and reported is based on companies provided data and not on third party estimates which are still subjected to different methodologies and are based on a general assessment of the business.

As for sovereign bonds, the Investment Manager believes that green bonds issued by OECD countries may be compliant to taxonomy rules, but it seemed prudent for now not to include them in the taxonomy aligned investment portion in the absence of a clear rule.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

Yes

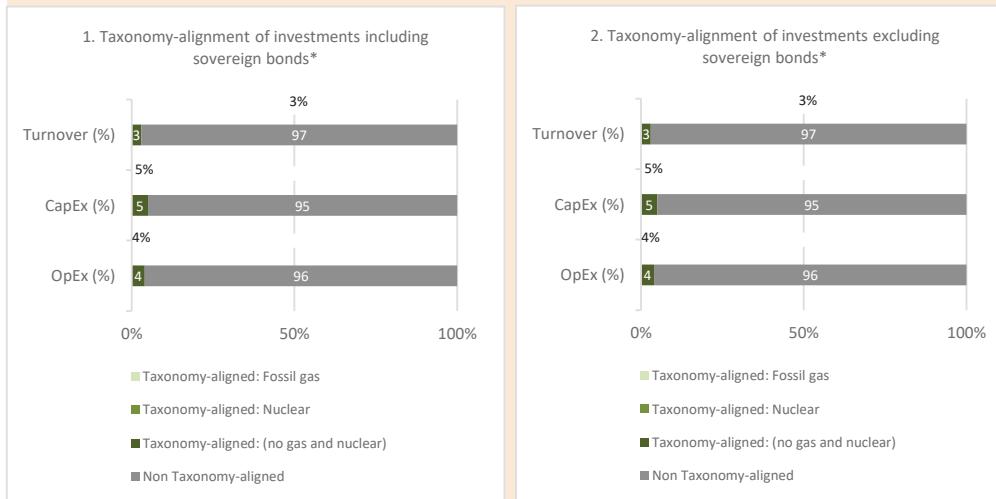

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 87.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● ***What was the share of investments made in transitional and enabling activities?***

The share of investments in transitional activities was 0%. The share of investments in enabling activities was 0%.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 75.82% of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 34%.

What was the share of socially sustainable investments?

At least 35% of net assets were dedicated to socially sustainable investments.

The proportion of socially sustainable investments as of 31/08/2023 was 65.86%.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Only cash and money market instruments were included under not sustainable investments and a basic due diligence was conducted to ensure the respect of minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

1. The Sub-fund is an impact fund classified under SFDR Art. 9 therefore the first binding element was the mandatory requirement to invest only in sustainable investments, as defined by article 2(17) SFDR in accordance with the Investment Manager's methodology for selecting sustainable investments, unless for liquidity and hedging purpose.

2. The Sub-fund was compliant with FAMI's Exclusion policy. Limitations are related to:

a. sector exclusions such production, sales, maintenance and storage of controversial weapons or extractive activities, production and distribution of electricity connected with thermal coal, companies exposed to production and distribution of conventional weapons, alcohol, tobacco, gambling and adult entertainment;

b. “critical” issuers are restricted or excluded from the entirety of assets under management (so called “ESG binding screening”). Those issuers are the ones highly exposed to ESG risks or involved in particularly serious business controversies like violations of international treaties or principles such as the UN Global Compact and ILO Core Conventions

c. companies not compliant with ILO Convention No. 182 and No. 190 on Child Labor and in companies not compliant with Breast Milk Substitute screen based on International Baby Food Action Network (IBFAN).

3. The following Sub-fund indicators were higher than the ones of the designated Benchmark:

a. The % of companies that are compliant with the United Nations Global Compact principles (UNGC) and to the Human Rights Standard (i.e. ILO);

b. The % of companies which have adopted policies against child labours;

- c. The % of companies which disclosure the gender pay gap and the sub-funds average unadjusted gender pay gap of investee companies (PAI 12);
- d. The % of companies which have an approved commitment to pursue Science Based Targets initiative (SBTi) compared with the designated Benchmark;
- e. The Sub-fund's weighted carbon footprint / GHG intensity score (3y CAGR) compared to the designated Benchmark.

The binding elements are monitored on ongoing basis by the risk manager and by the portfolio manager.

How did this financial product perform compared to the reference sustainable benchmark?

The following Sub-fund indicators were higher than the ones of the designated Benchmark:

- a. The % of companies that are compliant with the United Nations Global Compact principles (UNGC) and to the Human Rights Standard (i.e. ILO);
- b. The % of companies which have adopted policies against child labours;
- c. The % of companies which disclosure the gender pay gap and the sub-funds average unadjusted gender pay gap of investee companies (PAI 12);
- d. The % of companies which have an approved commitment to pursue Science Based Targets initiative (SBTi) compared with the designated Benchmark;

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

● How did the reference benchmark differ from a broad market index?

The Benchmark differs completely from a relevant broad market index.

First and foremost, the index is built only on environmental and social sustainable themes, secondly several business and norm based exclusions are applied. As a result, several sectors or companies even with relevant market cap are not present in the reference Benchmark.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The Benchmark indicators used to pursue the sustainable investment objective were:

- a. The % of companies that are compliant with the United Nations Global Compact principles (UNGC) and to the Human Rights Standard (i.e. ILO) (29%);
- b. The % of companies which have adopted policies against child labours (59.6%);
- c. The % of companies which disclosure the gender pay gap and the sub-funds average unadjusted gender pay gap of investee companies (PAI 12) (14.6% of invested companies report the gender pay gap vs 12.3% of the companies in the benchmark report the gender pay gap. The gender pay gap of invested companies is 3.55% and the gender pay gap of the benchmark is 4.66%);
- d. The % of companies which have an approved commitment to pursue Science Based Targets initiative (SBTi) compared with the designated Benchmark (24.6% vs 25%);

● How did this financial product perform compared with the reference benchmark?

The following Sub-fund indicators were higher than the ones of the designated Benchmark:

- a. The % of companies that are compliant with the United Nations Global Compact principles (UNGC) and to the Human Rights Standard (i.e. ILO);
- b. The % of companies which have adopted policies against child labour;
- c. The % of companies which disclosure the gender pay gap and the sub-funds average unadjusted gender pay gap of investee companies (PAI 12);
- d. The % of companies which have an approved commitment to pursue Science Based Targets initiative (SBTi) compared with the designated Benchmark;

● How did this financial product perform compared with the broad market

index?

The Benchmark performed differently from a broad market index since it was built only on environmental and social sustainable themes, secondly several businesses and norm-based exclusions are applied. As a result, several sectors or companies even with relevant market cap are not present in the reference Benchmark.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Fonditalia Quality Innovation Sustainability

Legal entity identifier 5493008QGLIWSDIGIZ62

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: _%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74.01% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The main environmental and social characteristics promoted by the Sub-fund through the Investment Manager's ESG methodology were the following:

- Environmental: climate change prevention (in terms for example of reduction of carbon emission, carbon footprint, climate change vulnerability), pollution & waste prevention (with reference to toxic emissions & waste, packaging material & waste, electronic waste), environmental opportunities (in clean tech, in renewable energy);
- Social: human capital (labor management, health & safety, human capital development, supply chain labor standards), product liability (product safety & quality, chemical safety, consumer financial protection, privacy & data security, responsible investment, health & demographic risk), social opportunities (access to communications, access to finance, access to health care, opportunities in nutrition & health), stakeholder opposition (controversial sourcing, community relations).

In addition the Sub-fund partly invested in sustainable investments pursuant to article 2(17) SFDR which means companies and issuers involved in activities that contribute to an environmental and social objective as outlined in UN Sustainable Development Goals (hereinafter also "SDGs") while not

significantly harming any other environmental or social objectives.

Environmental and social characteristics are pursued through the indicators listed in the section: "How did the sustainability indicators perform?".

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The indicators used to measure the attainment of each of the environmental or social characteristic promoted by the Sub-fund were:

- the binding restrictions in the investments in securities that were on the exclusion list as result of the application of the exclusion policy. The Management Company restricts investment in sectors which deemed to be harmful from an SRI/ESG perspective or which did not follow good governance practices. As an example, the Sub-fund complied with an exclusions policy which referred to: i) the production, maintenance, sales and storage of weapons of mass destruction (WMD); and ii) the extractive activities, production and distribution of electricity connected with thermal coal, the energy source among fuels which represents the highest contributor in terms of carbon dioxide emissions; therefore, issuers deriving at least 25% of their revenues from these activities are excluded. The exclusion was extended to those issuers in breach of the Principles of the UN Global Compact which include principles relating to human rights, labour conditions, environmental issues and anti-corruption practices;
- the weighted average ESG scoring of the portfolio.

To undertake this ESG criteria analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g., MSCI). The ESG score of the portfolio was AA.

● **...and compared to previous periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-fund invested part of the portfolio in sustainable investments combining environmental and social objectives. In order to create positive environmental and social impact by investing in companies that were involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the 17 environmental or social-themed SDGs (<https://sdgs.un.org/goals>).

It must be clarified that the Sub-fund did not commit to make investments in taxonomy-aligned environmentally sustainable investments according to article 6 of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"). Consequently there is not a specific commitment to pursue one or more environmental objectives of article 9 of the EU Taxonomy. It was however not excluded that the Sub-fund may have been exposed to underlying investments that contribute to one or more of the environmental objectives of the EU Taxonomy, such as but not limited to climate change mitigation and/or climate change adaptation.

The criteria assumed for measuring the positive contribution of each investment to each sustainable objective is based on the components defined by "MSCI ESG Research" within its methodological framework "SDG Alignment Methodology" which is based on the two following main indicators:

- "Product Alignment", i.e. the indicator of the degree of "net alignment" of an issuer's products and services to the targets associated with each SDG; this indicator aims to (i) estimate the revenue of companies issuing products and services that respond to one or more relevant SDGs, and (ii) identify products and services that have potentially negative impacts with respect to the achievement of the SDGs;
- "Operational Alignment", i.e. the indicator of the degree of alignment of the production processes of the issuing companies with respect to specific SDGs. This metric takes into account the internal policies, objectives and practices implemented by the issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investment methodology based on SDGs is built around the concept of SDGs alignment as much as misalignment. Each investee companies is evaluated in relation to both metrics therefore any misalignment to at least one of the 17 SDGs is considered a breach of the Do Not Significantly Harm ("DNSH") threshold and it excludes the possibility to consider the issuer as a sustainable investment. Additional third party data provides further tools and KPIs to assess if and how any investee company pass the DNSH test.

→ **How were the indicators for adverse impacts on sustainability factors taken into account?**

The significant harm to any environmental or social sustainable investment objective (represented by one or more of the 17 SDGs) was avoided by the monitoring of any adverse impact caused by each sustainable investment on sustainability factors.

All of the mandatory adverse impact indicators of Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 (the "SFDR RTS") were taken into account and any relevant ones in Tables 2 and 3 of the SFDR RTS by checking the PAI data through a periodic monitoring report where the values of the indicators at product level can be consulted and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process.

However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits were set at portfolio level.

Additional information on PAI is available in the section dedicated to sustainability in the Management Company's website (<http://www.fideuramireland.ie/en/sustainability/sustainability/>), which includes the "Sustainable And Responsible Investment Policy" as well as other PAI information.

→ **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Management Company's Sustainable and Responsible Investment Policy specifies that corporate approach to sustainable and responsible investments was

inspired by the principles contained in documents such as UN Global Compact principles (UNGC), UN Guiding Principles on Business and Human Rights (UNGPs), Organization for Economic Cooperation and Development (OECD) Guidelines for multinational enterprises, International Labor Organization Conventions. This approach follows the methodology for the definition of "sustainable investments" with specific reference to the Do Not Significantly Harm Principle.

The Management Company monitors the entire portfolio on the basis of a series of environmental, social and governance indicators (via third party data), including the violations of the UNGC and OECD Guidelines for Multinational Enterprises. Issuers characterized by a severe and serious dispute equal to "Red" (also referring to selected global norms and conventions, including the United Nations Global Compact Principles, the International Labour Organization's conventions, and the United Nations Guiding Principles on Business and Human Rights) are excluded from the investment perimeter.

In addition, as described in the Sustainable and Responsible Investment Policy, the Management Company monitored two social PAI selected to limit exposures to violations of the UNGC principles/OECD guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Management Company specifically considered the following principal adverse impact (“PAI”) indicators: Carbon emission (Scope 1 + 2); GHG intensity of investee companies; Violations of UNGC principles and OECD guidelines for Multinational Enterprises; Exposure to controversial weapons (anti-personnel mines, cluster ammunitions, chemical and biological weapons). For government bonds and supranationals: GHG intensity and Investee Countries subject to social violations.

The Sub-fund’s Management Company can check the PAI data through a periodic monitoring report, where can be consulted the values of the indicators at product level and, where present and possible, at respective benchmark level in order to include this information in the investment decision-making process. However, considering the large variability of PAI data at sectoral and geographical level, as well as their retrospective nature, no thresholds or stringent limits are set at portfolio level.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

31/08/2023 - 31/08/2023

Largest Investments	Sector	% Assets	Country
VISA INC-CLASS A SHARES	FINANCIAL AND INSURANCE ACTIVITIES	4.95%	United States
NVIDIA CORP	MANUFACTURING	4.33%	United States
TESLA INC	MANUFACTURING	3.95%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of

What was the asset allocation?

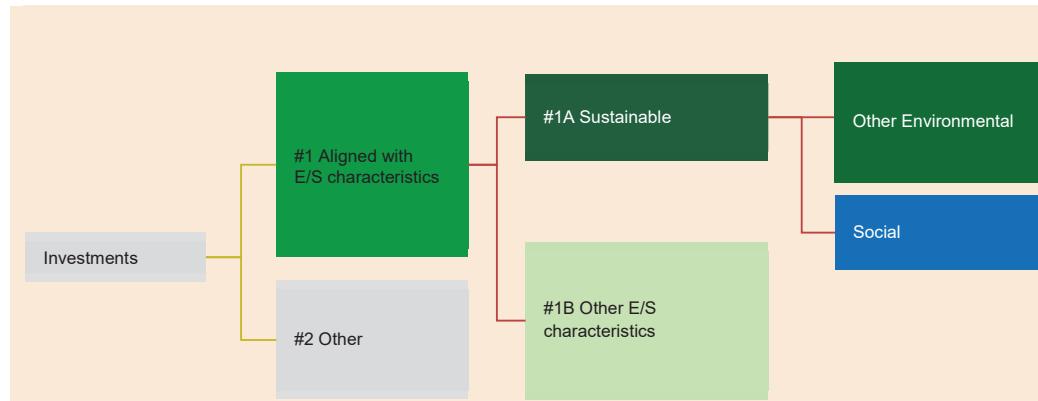

In accordance with the binding elements of the investment strategy adopted for promoting the environmental and social characteristics, the proportion of the investments that met the ESG criteria (in terms of ESG rating coverage) as of 31/08/2023 was 100%, compared to the minimum threshold of 80% of the portfolio (box #1 Aligned with E/S characteristics).

investments in specific assets.

The remaining proportion (0% corresponding to the box #2 Other) of the investments (not included in the investments for promoting environmental or social characteristics) should be limited to:

- cash and cash equivalent instruments which may be held as ancillary liquidity or for risk balancing purposes;
- derivatives which may be held for risk balancing purposes and efficient portfolio management but not for promoting environmental and social characteristic;
- securities for which relevant data is not available.

The Sub-fund as of 31/08/2023 had a share of sustainable investments equal to 74.01%, compared to the minimum threshold of 30% (box #1ASustainable). Some investments contributed to both the social and the environmental objective given their alignment to both social and environmental Sustainable Development Goals (SDGs).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
MANUFACTURING	C	48.55%
INFORMATION AND COMMUNICATION	J	17.03%
FINANCIAL AND INSURANCE ACTIVITIES	K	15.08%
PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES	M	5.39%
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	N	4.41%
TRANSPORTATION AND STORAGE	H	2.99%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	G	1.45%
CONSTRUCTION	F	1.35%
MINING AND QUARRYING	B	0.52%
REAL ESTATE ACTIVITIES	L	0.48%
ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	D	0.45%
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	I	0.32%
ARTS, ENTERTAINMENT AND RECREATION	R	0.21%
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Q	0.07%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Investments in environmentally sustainable economic activities aligned with the EU taxonomy represented 0,0% of the portfolio.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹**

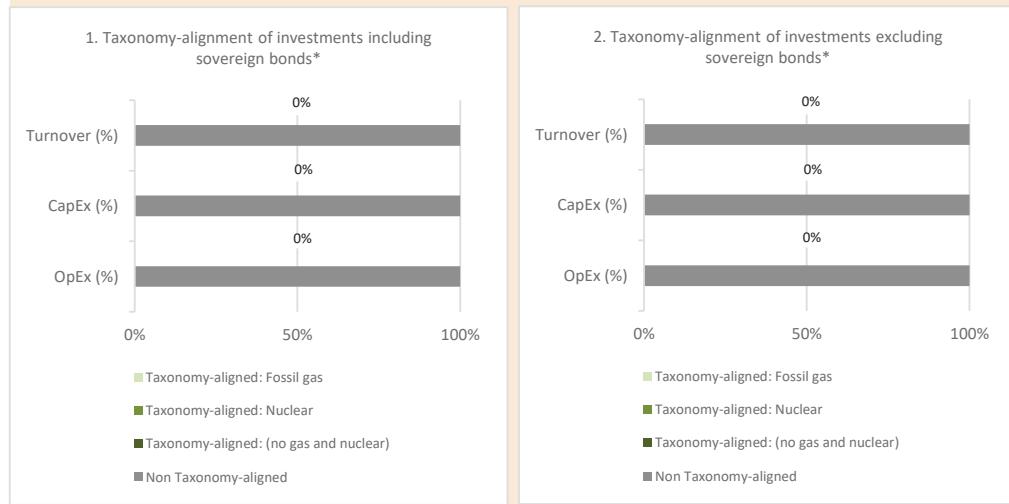

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities was 0%.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable, given that no prior periodic disclosure, as mandated by Regulation 2022/1288, has been presented.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund, as of 31/08/23, invested 50.97 % of its investments in sustainable investments with environmental objectives that are not aligned with the EU Taxonomy, compared to the minimum threshold of 20%.

What was the share of socially sustainable investments?

The Sub-fund, as of 31/08/23, invested 71.91% of its investments in sustainable investments with a social objective, compared to the minimum threshold of 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining portfolio may also hold instruments not subject to the ESG integration process such as cash and cash equivalent instruments or for risk balancing purposes and derivatives for risk balancing purposes and efficient portfolio management. This category may also include securities for which relevant data is not available. There are no guarantees on the respect of the minimum environmental and social safeguards criteria regarding the investments under the category "#2 Others".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Actions taken during the reference period to meet environmental and social characteristics followed by the Management Company are the following:

SRI exclusion criteria:

Issuers directly operating in the following sectors are not permitted:

- in the production, maintenance, sales and storage of weapons of mass destruction (WMD), i.e., nuclear, biological, chemical and radiological weapons (NBCR), including those which are excessively harmful and indiscriminate as identified by the United Nations Convention on Certain conventional Weapons (CCW);
- in the extractive activities and production of electricity connected with thermal coal, the energy source among fuels which represents at the global level the highest incidence for carbon dioxide emissions; therefore, issuers with at least 25% of their revenues from these activities are excluded.

ESG screening and monitoring:

Issuers characterized by the following are excluded from the investment perimeter:

- an ESG rating equal to “CCC”, classified according to the proprietary rating methodology of the external provider MSCI, which contemplates a range of values

going from “AAA”, for the best rated issuers, to “CCC” for the riskiest issuers.

- a severe and serious dispute equal to “Red”, classified according to the proprietary methodology of the external provider MSCI, that indicates an ongoing very severe ESG controversy (a controversy having a social and/or environmental impact) involving a company directly through its actions, products or operations (e.g., loss of life, destruction of eco-system, economic shakedown affecting multiple jurisdictions).

The ESG screening and monitoring is performed using data based on MSCI methodology.

For this product, which has a benchmark (as set out in the Sub-fund's investment policy), the binding investment restrictions allow a maximum permissible exposure equal to the issuer's weight on the benchmark.

Integration of ESG factors:

The integration of ESG factors is promoted through the selection of issuers in terms of their sustainable performance through an ESG score and in order that the final average ESG portfolio scoring is higher than that one related to the Sub-fund's benchmark.

To undertake this ESG score analysis, the Management Company used data provided by external ESG research providers' proprietary models (e.g. MSCI).

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable
- ***How did this financial product perform compared with the broad market index?***
Not applicable.
