# Interfund Equity USA Advantage

Sub-Fund of Interfund Sicav (ISIN LU0006040116)

Management Company: Fideuram Asset Management (Ireland) dac, Intesa Sanpaolo banking group

## OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in Euro, seeks long term capital appreciation, measured in Euro, by investing primarily in securities issued by US companies and on an ancillary basis in securities issued by companies that are not from the US. Under normal market conditions, the Sub-Fund's investment objective will be pursued by investing primarily in equity securities of established large-capitalisation companies. The investment process emphasises a bottom-up stock selection process, seeking attractive investments on an individual company basis. Fundamental research drives the investment process. Company developments, including business strategy and financial results, are studied on an ongoing basis. Portfolio holdings are generally considered for divestment when it is determined that the holding no longer satisfies the Sub-Fund's investment criteria.

The Sub-Fund may also be invested, on an ancillary basis, in equities of companies not meeting the above requirements, debt securities convertible into common shares, preferred shares, warrants on securities and other equity linked securities.

The Sub-Fund may use financial derivative instruments not only for the purpose of risk hedging but also for investment purposes.

The benchmark of the Sub-Fund consists of the index "Morgan Stanley Capital International USA" (represents the performance of the US stock market).

This is a capitalization Sub-Fund.

You may redeem the shares held at any moment, by sending a request on any business day.
